Dr. Hawley and counsel:

As promised, attached is the district's **Advanced Learning Experiences (ALE) Access and Recruitment Plan**.

This is the last plan due under the USP until the district develops the final two - **Boundary** and **Magnet** plans - on or before July 1, 2014.

If you have any questions regarding the attached plan, please let me know and I will respond as quickly as I can. Again, thank you all very much for your courtesies and cooperation throughout this adventure.

Bill

Tucson Unified School District

Advanced Learning Experiences (ALE) Access and Recruitment Plan

USP LANGUAGE

V. QUALITY OF EDUCATION

A. Access to and Support in Advanced Learning Experiences

1. *Overview.* *The purpose of this section shall be to improve the academic achievement of African American and Latino students in the District and to ensure that African American and Latino students have equal access to the District's Advanced Learning Opportunities.*

2. *General Provisions.*

- a. *By ~~April 1, 2013~~ July 1, 2013¹, the District shall hire or designate a District Office employee to be the Coordinator of Advanced Learning Experiences ("ALEs")... The ALE Coordinator shall have responsibility for: reviewing and assessing the District's existing ALEs, developing an ALE Access and Recruitment Plan, assisting appropriate District departments and schools sites with the implementation of the ALE Access and Recruitment Plan, and developing annual goals, in collaboration with relevant staff, for progress to be made in improving access for African American and Latino students, including ELL students, to all ALE programs. These goals shall be shared with the Plaintiffs and the Special Master and shall be used by the District to evaluate effectiveness.*
- b. *By ~~July 1, 2013~~ October 1, 2013², the ALE Coordinator shall complete an assessment of existing ALE programs, resources, and practices in the District and by school site. This assessment shall include: (i) a review of the ALEs offered at each school; the number of students enrolled in each ALE program at each school (disaggregated by grade level, race, ethnicity, ELL status); and the resources available in each school for ALEs (e.g., part-time or full-time personnel assigned, annual budget); and (ii) a determination of what, if any, barriers there are for students at each school site to enroll in and successfully complete ALEs offered at each school site. The assessment shall include an analysis of the data and information gathered and findings, including whether African American and Latino students, including ELL students, have equitable access to ALEs, and recommendations regarding additional data that the District's data system should gather to track students' ALE access and participation.*

¹ This USP date was changed by agreement among the Special Master, counsel for plaintiffs, and the District. Although the District hired the ALE Director before July 1, 2013, she began work on July 1, 2013.

² This USP date was changed by agreement among the Special Master, counsel for plaintiffs, and the District. The District completed the ALE assessment by October 1, 2013.

- c. ~~By October 1, 2013~~ January 1, 2014³, the ALE Coordinator shall develop the ALE Access and Recruitment Plan, which shall include strategies to identify and encourage African American and Latino students, including ELL students, to enroll in ALEs; to increase the number of African American and Latino students, including ELL students, enrolling in ALEs; and to support African American and Latino students, including ELL students, in successfully completing ALEs. In developing this Plan, the ALE Coordinator shall take into account the findings and recommendations of the assessment of existing ALE programs, resources, and practices in the District and best practices implemented by other school districts.
- d. To recruit and encourage African American and Latino students, including ELL students, to apply for and enroll in ALEs, the ALE Access and Recruitment Plan shall include, but not be limited to, the following strategies:
- (i) Developing accessible materials (e.g., informational booklets and DVDs, web pages, mailers) describing the District's ALE offerings by content, structure, requirements, and location;
 - (ii) Coordinating with the relevant administrator(s) at the Family Center(s) and in the District Office to distribute such materials to parents;
 - (iii) Holding community meetings and informational sessions regarding ALEs in geographically diverse District locations, coordinated with the Family Center(s), Multicultural Student Services, and any other relevant District departments;
 - (iv) Providing professional development to administrators and certificated staff to identify and encourage African American and Latino students, including ELL students, to enroll in ALEs; and
 - (v) Ensuring that there is equitable access to ALEs, including by: (I) assessing the feasibility of testing all students at appropriate grade levels and using multiple measures for selection to GATE and UHS; (II) increasing access to academic preparation programs such as AVID; and (III) eliminating barriers to ALE enrollment, including, as appropriate, providing weighted grades for pre-AP and AP students, offering free or reduced AP exam fees for low income students, offering to waive other participation fees for any ALEs, integrating AAC sessions into summer academies, and creating structures for peer mentoring and pairing, and the provision of resources for ALEs.
- e. The Plan shall include a complaint process to allow students and/or parent(s) to file complaints regarding practices that have the intent or effect of excluding students from enrollment, identification, admission, placement, or success in ALEs. The District shall disseminate information regarding this complaint process at all school sites, through the Family Center(s), at the District Office, and on the website.

³ This USP date was changed by agreement among the Special Master, counsel for plaintiffs, and the District. This deadline was extended again by a December 2, 2013 Court order to January 29, 2014, pursuant to a revised timeline for completion of plans proposed by the Special Master. Due to ongoing efforts on development of this plan (as well as others), the District requested the Special Master and counsel for plaintiffs to extend this date to March 3, 2014. This request has not yet been granted or denied.

f. *By January 1, 2014, the District shall implement the ALE Access and Recruitment Plan.*⁴

3. *Gifted and Talented Education (“GATE”) Services*

- a. *In developing the ALE Access and Recruitment Plan, the ALE Coordinator shall use the results of the assessment and analyses required by Section (V)(A)(2)(b) to*
- (i) Increase the number and percentage of African American and Latino students, including ELL students, receiving GATE services by improving screening procedures for GATE services and placement in GATE services to ensure that students are identified, tested, and provided with GATE services in a fair and nondiscriminatory manner that does not have an adverse impact on any student based on his/her race, ethnicity or English language proficiency;*
 - (ii) Increase the number and quality of GATE offerings, as appropriate, to provide equal access and equitable opportunities for all students, including assessing the feasibility of adding or expanding GATE dual language programs;*
 - (iii) Assess whether the implementation of GATE services at school sites (e.g., self-contained, pull-out, clustering, or resource-driven models) should be modified to increase access to GATE services and to avoid within-school segregation; and*
 - (iv) Require all GATE teachers to be gifted-endorsed or to be in the process of obtaining gifted endorsement.*

4. *Advanced Academic Courses (“AACs”)*

- a. *In developing the ALE Access and Recruitment Plan, the ALE Coordinator or designee shall use the results of the assessments and analyses as required by Section (V)(A)(2)(b) to:*
- (i) Increase the number and percentage of African American and Latino students, including ELL students, enrolled in AACs by improving identification, recruitment, and placement to ensure that students have access to AACs in a fair and nondiscriminatory manner;*
 - (ii) Increase the number of AAC offerings, as appropriate, to provide equal access and equitable opportunities for all students to participate in these courses, including expanding the number of AP courses offered at District high schools and the number of grades in which such courses are offered;*

⁴ This deadline to complete the Plan was extended by a December 2, 2013 Court order to January 29, 2014 pursuant to a revised timeline for completion of plans proposed by the Special Master. Due to ongoing efforts on development of this Plan (as well as others), the District requested the Special Master and counsel for plaintiffs to extend this date to March 3, 2014. This request has not yet been granted or denied.

- (iii) Improve the quality of Pre-AP and AP courses by making these courses subject to audit by the College Board; and (iv) Provide professional development to train all AAC teachers using appropriate training and curricula, such as that provided by the College Board; and*
- (iv) Provide professional development to train all AAC teachers using appropriate training and curricula, such as that provided by the College Board.*

5. University High School (“UHS”) Admissions and Retention

- a. By April 1, 2013, the District shall review and revise the process and procedures that it uses to select students for admission to UHS to ensure that multiple measures for admission are used and that all students have an equitable opportunity to enroll at University High School. In conducting this review, the District shall consult with an expert regarding the use of multiple measures (e.g., essays; characteristics of the student’s school; student’s background, including race, ethnicity and socioeconomic status) for admission to similar programs and shall review best practices used by other school districts in admitting students to similar programs. The District shall consult with the Plaintiffs and the Special Master during the drafting and prior to implementation of the revised admissions procedures. The District shall pilot these admissions procedures for transfer students seeking to enter UHS during the 2013-2014 school year and shall implement the amended procedures for all incoming students in the 2014-2015 school year.*
- b. The District shall administer the appropriate UHS admission test(s) for all 7th grade students. With a signed form from a parent, a student may opt out if they do not wish to compete for entrance to UHS. Before testing each year, the District shall send explanatory materials to 7th grade families to explain the purpose of the testing and requirements for enrolling at UHS. Such materials also shall be distributed through the Family Center(s) and made available on the District’s website.*
- c. The District shall require all counselors in all middle schools to review UHS admissions requirements with all students in 6th and the beginning of 7th grade and provide all students with application materials so that students may be aware of and prepare for the required tests in the spring of 7th grade and application in 8th grade; and*
- d. In addition to the outreach required by the ALE Access and Recruitment Plan, the District shall: conduct specific UHS-related outreach to students and parents about the program’s offerings; encourage school personnel, including counselors and teachers, through professional development, recognition, evaluation and other initiatives, to identify, recruit and encourage African American and Latino students, including ELL students, to apply; and provide assistance for African American and Latino students, including ELL students, to stay in and to be successful at UHS.*

OVERVIEW

USP

On July 1, 2013, the District hired Martha Taylor to serve as the Director of Advanced Learning Experiences (ALE). Her responsibilities include direction and oversight of all District Advanced Learning Experience programs and/or sites including gifted and talented education programs, advanced academic courses, our International Baccalaureate magnet schools, and University High School. Her prior experience in this area includes 15 years working in Gifted Education as both a teacher and administrator and six months working in ALE programs for TUSD. (*See her curriculum vitae, Appendix D.*)

The Unitary Status Plan (USP) directs the Director of Advanced Learning Experiences (ALE):

- 1) to review and assess the District's ALEs to determine what, if any, gaps in ALE access exist and what, if any, barriers there are for students at each school site to enroll in and successfully complete ALEs offered at each school site, and
- 2) to complete an Access and Recruitment Plan based on the findings of the initial review to assure equal access to ALEs by African American and Latino students, including ELL students, and to support their improved academic achievement in ALEs.

