

APPENDIX V – 124

Culturally Relevant Pedagogy Instruction**2016-2017 CRC Courses**

Teachers		Students		CRC Courses
Total HS Teachers:	28		1642	69
Total MS Teachers:	41		1084	45
Total 5th Teachers:	9		197	9
Total CRC Teachers: 78		2923		123

The 2016-2017 CRC expansion was significant. Student enrollment increased by a thousand students. By the end of the year, students served by designated CRC courses will be est. **3148** students. This difference between first and second semester numbers is due to the Government courses that are semester-long courses. These nine courses with an average enrollment of 25 students should account for an additional 225 students served.

These numbers account for actual students served in designated CRC courses. However, the true impact of this expansion is much larger. The majority of the growth consisted of the middle school expansion. This stipulation required middle schools and 8th grade K-8 expansion into at least one ELA and at least one social studies course. Several middle school teachers requested the option of converting additional or all classes to CRC designated courses.

The District recommended that only one section of MS CRC teachers' class load be designated as CRC. The logic in limiting the CRC designation in MS was based on limited resources available, accountability and quality control. Recognizing that students at the middle school level do not self-select their courses, non-CRC options need to be made available.

While only one section was designated CRC at the middle school level for each CRC teacher, the impact of the increased training and professional development is expected to pay dividends for all students in those teachers' classes. With an average student roster of 125 students, the impact of 41 middle school teachers is multiplied to equal 5125. The CRC impact on students increases to nearly seven thousand students.