The USP identifies the three ALEs in TUSD:

- 1) the Gifted and Talented Education Program (GATE),
- 2) Advanced Academic Courses (AAC), and
- 3) University High School (UHS).

AACs are identified as Pre-Advanced Placement (referred to herein as "Honors" at the high school level, "Advanced" at the middle school level), and any middle school course offered for high school credit; Advanced Placement (AP) courses; Dual-Credit courses (courses offered for high school and college credit simultaneously); and International Baccalaureate (IB) courses.

ALE Review and Assessment

The ALE Review and Assessment was researched and written during the months of July through September of 2013 by Taylor and the ALE committee (completed by October 1, 2013), and was utilized as a basis for this Plan. To gather needed information, the District used several methods: 1) the District interviewed all high school, middle school, and K-8 principals regarding any perceived gaps and barriers at their schools; 2) the District interviewed all elementary school principals through email regarding any perceived gaps and barriers at their schools; and 3) the District collected data and analyzed existing District programs with the assistance of TUSD's

Desegregation Department. The recommendations discussed in detail in Section I below then were made based on information obtained and interpreted. .

Specific data collected and analyzed included ALE enrollment disaggregated by school, ethnicity and level (elementary, K-8, middle School and high school).⁵ In addition, for each elementary school, data was collected on that elementary school's participation in the following ALE programs: GATE, Pre-AP, HS Credit, AVID/IB/GATE cluster and total ALE programs. For each middle school, data was collected on that middle school's participation in the following ALE programs: GATE, Pre-AP, HS Credit and total ALE programs. For each high school, data was collected on that high school's participation in the following ALE programs: AP, GATE, Honors, Advanced, Dual-Credit, Dual-Language and total ALE programs.

ALE Access and Recruitment Plan

From July through December of 2013, the ALE committee and subcommittees met frequently to review data, analyze current District practices, and plan for more effective District practices in order to best provide access to and support in the District's ALEs for African American and Latino students, including ELL students. The subcommittee members were a combination of teachers, administrators, counselors, parents (UHS), and central office staff. (*See Appendix A*) The subcommittees included: Parent Complaint Process, Best Practices, Professional Development, GATE, Advanced Placement/Pre-AP, University High School (UHS), Dual Language, AVID, Algebra 1, and Recruitment. The Best Practices committee consulted with twelve experts through phone (11) and email (1) interviews. (*See Section VII, below*)

Based on this research and analysis, additional recommendations were made after October 1, 2013 that are in this Plan but were not in the initial ALE Review and Assessment.

Recommendations then were presented to 1) the ALE Committee and Subcommittees under the leadership of ALE Director Martha Taylor; 2) the Curriculum and Instruction Committee under the leadership of Assistant Superintendent Steve Holmes; and 3) the Business Leadership Team (BLT) and the Instructional Leadership Team (ILT) under the leadership of Deputy Superintendents Dr. Adrian Vega and Mr. Yousef Awaad. The recommendations in the plan are thus based on professional experience and judgment of school site administrators and staff, committee and subcommittee members, central District administrators, and the advice and guidance on best practices offered by the experts who were consulted.

Criteria

The USP identifies three broad areas that should be addressed in this plan, informing the plan's structure to address these three charges:

“the ALE Coordinator shall develop the ALE Access and Recruitment Plan, which shall include

⁵ Data was not disaggregated by grade level. Disaggregation reporting is not used where it would provide no meaningful information. The meaningfulness of disaggregation reporting depends on the number of data points (“N-size”) present in each disaggregated subgroup, or “cell.” Because disaggregating by grade level creates a very large report with a very small N-size (number of students in each disaggregation or cell), disaggregation based upon grade level would provide only meaningless data results.

- *strategies to identify and encourage African American and Latino students, including ELL students, to enroll in ALEs;*
- *to increase the number of African American and Latino students, including ELL students, enrolling in ALEs;*
- *and to support African American and Latino students, including ELL students, in successfully completing ALEs.” [V.A.2.c.][emphasis added]*⁶

The USP also requires that “practices in the District” [V.A.2.c.] be noted, and that requirement is also part of this plan’s structure, as noted in the “Current Practices” sections. Numerous other specific requirements for the individual ALEs also are required and these USP requirements are noted in this plan.

Implementation

The process for implementation of some of these recommendations began in the current school year (SY) of 2013-14; the remaining recommendations will be implemented over the next three year and evaluated yearly in an annual review. In addition, the ALE Department will continue to research best practices, seek resources, provide training, and recommend remedies to any current or newly identified barriers to full access to ALEs for African American and Latino students, including ELL students, and to support the improved academic achievement of these students.

DEFINITIONS

Unitary Status Plan (USP)	The USP is a (federal) court-mandated plan to guide TUSD in its efforts to achieve “unitary status” by eliminating the vestiges of the prior “dual” or segregated system to the extent practicable.
Parties and Special Master	The USP stems from a federal school desegregation court case called <i>Fisher-Mendoza v. TUSD</i> . The parties to the case include TUSD, two plaintiffs groups representing African American and Latino students respectively, and the United States of America, represented by the Department of Justice. There is a court-appointed “Special Master” who oversees implementation, including monitoring and reporting, on behalf of the federal court.
Advanced Learning Experiences (ALEs)	USP Section V(A) identifies TUSD’s ALEs as the GATE Program, Advanced Academic Courses (AP, Pre-AP, Dual-Credit, International Baccalaureate program [IB]), and University High School (UHS). The TUSD School Board added its Dual-Language program as an additional ALE. These are areas where there has been historically low African American and Latino student participation in comparison to the percentages of the TUSD as a whole.
Advanced Placement (AP)	AP classes are those that follow the proscribed AP curriculum from the College Board and are usually taught by a teacher who has had AP training. Students who take an AP class have the option of taking an end-of-year AP exam. If a student earns a three, four or five on this exam, most colleges and universities

⁶ References to other parts of the Plan are in parenthesis “()”. References to the USP are in brackets “[]”.

	will award college credit for that course. Per the College Board recommendation, all AP classes should be open to all students with no entrance requirements.
Advanced Academic Courses (AAC)	AACs are courses labeled Pre-AP (Advanced, Honors), Advanced Placement (AP), dual-credit, middle school courses for high school credit, and International Baccalaureate (IB) courses. They offer an enriched and/or accelerated academic curriculum.
Advancement Through Individual Determination (AVID)	AVID is an international program that is highly effective in providing academic support for underrepresented students with a college-preparatory focus.
Dual-Credit	Dual-Credit courses are those that offer students both high school and college credit when they successfully complete all requirements and are taught by a college-level instructor. The District's current partner institutions are Pima Community College and the University of Arizona.
Dual-Language	Students in this program develop the ability to speak, read, and write in English and Spanish. Instruction in core curriculum is provided by a bilingual education endorsed teacher, and all subjects are taught in English and in Spanish. The instruction includes: English Language Development (ELD) instruction for English Language Learners (ELLs); and Spanish as a Second Language (SSL) for English speakers. This program is offered at several elementary and K-8 schools as well as Pueblo High School. The self-contained GATE program includes a dual language component.
Gifted and Talented Education (GATE)	GATE classes are those being taught by a GATE endorsed teacher. They provide enrolled students with an enriched and accelerated academic curriculum and are taught using gifted strategies. The District offered five different types of GATE services, including a dual-language self-contained strand.
International Baccalaureate Programme (IB)	The IB is comprised of three separate programs in TUSD: the Primary Years Programme (PYP) at Robison ES and Safford K-8; the Middle Years Programme (MYP) currently at Safford K-8 and projected for Cholla HMS; and the Diploma Programme (DP) at Cholla HMS. Students who participate in the International Baccalaureate Diploma Program (IBDP) in their junior and senior years can earn the IB Diploma and university credits. Freshman and sophomore students at Cholla can take IB Prep courses to prepare them for the Diploma Programme.
Multi-Cultural Curriculum	Multi-Cultural Curriculum refers to District courses which integrate racially and ethnically diverse perspectives and experiences. The multicultural curriculum shall provide students with a range of opportunities to conduct research and improve critical thinking and learning skills, create a positive and inclusive

	climate in classes and schools that builds respect and understanding among students from different racial and ethnic backgrounds, and promote and develop a sense of civic responsibility among all students.
University High School (UHS)	UHS is an “exam school” in that students must apply and take an admissions exam in order to be considered for placement. The school offers a rigorous academic curriculum along with many support programs so students can successfully complete its course of study. UHS is a highly-ranked college-preparatory high school and is proud that virtually all of its students successfully graduate and are accepted at a four-year college or university.

EXECUTIVE SUMMARY

This Plan includes the following preliminary sections: USP Language; Overview; Definitions; and Executive Summary. The Plan includes the following main sections: (I) Findings and Recommendations of the ALE Review and Assessment; (II) Annual Goals and Progress Monitoring; (III) Student Identification and Recruitment; (IV) Increase Student Enrollment; (V) Student Support Strategies for Successful ALE Completion; (VI) Professional Development; and (VII) Best Practices: Consultation With Experts. Sections III, IV, and V, which address the three required areas outlined by the USP, each contain three subsections representing the District’s three ALEs (GATE, AACs, UHS), and include both Current Practices and Recommendations for Change for each ALE. Additionally, Section III includes information on Accessible Materials, and Section V includes information on Parent Outreach and a Parent Complaint Process.

Table of Contents

I. FINDINGS AND RECOMMENDATIONS OF THE ALE REVIEW AND ASSESSMENT	12
A. To increase ALE opportunities at District elementary and middle schools:	12
B. To increase the number of AP, AACs and dual-credit courses offered at District high schools:	12
C. To increase funding formulas for GATE FTEs:	12
D. To increase AAC participation:.....	12
E. To improve teacher training and preparation:	12
F. To support student academic preparation:	13
G. Parent outreach and Education:	13
II. ANNUAL GOALS AND PROGRESS MONITORING	13
A. GATE.....	14
B. AAC.....	14
C. UHS.....	15
III. STUDENT IDENTIFICATION AND RECRUITMENT	15
A. GATE.....	15
B. AAC (Pre-AP, AP, Dual-Credit, IB).....	18
C. University High School (UHS)	20
D. Accessible Materials for Recruitment into ALEs	22
IV. INCREASE STUDENT ENROLLMENT	23
A. GATE.....	23
B. AAC (Pre-AP, AP, Dual-Credit, IB).....	26
C. University High School (UHS)	28
V. STUDENT SUPPORT STRATEGIES FOR SUCCESSFUL ALE COMPLETION	28
A. GATE.....	28
B. AAC (Pre-AP, AP, Dual-Credit, IB).....	29
C. University High School (UHS)	31
D. Parent Outreach.....	32
E. Parent Complaint Process	33
VI. PROFESSIONAL DEVELOPMENT (for Spring 2014 and 2014-15 SY)	33
A. TUSD.....	34
B. College Board	34

- C. Phoenix Desert Institute (College Board approved) 34
- VII. BEST PRACTICES: CONSULTATION WITH EXPERTS 34**
 - A. Gifted education and underrepresented students 35
 - B. Advanced Placement 35
 - C. Detracking 35
 - D. Equity in Education 36

I. FINDINGS AND RECOMMENDATIONS OF THE ALE REVIEW AND ASSESSMENT

“[T]he ALE Coordinator shall complete an assessment of existing ALE programs, resources, and practices in the District and by school site, which shall include strategies to identify and encourage African American and Latino students, including ELL students, to enroll in ALEs; to increase the number of African American and Latino students, including ELL students, enrolling in ALEs; and to support African American and Latino students, including ELL students, in successfully completing ALEs. ...”. [V.A.2.b.][emphasis added]

The following findings and recommendations were completed by October 1, 2013, as part of the ALE Review and Assessment. These recommendations are contained in the main body of this plan, along with other additional recommendations.

A. To increase ALE opportunities at District elementary and middle schools:

1. Increase AACs offered in middle schools that currently have few or none with particular attention paid to K-8 schools.
2. Implement Algebra 1 for high school credit at all District middle and K-8 schools.
3. Review testing and admission procedures for 1-5 GATE services.

B. To increase the number of AP, AACs and dual-credit courses offered at District high schools:

1. Reduce the disparity in number of AP courses offered at the high school level.
2. Create and implement AP Support Program at District high schools for AP recruitment and support of African American and Latino students, including ELL students, who enroll in these classes. This plan would include positive support structures, including an AP Coordinator, for these students to successfully enroll in and complete these classes.

C. To increase funding formulas for GATE FTEs:

1. Increase GATE funding for K-8 schools.

D. To increase AAC participation:

1. Eliminate entrance requirements for any Pre-AP/AP class at either the middle or high school level, although district-wide recommendations can be used.

E. To improve teacher training and preparation:

1. Provide District-wide professional development on relevant topics including teaching strategies for AACs; content area expertise; recognizing and eliminating unconscious teacher bias; recognizing and eliminating classroom culture of low expectations and the resultant lack of rigor; identification of highly capable students; culturally responsive teaching practices; teaching strategies that are inclusive of the African American and Latino experience; College Board test preparation and use of data to support student achievement of African American and Latino students.

F. To support student academic preparation:

1. Increase number of teachers highly-qualified to teach math (Algebra 1) by providing incentives for earning highly-qualified math endorsement.
2. Increase number of GATE endorsed teachers by providing free summer training.
3. Enforce certification requirements for all teachers in self-contained gifted programs, including Gifted Dual Language program.
4. Expand the AVID program and hire an AVID Coordinator to assist the ALE Director in this expansion.
5. Work with Transportation to provide: transportation to schools with AAC options that students request; after-school activity busses for schools that provide enrichment and/or support classes for students who enroll in AACs.

G. Parent outreach and Education:

1. Provide parent outreach and education through partnerships with school and community organizations to inform parents of the benefits of ALEs and to encourage their support of students' participation.

II. ANNUAL GOALS AND PROGRESS MONITORING

The ALE Coordinator shall have responsibility for: ... developing annual goals, in collaboration with relevant staff, for progress to be made in improving access for African American and Latino students, including ELL students, to all ALE programs. These goals shall be shared with the Plaintiffs and the Special Master and shall be used by the District to evaluate effectiveness.
[V.A.2.a][emphasis added]

In creating annual goals for progress monitoring, the District has used the “20% Rule”, which was presented by Donna Ford, Ph.D. of Vanderbilt University to the United States District Court For The Northern District Of Illinois Eastern Division in *Mcfadden v. Board of Education for Illinois School District U-16*. Dr. Ford further explains the rule and how it should be used in districts working to eliminate discrimination in her book, *Recruiting and Retaining Culturally Different Students in Gifted Education* (2013).

In that book, Dr. Ford offers a relatively simple rule for identifying discrimination in the data. According to her, discrimination may be occurring if any subgroup has a participation rate in something deemed desirable (like ALEs) that is 20% less than their enrollment rate in the district. “For example, if Black students are 10% of a school district, then they should be at least 8% of ALEs... If Hispanic students are 40% of a school district, then they should be at least 32% of ALEs.” Thus, goals in this plan will be designed to increase all minority subgroup to a <20% threshold within five years, using SY 2012-13 as the baseline year for both White and minority subgroups.

A. GATE

The District's goal is to increase the number of students receiving GATE services for all five GATE areas combined (Primary Push-In, Intermediate Pull-Out, Clustering, Resource, and Self-Contained). Specifically, the District's goal is to increase participation rates for African-American students by 0.19 percent each year and Latino students by 0.29 percent a year. These goals will be evaluated and adjusted annually based on the SY 2013-14 data.

Gifted And Talented Education (GATE)						
Year	White	African American	Hispanic	Native American	Asian Pacific American	Multi Racial
Yearly Increase Goal*		+0.19%	+0.29%			
2012-13 Enrollment	23.8%	5.8%	61.8%	3.9%	2.4%	2.8%
DFGoal (2017-18)	**	4.64%	49.44%	**	**	**
2012-13	38.0%	3.7%	48.0%	2.2%	3.1%	5.0%
2013-14		3.89%	48.29%			
2014-15		4.03%	48.58%			
2015-16		4.21%	48.86%			
2016-17		4.43%	49.15%			
2017-18		4.64%	49.44%			

*Based on increasing minority representation to achieve goal.

**Not computed for these subgroups for this year

B. AAC

The District's goal is to increase the number of students enrolled in AACs. Specifically, the goal is to increase participation rates for African-American students by .09 percent each year. This goal will be evaluated and adjusted annually based on the SY 2013-14 data.

Advanced Academic Courses (AAC)						
Year	White	African American	Hispanic	Native American	Asian Pacific American	Multi Racial
Yearly Increase Goal*		+.09%	**			
2012-13 6-12 Enrollment	25.2%	6.2%	59.6%	3.7%	2.8%	2.4%
DF Goal (2017-18)	**	4.96%	47.68%	**	**	**
2012-13	30.5%	4.5%	56.2%	2.6%	3.7%	2.5%
2013-14	**	4.59%	**	**	**	**
2014-15	**	4.68%	**	**	**	**

2015-16	**	4.78%	**	**	**	**
2016-17	**	4.87%	**	**	**	**
2017-18	**	4.96%	56.2%	**	**	**

*Based on increasing minority representation to achieve goal.

**Not computed for these subgroups for this year

C. UHS

Notice that Dr. Ford's formula is not used for UHS, because the UHS percentages reported are not percentages of the District enrollment, but percentage of UHS enrollment (this is because a large number of UHS students are not drawn from District enrollment, making this an invalid statistic). Because White students already comprise greater than 50% of UHS enrollment, we cannot set goals that all the other subgroups will raise to 40% or better of total UHS enrollment as all of the percentages must add up to 100%. Accordingly, the goal is to increase UHS enrollment for African-American students by 1 percentage point each year, and Latino students by 2 percentage points each year. These goals will be evaluated and adjusted annually based on the SY 2013-14 data.

III. STUDENT IDENTIFICATION AND RECRUITMENT

Strategies to identify and encourage African American and Latino students, including ELL students, to enroll in ALEs. [V.A.2.c.][emphasis added]

A. GATE

1. Current GATE Services and Assessments: Five types of GATE services are currently offered in TUSD, each with its own method of student assessment. (*See Appendix B.*)
 - a. Current TUSD GATE Services
 - 1) GATE Self-Contained: This service currently is offered at five elementary schools and three middle schools in first through eighth grades. It provides instruction in all core academic subjects from a GATE endorsed teacher; all students are placed in this program based on assessment scores.
 - 2) GATE Self-Contained Dual-Language: This service currently is offered at Hollinger K-8 in first through fifth grades, and at Pistor Middle School in sixth through eighth grades. Instruction is provided in both English and Spanish with the ultimate of goal of student fluency in both languages. The program at Hollinger is open to all students in TUSD regardless of feeder pattern; the Pistor program is offered to those students who are in the Pistor GATE feeder pattern.
 - 3) GATE Itinerant Pull-Out: These pull-out services are offered at all elementary and K-8 schools for first through fifth grades. Identified students are “pulled” from their regular class and meet with other identified students and a

GATE endorsed teacher to receive weekly services in sessions that range from 45 to 60 minutes.

- 4) GATE Resource: These services, for students in sixth through twelfth grades, provide a GATE class that can be either a core content area class or an enrichment class. At the high school level, most schools offer a Freshman Humanities course and a few high schools offer a GATE course at Sophomore through Senior levels. The majority of students in these classes, at both the middle and high school level, are placed based upon a combination of grades, AIMS, benchmarks scores and teacher recommendations, rather than test scores.
- 5) GATE Cluster Program: This program was established in 2011-2012 SY and is currently offered at twelve elementary and two K-8 schools for students in first through fifth grades. The model requires a GATE-endorsed teacher at each grade level and the students in each class are a mixture of traditional education students and GATE-Identified students. The GATE students also receive pull-out GATE services of up to three hours per week.

b. Current TUSD GATE Assessments

- 1) Otis Lennon School Ability Test (OLSAT): This assessment is used with kindergarten students for first grade placement.
- 2) Cognitive Abilities Test (CogAT): This assessment is used with students in first through eighth grades.
- 3) Raven: This non-verbal assessment is used with students in first through seventh grades.

2. Current GATE Identification and Recruitment Strategies

a. In the 2013-14 SY, the following recruitment strategies were implemented (all printed and web materials are available in English and Spanish):

- 1) The GATE office sent a postcard to all students in TUSD (except those already enrolled in a GATE program) inviting them to take the test for GATE placement. (*See Appendix C.*)
- 2) The GATE office met and collaborated with all Learning Support Coordinators (LSC) to enlist their help with recruitment at sites.
- 3) LSCs and GATE itinerant teachers provided support for site recruitment efforts.
- 4) The GATE office met with LSCs regarding recruitment information and dissemination.
- 5) Posters with information about GATE testing were sent to all schools and posted on District web sites.

- 6) The GATE Coordinator sent informational e-mails to principals regarding recruitment for GATE testing.
 - 7) African American Student Services (AASS) and Mexican American Student Services (MASS) contacted parents of students eligible to participate in GATE programs to encourage enrollment.
3. Recommendations for GATE Identification (over three school years)
- Increase the number and percentage of African American and Latino students, including ELL students, receiving GATE services by improving screening procedures for GATE services and placement in GATE services to ensure that students are identified, tested, and provided with GATE services in a fair and nondiscriminatory manner that does not have an adverse impact on any student based on his/her race, ethnicity or English language proficiency.*
- [V.A.3.a.i.][emphasis added]
- a. Modify Assessments Used
 - 1) Eliminate use of the OLSAT.
 - 2) Require the CogAT 7 as the only acceptable version of the CogAT.
 - 3) Designate, after further study, a new non-verbal assessment, other than the RAVEN, to potentially identify more African American and Latino students, including ELL students.
 - 4) Self-Contained and Itinerant Pull-Out Services.
 - Study and possibly implement use of multiple measures, including the use of nontraditional student qualifying criteria and/or non-cognitive measures, in addition to verbal and non-verbal cognitive assessments.
 - 5) Self-Contained Dual-Language
 - Conduct a pilot with ELL students of Spanish language tests for giftedness including: Hispanic Bilingual Gifted Screening Instrument – (HBGSI), CogAt 7-Spanish, and/or the Differentiated Observation Scale (DOS).
 - Select and implement the most effective gifted assessments for Spanish-speaking ELL students
4. Recommendations for GATE Recruitment (over three school years)
- a. Continue use of GATE postcard sent to all TUSD students (except those already enrolled in a self-contained GATE program) inviting recipients to take the GATE placement assessments.
 - b. Designate a contact person for all GATE recruitment information.

- c. Implement a series of workshops for designated staff on GATE identification, recruitment, placement and retention.
- d. Request that schools duplicate the information flyer on GATE testing for each child at the school and send it home with students (as a second tier effort beyond the postcard).
- e. Request that principals include recruitment information from the GATE office in their newsletters home.

B. AAC (Pre-AP, AP, Dual-Credit, IB)

1. Current AAC Identification and Recruitment Strategies
 - a. AAC
 - 1) Different identification policies for recruitment and enrollment/placement are in effect at District middle and high schools for AACs. Some schools use identification methods including course grades, state-standardized scores, benchmark testing, and teacher recommendations. Other schools allow student or parent choice for placement.
 - 2) A mailing is sent to all TUSD eighth grade students with full information about the District's various ALEs.
 - 3) Schools hold elective fairs at their sites to promote and recruit students for various courses, including AACs.
 - 4) Individual teachers promote their own individual AACs through classroom visits and promotional activities.
 - b. Pre-AP
 - 1) These courses are currently offered at the middle and high school level under the designations of Honors, Advanced, Accelerated, and Pre-AP.
 - 2) Students are placed in these classes based on a combination of benchmark tests, AIMS, grades, and teacher recommendation as determined by each site.
 - c. Advanced Placement (AP)
 - 1) Counselors sometimes use AP Potential List to identify possible enrollees for AP courses.
 - 2) Counselors sometimes use Student Interest Inventories (e.g. ACT Potential, True Colors, ECAP) to determine student interest and aptitude for appropriate course sequencing.

d. International Baccalaureate

- 1) At Cholla High School the IB program is open to any interested student.
- 2) At Cholla High School all incoming 8th grade students identified by the District as having ALE potential were placed in IB courses.
- 3) At Robison K-5 and Safford K-8, all enrolled students are part of the IB program and follow its curriculum. In addition, at Safford K-8 there is an Advanced track within the 6-8 IB curriculum. At Cholla High Magnet, IB classes are open to any interested students. All three schools actively recruit for their school magnet programs.
- 4) IB on-site visits are conducted at middle and K-8 schools to inform all students about the IB option in the District. In addition, community events and parent nights are conducted throughout the District. (*See Appendix F.*)
- 5) All entering Cholla freshmen students are given information about the IB Program during the school's June Freshman Academy.

e. Dual Credit

- 1) Dual Credit courses are open to any student who fulfills the entrance requirements of the institute offering the college credit. However, dual credit courses are not offered at every District high school, and recruitment efforts at District schools vary by site.

2. Recommendations for AAC Identification and Recruitment (over three school years)

Increase the number and percentage of African American and Latino students, including ELL students, enrolled in AACs by improving identification, recruitment, and placement to ensure that students have access to AACs in a fair and nondiscriminatory manner; [V.A.4.a.i.][emphasis added]

a. AAC - General recommendations for all AACs

- 1) Provide professional development for designated staff regarding identification of students for AACs including issues of equity, cultural relevance, and the value of AACs for all students.
- 2) Discuss the open access philosophy with current and prospective AAC teachers. Ensure that all AAC teachers in these courses support this policy and support success for all students. Consider adapting the teacher agreement from Advanced Kentucky to use with administrators and AAC teachers. (*See Appendix G.*)
- 3) Distribute new AAC recruitment flyers created for interested students and parents, specifically targeting African American and Latino students, including ELL students. (*See Appendix H.*)

- b. Pre-Advanced Placement (Pre-AP)
 - 1) Require middle and high schools to promote TUSD's commitment to open access for Advanced and Honors courses through school assemblies, registration fairs, and/or classroom visits.
 - 2) Distribute new AAC recruitment flyers created for interested students and parents. *(See Appendix H.)*
- 3) c. Advanced Placement (AP)
 - 1) Require high schools to promote the College Board and TUSD commitment to open access for AP courses through school assemblies, registration fairs, and/or classroom visits.
 - 2) Distribute new AP recruitment flyers created for interested students and parents. *(See Appendix I.)*
- c. International Baccalaureate (IB)
 - 1) Increase IB education efforts at the school, District and community level regarding the continuum of IB programs available in TUSD and its open access policy for all students.
 - 2) Increase IB education and outreach efforts at Cholla High School by increased information sessions at registration and through classroom visits.
 - 3) Increase effectiveness of IB partnerships with the District's Departments of Equity, Culturally Relevant Pedagogy and Instruction and Multicultural Curriculum.
 - 4) Distribute new IB recruitment flyers created for interested students and parents. *(See Appendix J.)*
- d. Dual Credit
 - 1) Require all District high schools to actively advertise and recruit students for Dual-Credit courses.

C. University High School (UHS)

- 1. Current UHS Identification and Recruitment Strategies
 - a. UHS Identification
 - 1) The identification of students is addressed in the UHS Admissions Plan. *(See Appendices S, T, U.)*
 - b. UHS Recruitment
 - 1) Student-Parent Informational meetings are held throughout the District. *(See Appendix K.)*

- 2) An eighth grade mailing is sent to all TUSD families about the District's ALEs with inserts of specific UHS admissions information.
- 3) Annual visits to various TUSD middle schools are conducted by the school's LSC to educate students about the admission process and requirements with a focus on sixth and seventh grade students.
- 4) Site visits are conducted by the school's LSC to all TUSD middle schools and various non-TUSD schools.
- 5) Information session and training on admissions is held at LSC/Counselor Breakfast and all middle schools counselors and LSCs are invited to attend.
- 6) An annual Multicultural Breakfast is held; Multicultural Student Services and the UHS LSC provide information about the District support services and increasingly diverse community at UHS.
- 7) Campus tours for potential students and parents are provided.
- 8) A Freshman Orientation Night is held for all students qualified and invited to attend UHS in order to expose students to the school and its offerings and to recruit students who have not yet accepted the invitation for admission.
- 9) Recruitment follow-up with qualified candidates through personal contact is conducted with targeted efforts for African American and Latino students who have qualified and not accepted admission.

2. Recommended Additional UHS Identification and Recruitment Strategies (over three school years)

The District shall: conduct specific UHS-related outreach to students and parents about the program's offerings; encourage school personnel, including counselors and teachers, through professional development, recognition, evaluation and other initiatives, to identify, recruit and encourage African American and Latino students, including ELL students, to apply; [V.A.5.d.][emphasis added]

a. Identification

- 1) Test every seventh grader in TUSD, beginning in the Spring of 2014, on the CogAT 7 to identify students with potential for UHS admission.
- 2) Conduct specific outreach in eighth grade to those students identified through the seventh grade CogAT testing. This outreach shall include sending explanatory materials before testing each year to seventh grade families to explain the purpose of the testing and requirements for enrolling at UHS. Such materials also shall be distributed through the Family Center(s) and made available on the District's website
- 3) Require counselors in all middle schools to review UHS admissions requirements with all students in sixth and the beginning of seventh grade and provide all students with application materials so that students may be aware

of and prepare for the required tests in the spring of seventh grade and application in eighth grade.

- b. Recruitment
 - 1) Require all designated staff to attend the annual information session and training on Admissions at the UHS Information Breakfast and the annual Multicultural Breakfast.
 - 2) Target outreach to African American and Latino students, including ELL students, through interest-based mentorship programs with community professionals.
 - 3) Write Parent Handbook for middle school families to provide strategies to support student enrollment in ALEs, including UHS.
 - 4) Hold workshops or present at district monthly meetings about the UHS admissions and identification process.

D. Accessible Materials for Recruitment into ALEs

- 1. Current Accessible Materials for ALEs - created in 2013-20154 SY
 - a. ALE brochure in English and Spanish describing all the TUSD options and distributing District-wide. *(See Appendix L.)*
 - b. ALE flyers for students encouraging them to take ALEs (AP, AAC, IB). *(See Appendices H, I, J.)*
 - c. ALE flyer for parents explaining their role in supporting their students who are interested in enrolling in ALEs. *(See Appendix M.)*
 - d. Updated District ALE website
 - e. Updated High School Course Catalog
- 2. Recommendations for Accessible Materials for ALEs (over three school years)
Developing accessible materials (e.g., informational booklets and DVDs, web pages, mailers) describing the District's ALE offerings by content, structure, requirements, and location; [V.A.2.d.i.][emphasis added]

Coordinating with the relevant administrator(s) at the Family Center(s) and in the District Office to distribute such materials to parents; [V.A.2.d.ii.][emphasis added]

- a. Create ALE Policy Manual outlining policies for student participation and retention in TUSD's ALEs.
- b. Coordinate with School Community Services, African American Student Services, Mexican American Student Services, and Language Acquisition Department to distribute newly-created materials and to include information about District ALEs in their outreach efforts.

IV. INCREASE STUDENT ENROLLMENT

Strategies to . . . increase the number of African American and Latino students, including ELL students, enrolling in ALEs. [V.A.2.c.][emphasis added]

A. GATE

1. Current Strategies to Increase Enrollment
 - a. GATE recruitment mailing sent to all TUSD students giving information about TUSD GATE programs and encouraging all students to take the GATE assessment.
 - b. Individual recruitment information sent to identified students from African American Students Services (AASS) and Mexican American Student Services (MASS).
 - c. Personal outreach to identified students made by African American Students Services (AASS) and Mexican American Student Services (MASS).
 - d. School-wide and personal outreach at school sites encouraging enrollment in AACs.
 - e. Use of non-verbal assessment (RAVEN)
2. Recommendations to increase the number and availability of GATE services (over three school years)

Increase the number and quality of GATE offerings, as appropriate, to provide equal access and equitable opportunities for all students, including assessing the feasibility of adding or expanding GATE dual language programs; [V.A.3.a.ii.] Assess whether the implementation of GATE services at school sites (e.g., self-contained, pull-out, clustering, or resource-driven models) should be modified to increase access to GATE services and to avoid within-school segregation; [V.A.3.a. iii.]

- a. Provide itinerant GATE services for sixth through eighth grade students in K-8 schools.
- b. Offer at all high schools one freshman and one sophomore-level GATE course.
- c. Study for possible implementation: Kindergarten Push-In Itinerant Services:
 - 1) Expand GATE services to include all kindergarten students.
 - 2) Provide thirty minute weekly lesson from a gifted endorsed teacher stressing critical thinking, creative thinking, and problem-solving skills.
- d. Study for possible implementation: Primary Push-In Itinerant Services:
 - 1) Provide services to all students in first grade except those in self-contained GATE.
 - 2) Provide forty-five minute weekly lesson from a gifted endorsed teacher stressing critical thinking, creative thinking, and problem-solving skills.
- e. GATE Resource (sixth through eighth grades)
 - 1) Provide an enrichment GATE class at every middle and K-8 school. (*See Appendix E.*)
 - 2) Provide a gifted endorsed teacher who will implement a curriculum based on critical thinking, creative thinking, and problem-solving skills.
 - 3) Utilize placement criteria based on grades, AIMS, benchmark testing, teacher recommendation, and/or GATE testing scores.
- f. GATE Dual-Language
 - 1) Increase number of students at the Hollinger K-8 GATE Dual-Language Program by implementing the following:
 - Change assessments and qualifying criteria for Spanish-Speaking ELL students.
 - Create and implement effective marketing strategies at the school and District level by doing the following: a) school communicates and collaborates with designated staff to disseminate flyers and brochures with information about the Dual-Language GATE program; and b) the District revises GATE placement letter to include information about dual-language program options.
 - Use Pueblo Warrior Radio for a Public Service Announcement regarding dual-language GATE program.
 - Discuss with Transportation the possibility of implementation of an Express bus to decrease student travel time to dual-language schools.

- 2) Open the Pistor Dual-Language GATE program to students from across the District, regardless of the GATE feeder pattern. Any student requesting this placement must meet the minimum requirements for the District's Two Way Dual Language Entrance Criteria (TWDL).
3. Recommendations to increase the quality of GATE services (over three school years)
 - a. Require that all teachers assigned to a GATE classroom have a gifted endorsement (provisional or permanent).
 - b. Provide thirty hours of professional development in gifted strategies through a free GATE Summer Institute for teachers annually.
 - c. Provide professional development for GATE itinerant teachers on embedding critical thinking, creative thinking and problem-solving skills in their curriculum.
 - 1) Collaborate with the Multi-Cultural Department to incorporate culturally sensitive materials and strategies into the GATE itinerant curriculum.
 - 2) Write gifted curriculum and lessons based on Arizona Standards for College and Career Readiness kindergarten standards.
 - d. Provide professional development on strategies outlined in *Infusing the Teaching of Critical and Creative Thinking into Content instruction; A Lesson Design Handbook for Elementary Grades*. Review for effectiveness and implement modifications as necessary.
 - e. Provide professional development on culturally relevant teaching practices and multi-cultural education (see Section XII in this plan).
 - f. Provide support and time for horizontal and vertical articulation among GATE teachers across the District, particularly at transition grade-levels (fifth to sixth and eighth to ninth grades).
 - g. Update the GATE Teacher Handbook to provide accurate and timely information to GATE teachers.
 - h. Provide financial assistance, through the Language Acquisition Department based on budget availability, to teachers willing to complete GATE and Bilingual endorsements.

B. AAC (Pre-AP, AP, Dual-Credit, IB)

1. Current AACs
 - a. High schools and middle schools increase or reduce their number of AACs based on student interest and enrollment.
 - b. Schools attempt to increase AACs by hiring procedures that identify highly-qualified teachers in the areas needed for course expansion.
 - c. Over the last three years, the number of sections of IB courses has increased and thus the number of seats available.
 - d. All middle schools (6-8) offer Algebra 1 for high school credit. However, only three of fourteen of the District's K-8 schools offer this course, which is a gateway course into AACs in high school and which also affects college enrollment and completion.
2. Recommendations to Increase AAC Offerings (over three school years)

Increase the number of AAC offerings, as appropriate, to provide equal access and equitable opportunities for all students to participate in these courses, including expanding the number of AP courses offered at District high schools and the number of grades in which such courses are offered; [V.A.4.a.ii.][emphasis added]

 - a. AAC - General recommendations for all AACs
 - 1) Open all AAC classes to any interested student at both the middle and high school levels. Teachers/administrators may utilize AAC Student Guidelines to discuss placement with an interested student or parent.
 - 2) Work to equalize access to technology at District middle and high schools.
 - 3) Increase number of teachers highly-qualified to teach math by providing incentives for earning highly-qualified math endorsement.
 - 4) Increase effectiveness of partnerships with the District's Departments of Equity, Culturally Relevant Pedagogy and Instruction and Multicultural Curriculum.
 - b. Pre-AP (Advanced, Honors)
 - 1) Eliminate in the District High School Course Catalog all Honors course prerequisites unless it is a content requirement (Algebra 1 before Honors Algebra 2).
 - 2) Offer an "Advanced" class in language arts and math in sixth through eighth grades.

- c. Algebra 1
 - 1) Provide an Algebra 1 class for all qualified eighth grade students.
 - 2) Work with the University of Arizona to recruit and retain mathematics teachers through collaboration with its SAINT program (Southern AZ Inducting New Teachers (SAINT)), a program that recruits college graduates and mid-career professionals to teach in high-needs schools.
 - d. Advanced Placement (AP)
 - 1) Expand the number of AP courses offered at the high school level, focusing on AP courses that are high-interest for African American and Latino students, including ELL students. Initially, all high schools will offer Spanish Lang & Culture, World History, English Language (first course), and Biology. Subsequently, all high schools will also offer Spanish Literature, English Literature (second course), Psychology, Human Geography, U.S. History and Studio Art.
 - 2) Eliminate in the District High School Course Catalog all AP course prerequisites unless it is a content requirement (Calculus AB prior to Calculus BC).
 - 3) Provide professional development to designated staff to consistently and more effectively use the AP Potential list for student recruitment.
 - e. Dual Credit
 - 1) Work towards all high schools being able to offer at least one dual-credit course in a core academic area.
3. Recommendations to increase the quality of instruction in AAC classes (over three school years)
- a. Provide a free Summer Institute for teachers assigned to teach an English/Language Arts or math Advanced or Honors class at the middle school or high school level in order to provide training and strategies for teaching an accelerated curriculum, including issues related to culturally relevant and/or multi-cultural curriculum.
 - b. Require all teachers to attend a College Board approved AP training (e.g. Summer Institute) in the AP course being taught within three years of teaching the class.
 - c. Work towards implementing the IB Middle Years Program (MYP) for ninth and tenth grades at Cholla High School.
 - d. Explore the possibility of writing curriculum or incorporating elements of the Culturally Relevant Curriculum and/or the Multi-Cultural Curriculum into IB, Honors, and/or Advanced courses.

C. University High School (UHS)

The admission of students is also addressed in the UHS Admissions Plan. (*See Appendix S for the UHS Admissions Plan developed by the District, see Appendix T for development of the District's UHS Admissions Plan.*) The District's UHS Admissions plan is not currently in effect. The Special Master did not approve the District's UHS Admissions Plan and proposed his own alternative plan for UHS admissions. A final determination of whether the District's plan or the Special Master's plan will be implemented is the subject a pending appeal filed by the District defending the District's UHS Admissions Plan. There is a Court-ordered interim UHS Admissions Plan in effect pending the outcome of the appeal that is applicable to the 2014-2015 school year. (*See Appendix U.*)

1. Current UHS Enrollment

- a. Pilot non-cognitive short-answer questions as part of the admissions process for the 2014-2015 freshman class.

2. Recommendations for Future UHS Enrollment (over three school years)

The District shall review and revise the process and procedures that it uses to select students for admission to UHS to ensure that multiple measures for admission are used and that all students have an equitable opportunity to enroll at University High School. [V.A.5.a.][emphasis added]

- a. Pilot a motivation assessment with current 8th graders in the spring of 2014 for possible implementation in admissions for the 2015-16 SY.
- b. Analyze results of short-answer essay question process piloted in January of 2014. Continue use of these questions if it is determined that the process was successful in identifying more qualified African American and Latino students, including ELL students, for UHS admission.
- c. If necessary, based on the results of the evaluation of the short answer essay question process, the District will investigate use of other alternative non-cognitive identifiers for possible additions to the UHS admissions process.

V. STUDENT SUPPORT STRATEGIES FOR SUCCESSFUL ALE COMPLETION
Strategies to . . . support African American and Latino students, including ELL students, in successfully completing ALEs. [V.A.2.c.][emphasis added]

A. GATE

1. Current GATE Support Strategies

- a. Summer Enrichment Programs are held at various sites for students new to middle school GATE focusing on math, language arts and organizational skill-building through enrichment projects.
 - b. Shadow Visits are held that allow students to experience and enjoy a day at elementary and middle school self-contained GATE programs.
 - c. “Buddy” students are assigned to students new to self-contained GATE to help them adjust to the new GATE environment.
 - d. A GATE Core Enrichment class for academic support and enrichment activities is provided at various sites.
 - e. Tutoring support before and after school is provided by teachers at various sites.
 - f. Tutoring support is available through Language Acquisition for Spanish-Speaking ELL GATE students.
 - g. In-class ELD instruction is provided for Spanish-Speaking ELL GATE students by Language Acquisition.
2. Recommendations for Additional GATE Support Strategies (over three school years)
 - a. Adopt all of the above “Current” practices at all schools that provide GATE services.
 - b. Provide quarterly parent education program by the GATE and Language Acquisition Departments on social/emotional/academic needs of students in a gifted program.
 - c. Assign teacher mentor at each self-contained site to work with any African American or Latino student based on parent, student or teacher request. Mentors should ideally also be African American and/or Latino.
 - d. Implement instructional resources and supplemental materials appropriate for Dual-Language GATE classes, in both English and Spanish, provided by the Language Acquisition Department.
 - e. Provide a selection of GATE Literacy Kits in Spanish.

B. AAC (Pre-AP, AP, Dual-Credit, IB)

1. Current AAC Support Strategies
 - a. AVID (Advancement Via Individual Determination): This highly-regarded college preparatory support program is currently in place at three high schools (Cholla, Pueblo, and Palo Verde) and their feeder middle schools (Valencia, Secrist, Booth-Fickett). (*See Appendix N.*)
 - b. Some high schools have conference or tutoring time available for students enrolled in AACs, before, during and after school.

- c. IB high school teachers provide tutoring on a weekly basis and require a parent-student conference, along with AASS and MASS representatives, if a student requests to leave the IBDP.
 - d. IB Summer Academy is provided for incoming juniors and seniors.
 - e. Magnet Coordinator at Cholla tracks all IB magnet students for progress in academics, attendance and behavior and involves parents and students in her findings.
2. Recommendations for Additional AAC Support Strategies (over three school years)
- a. AAC - General recommendations for all AACs
 - 1) Expand AVID: Create a plan that outlines how this expansion could take place over a multi-year period.
 - 2) Distribute newly-written Student and Parent Guidelines for Successful Completion of AACs to designated staff to share with students and parents. *(See Appendices H, I, J, M.)*
 - 3) Implement AAC Student Support Plan training on all high school campuses. *(See Appendix O.)*
 - 4) Work with Transportation to provide, as necessary, after-school activity busses for schools that provide after-school support services for students who enroll in AACs.
 - b. Pre-AP (Advanced, Honors)
 - 1) Provide weighted grades (.5 additional grade point) for Honors high school courses.
 - c. Advanced Placement (AP)
 - 1) Implement AP Support Program for AP recruitment and support of African American and Latino students, including ELL students, at all high schools. This plan includes an AP Coordinator position at each site who will implement support services for these students to successfully enroll in and complete AP classes. *(See Appendix P.)*
 - 2) Provide before and/or after school tutoring in math and writing.
 - 3) Encourage all students who take an AP class to take the AP final exam. Educate students, parents and AP teachers as to the benefits of taking the final AP exam.
 - 4) Offer AP students exam preparation classes.
 - 5) Pay AP fees for identified low-income students.
 - 6) Waive other participation fees for any AAC for identified low-income students.

- 7) Distribute newly-written Student and Parent Guidelines for Successful Completion of AP courses to designated staff to share with students and parents. (See Appendices H, I, J, M.)
- d. International Baccalaureate
 - 1) Create a Parent Cohort for the IB Program that would provide education and information about a parent's role in supporting an IB student.

C. University High School (UHS)

1. Current UHS Academic and/or Social/Emotional Support Strategies
 - a. Conference time is provided during school day for teacher-led tutoring two mornings a week.
 - b. After-school tutoring is provided in math, English and science.
 - c. Open and supervised computer lab is available after school for writing support, college application and funding guidance, and online courses.
 - d. Math Centers are available, which are Response to Intervention courses for students struggling in math.
 - e. Writing Centers are available, which are Response to Intervention courses for students struggling in English.
 - f. Student Instructors are a peer teaching support model used in larger classes with teacher guidance to assist other students.
 - g. Penguin to Penguin is a peer mentor program where freshman students are paired with juniors and seniors based on mutual interests in order to support a successful transition to UHS.
 - h. BOOST is a summer program for incoming freshman to support their transition from middle to high school.
 - i. Tutoring services with a math and science focus are provided by Mexican American Student services.
 - j. Student Tutoring Club provides support for students in all core content subject areas.
 - k. A UHS Summer School offers the opportunity to take UHS-specific math and/or health classes.
2. Recommendations for Additional UHS Support Strategies (over three school years)

The District shall... provide assistance for African American and Latino students, including ELL students, to stay in and to be successful at UHS. [V.A.5.a.]

 - a. Offer Science Centers (a course for students struggling in science as part of UHS' Multi-Tier System of Support, MTSS).

- b. Offer BOUNCE, a summer science and math intervention for sophomore students.
- c. Offer BLAST, a summer support program for juniors.
- d. Expand after-school tutoring services.
- e. Offer Fast and Furious, an after-school study skills course for struggling students.
- f. Offer additional tutoring support from African American Student Services and Mexican American Students Services.
- g. Provide city bus passes to support student attendance at before and/or after-school academic support services.

D. Parent Outreach

1. GATE

- a. Current GATE Parent Outreach (at various sites)
 - 1) Title 1 District Advisory Council (DAC) – presented on ALEs in TUSD. (10-15-13)
 - 2) GATE Self-Contained Program Open House for newly-invited students and parents
 - 3) Parent “Meet and Greet” shortly after school begins
 - 4) Grade-level parent liaisons
 - 5) Regular parent meetings held by GATE counselor/administrator
- b. Recommendations for Additional GATE Parent Outreach (over three school years)

Holding community meetings and informational sessions regarding ALEs in geographically diverse District locations, coordinated with the Family Center(s), Multicultural Student Services, and any other relevant District departments;
[V.A.2.d.iii.][emphasis added]

 - 1) Adopt all of the above “Current” practices at all schools that provide GATE services.
 - 2) Provide quarterly parent workshops on themes related to gifted education presented by GATE and Language Acquisition Departments.
 - 3) Distribute semester GATE newsletter.
 - 4) Update and revise TUSD GATE website as necessary.
 - 5) Write and distribute GATE Parent Handbook for current and accurate information about the GATE programs in TUSD.

2. AAC

- a. Current AAC Parent Outreach
 - 1) Parent Nights and Community Events provided by IB Program.
(See Appendix J.)
 - 2) IB participation in the Cholla After-School Program (CAP) Parent Showcase held twice a year to showcase student work and provide parent information and support. Both current and prospective parents are invited.
 - 3) IB program works with Cholla Parent Team and Site Council for parent and student support, education and outreach efforts.
 - b. Recommendations for Future AAC Parent Outreach (over three school years)
 - 1) Create AAC and IB Parent Teams that would educate and support enrolled students and their parents in order to assist successful completion of the IBDP.
 - 2) Create AAC and IB Resource Room, furnished with computers, study areas, and appropriate curriculum materials, for AAC and IB students and parents.
3. University High School (UHS)
- a. Current UHS Parent Outreach
 - 1) Parent Association meetings.
 - 2) School Site Council meetings.
 - 3) Junior University: Parent and student conference for juniors to train parents and students on college application process and funding.
 - 4) Family University: Parent and student conference for seniors to train parents and students on college application process and funding.
 - b. Recommendations for Additional UHS Parent Outreach (over three school years)
 - 1) Develop evening lecture series for students and parents on topics of interest.

E. Parent Complaint Process

1. An open and equitable complaint process for parents with concerns regarding ALE courses, policies, and procedures has been developed by the District. (See Appendix Q.)
2. The Complaint Process will be disseminated at all school sites, through the Family Centers, at the District Office, and on the website.

VI. PROFESSIONAL DEVELOPMENT (for Spring 2014 and 2014-15 SY)

Provide professional development to train all AAC teachers using appropriate training and curricula, such as that provided by the College Board. [V.A.4.a.iv.]

A. TUSD

1. Spring and Fall 2014
 - a. *Culturally Responsive Teaching Practices – Part 1: CRC* (Teaching strategies that are inclusive of the African American and Latino experience)
 - b. *Mental Models: Recognizing and Eliminating Unconscious Teacher Bias: AASS* (Recognizing and eliminating classroom culture of low expectations and the resultant lack of rigor)
 - c. *Motivating Students Through Engaging Teaching Strategies*
 - d. *Culturally Responsive Teaching Practices – Part 2: CRC* (Teaching strategies that are inclusive of the African American and Latino experience)

B. College Board

1. Fall 2013 and Spring 2014; annual presentations
 - a. *PSAT Administration Reading Workshop: Nuts and Bolts*
 - b. *Pre-AP Instructional Strategies: Fostering Equity and Access*
 - c. *PSAT Summary of Answers & Skills – Interpretations of Scores*

C. Phoenix Desert Institute (College Board approved)

1. Spring 2014
 - a. Advanced Placement for Everyone: It's All About Attitude!
2. Summer 2014
 - a. Summer Institute: Thirty hours of free professional development provided at Tucson Magnet High School over four days. Teachers may select from three different strands:
 - 1) Advanced Placement: Training in teaching strategies for fifteen AP courses. Equity in AP courses and culturally relevant and/or multi-cultural curriculum information is included in this strand.
 - 2) Gifted Education: training in gifted teaching strategies for both elementary and middle school levels. Culturally relevant and/or multi-cultural curriculum information is included in this strand.
 - 3) Honors/Advanced Strategies: These workshops are for English/Language Arts and Math teachers, grades 6-10. Culturally relevant and/or multi-cultural curriculum information is included in this strand.

VII. BEST PRACTICES: CONSULTATION WITH EXPERTS

In developing this Plan, the ALE Coordinator shall take into account the findings and recommendations of the assessment of existing ALE programs, resources, and practices in the District and best practices implemented by other school districts. [V.A.2.c.][emphasis added]

All of the experts listed below were interviewed by members of the ALE Best Practices committee members. Of the twelve listed, eleven were interviewed by phone and one was interviewed through email (Dr. John Knudson-Martin). *(See Appendix R for additional biographical information on the experts consulted.)*

A. Gifted education and underrepresented students

1. Tommie Anderson
Director of Talented and Gifted Education (retired)
Pulaski County Special District
Little Rock, AR
2. Donna Ford, Ph.D.
Harvie Branscomb Distinguished Professor
Vanderbilt University
Atlanta, GA
3. Lisette T. Rodriguez, Ph.D.
District Supervisor
Advanced Academic Programs
Miami Dade County Public Schools
Miami, FL

B. Advanced Placement

1. Mary Boehm
President
A+ College Ready – A National Math and Science Initiative
Montgomery, AL
2. BJ Henry
Assistant Principal, Elizabethtown High School
Elizabethtown Independent School District
Elizabethtown, KY
3. Gina Thompson
Deputy Superintendent
Yuma Union High School District
Yuma, AZ

C. Detracking (The educational philosophy that the best curriculum and teaching practices at the school should be the curriculum and teaching practices to which every student has access.)

1. Carol Burris
Principal, South Side High School
Rockville Centre School District
Rockville Centre, NY
2. John Knudson-Martin Ph.D.
Associate Professor of Education
Eastern Oregon University
La Grande, OR

D. Equity in Education

1. Gerald Denman
Chief Equity and Achievement Officer
Puyallup School District
Puyallup, WA
2. Robert L. Jarvis, Ph.D.
Penn Center for Educational Leadership, Graduate School of Education
University of Pennsylvania
Philadelphia, PA
3. Mika Pollock, Ph.D.
Professor of Education Studies
University of California, San Diego
San Diego, CA
4. Kevin Welner, Ph.D., J.D.
Professor, Education Foundations, Policy & Practice
University of Colorado – Boulder
Boulder, CO

Tucson Unified School District

2013/2014 GATE Models

<i>Program</i>	<i>Description/Qualifying Criteria</i>	<i>Number of Schools</i>	<i>Model Instructional Minutes</i>
Self-Contained	<p>(Grades 1-8): This program currently requires earning a specific score on the OLSAT (Kindergarten) or CogAT (grades 1-8) and the Raven assessments. It is offered at five elementary schools ** and three middle schools.</p> <p>Kindergarten Qualifying Criteria</p> <ul style="list-style-type: none"> ✓ Raven/OLSAT-9 Stanine ✓ OLSAT-8 Stanine <u>and</u> 200+ NCE <p>1-7 grade Qualifying Criteria</p> <ul style="list-style-type: none"> ✓ 8 stanine on any test <u>and</u> 268+ NCE ✓ 9 stanine on CogAT 	<p>5-Elementary</p> <p>3-Middle</p>	<p>335 minutes</p> <p>Up to 60 minutes per class</p>
Self-Contained – Dual Language	<p>(Grades 1-5): This program currently requires earning a specific score on the OLSAT (Kinder) or CogAT (grades 1-8) and the Raven assessments. This program is currently offered at Hollinger K-8 (grades 1-5) and Pistor MS (grades 6-8) and provides instruction in both English and Spanish with the ultimate of goal of student fluency in both languages. The program at Hollinger is open to all students in TUSD regardless of feeder pattern; the Pistor program is offered to those students who are in the Pistor GATE feeder pattern.</p> <p>Kindergarten Qualifying Criteria</p> <ul style="list-style-type: none"> ✓ Raven/OLSAT-9 Stanine ✓ OLSAT-8 Stanine and 200+ NCE <p>1-7 grade Qualifying Criteria</p> <ul style="list-style-type: none"> ✓ 8 stanine on any test and 268+ NCE ✓ 9 stanine on CogAT 	<p>1-Elementary (Hollinger)</p> <p>1-Middle (Pistor)</p>	<p>335 minutes</p> <p>Up to 60 minutes per class</p>

Itinerant (Pull-out)	<p>(Grades 1-8): This program, for 1st through 5th grades, requires earning a specific score on the OLSAT (Kinder) or CogAT (grades 1-8) and the Raven assessments, although lower than the requirement for self-contained GATE. These pull-out services are offered at all elementary and K-8 schools for grades 1-5.</p> <p>Kindergarten Qualifying Criteria</p> <ul style="list-style-type: none"> ✓ Olsat 8+ stanine ✓ Raven 9 stanine <p>1-7 grade Qualifying Criteria</p> <ul style="list-style-type: none"> ✓ CogAT 8+ stanine ✓ Raven 9 stanine 	48	30-90 minutes
Resource	<p>(Grades 6-10): This program, for 6th through 10th grades, allows for one GATE resource class to be offered at middle school that can be either a core content area class or an enrichment class. At the high school level, most schools offer a Freshman Humanities course and a very few high schools offer a Sophomore level English course. Students are not placed just on testing, but also on a combination of grades, AIMS and ATI scores, and teacher recommendations.</p> <p>Qualifying Criteria – any of the following:</p> <ul style="list-style-type: none"> ✓ GATE scores (OLSAT, CogAT, Raven) ✓ Teacher recommendations ✓ Grade point average (GPA) ✓ Achievement test scores 	10-Middle 8-High	Up to 59 minutes Up to 60 minutes
Cluster Program	<p>(Grades 1-5): This program is currently offered at twelve elementary and two K-8 schools.** Students do not test to be placed in this classroom, which is a mixture of regular education students and students previously identified as qualifying for GATE services through testing. The student mix is based on a formula identifying students based on their AIMS scores.</p> <p>Kindergarten Qualifying Criteria</p> <ul style="list-style-type: none"> ✓ Olsat 8+ stanine ✓ Raven 9 stanine <p>1-7 grade Qualifying Criteria</p>	14	Up to 210 minutes

	✓ CogAT 8+ stanine ✓ Raven 9 stanine

Tucson Unified School District – Gifted and Talented Education Program

IS YOUR CHILD?

- Inventive
- A quick learner
- Highly observant
- Persistent
- Musically/Artistically skilled
- A unique problem solver
- Inquisitive
- A natural leader

DOES YOUR CHILD?

- Share ideas
- Show compassion
- Have a sophisticated sense of humor
- Connect information and ideas
- Take initiative
- Show perfectionism
- Have a large vocabulary
- Have intense interests

If your child has several of these characteristics/behaviors, please consider having your child evaluated for GATE.

WHAT IS GATE? – GATE (Gifted and Talented Education) provides services designed to meet the special academic and social needs of gifted and talented students who have potential for high achievement. Lessons integrate critical and creative thinking and problem solving within the content areas of language arts, science, math, social studies, and fine arts. Emphasis is placed on self-direction, flexibility, and cooperation in social and academic situations.

Placement in the GATE program is dependent on assessment results. Assessments used include the Otis-Lennon School Abilities test (kindergarten) or Cognitive Abilities test (Grades 1-8) and/or Raven (K-8). Selected assessments are aligned to students first language needs. As a parent/legal guardian of an enrolled kindergarten through 7th grade TUSD student, you may request that your child be evaluated and considered for GATE self-contained and/or pull-out services by signing, carefully detaching, and placing the permission form below in the mail, postage free. Permission forms must be received by **September 27, 2013** to be evaluated for possible 2014-2015 services. Please contact the GATE office at 225-1305 if you have questions.

Distrito Escolar Unificado de Tucson – Programa de Educación para Superdotados y Talentosos

¿ES SU HIJO(A)

- Ingenioso?
- Rápido(a) para aprender?
- Sumamente Observador(a)?
- Persistente?
- Hábil en lo musical o artístico?
- Hábil en la solución de problemas?
- Curioso(a)?
- Un líder natural?

¿SU HIJO(A)

- Comparte ideas?
- Muestra compasión?
- Tiene un sentido del humor sofisticado?
- Hace conexión entre la información y las ideas?
- Toma Iniciativa?
- Muestra Perfeccionismo?
- Tiene un vocabulario amplio?
- Tiene gran interés?

Si su hijo(a) tiene varias de estas características/comportamientos, por favor considere que su hijo(a) sea evaluado para GATE.

¿QUÉ ES GATE? – Gifted and Talented Education (GATE) por sus siglas en inglés, proporciona servicios que están diseñados para satisfacer las necesidades especiales académicas y sociales de estudiantes superdotados y talentosos quienes tienen el potencial de tener un alto rendimiento. Las lecciones integran el pensamiento crítico y creativo, y la solución de problemas dentro de las áreas de artes del lenguaje, ciencia, matemáticas, ciencias sociales, y bellas artes. Se hace hincapié en la autodirección, flexibilidad, y cooperación en situaciones sociales y académicas.

La colocación del estudiante en el programa GATE, depende de los resultados de las evaluaciones. Las evaluaciones que se utilizan incluyen la prueba de destrezas escolares Otis-Lennon (kínder) o prueba de capacidades cognitivas (1^{ro}-8^{vo} grado) y/o Raven (k-8^{vo} grado). Ciertas evaluaciones se adecuan a las necesidades del estudiante según su lengua madre. Como padre/tutor legal de un estudiante inscrito en kínder al 7^{mo} grado en TUSD, usted puede solicitar que su hijo(a) sea evaluado(a) y considerado(a) para el programa GATE de tiempo completo y/o clases fuera del aula al firmar, desprender cuidadosamente, y mandar la forma del permiso por correo gratuitamente. Para que su estudiante sea evaluado(a) para los posibles servicios de 2014-2015, debemos recibir las formas del permiso a más tardar el 27 de septiembre de 2013. Por favor llame al 225-1305 si tiene cualquier pregunta.

^ Carefully detach and place in mail postage free ^

^ Despréndala cuidadosamente y envíela gratuitamente por correo ^

IMPORTANT: This postcard must be received by the GATE Department by September 27, 2013, to be evaluated for potential 2014-2015 services, as the initial screening assessment will be the week of Nov. 4-8, and processing of applications must be completed well before September 27, 2013.

IMPORTANTE: El Departamento de GATE debe recibir esta tarjeta postal a más tardar el 27 de septiembre de 2013 para que su estudiante sea evaluado para los posibles servicios en 2014-2015.

Guidelines for Middle School GATE Resource Class

1. All middle schools (grades 6th – 8th) will provide gifted services for identified students. This class will be an enrichment class (GATE Resource) taught by a GATE endorsed teacher that will be a combined grade-level class based on site needs.
2. Students will be placed in this class by site decision based on any combination of the following: GPA, teacher recommendation, benchmark results, AIMS, and/or GATE test results.
3. A school site may provide additional GATE classes, as long as the class is taught by a GATE endorsed (provisional or permanent) teacher.
4. Any classes taught by a GATE endorsed teacher should be titled GATE with additional information included. (GATE 6th grade math, GATE 8th grade language arts).
5. A list of TUSD guidelines for success in GATE classes will be provided to all interested students and parents for guidance in making this placement decision.
6. For all students in a GATE class, there will be a trial period until the first four-week progress report to see if the class is a good match for a student's interests and ability levels. If there is concern from any interested party (teacher, parent, student), a conference will be held to determine the best course of action for the student. If the student remains in the GATE class after this conference, a student support plan will be initiated to provide any needed interventions. If improvement is not shown by the end of the first semester, the student may be placed in another class.

Cholla High School Magnet School Recruitment Calendar

September 2013

- Letters home to all Magnet students, welcoming them to Cholla (retention)
- Proper identification of magnet and subprogram students with School Community Services (retention)
- Presentation to all district LSCs and Counselors regarding IB Prep and IB DP Programme (recruitment/marketing)
 - Overview of programs in an effort to encourage student services to promote programs at middle school level and provide opportunity for Cholla to visit schools and talk to students
- Established MS counselor and LSC listserv for consistent communication
- Cholla Parent University (retention)
 - Provided parents/guardians and students with information regarding how to apply to college, financial aid, and scholarships. College representatives present to speak to parents/guardians and students. Representatives from African American, Mexican American and Native American student services also present.

October 2013

- Meeting with LSC at University High School (recruitment/marketing)
 - Discussed possibility of joint recruitment due to ALE status for both programs. Information shared regarding possible parent night in January. Contacts exchanged for various middle schools.
- TUSD Parent University (recruitment/marketing)
 - Informational table discussing IB and Law programs. Good networking and PR.
- Celebrate Schools at Park Place and Tucson Mall (recruitment/marketing)
 - Informational table discussing IB and Law programs. Good networking and PR.
- Informational Nights for Parents of 8th graders (recruitment/marketing)
 - Letter sent to every parent of TUSD 8th grader, in Arizona Daily Star
 - Safford – October 15th
 - Pistor – October 21st
 - Cholla – October 1st and October 29th
- Letter sent to Tim Steller of Arizona Daily Star discussing IB DP Programme (marketing)
- Presentation to IB Seniors (retention)
 - Discussed college application process and upcoming Tucson College Night
- Presentation to Middle Schools (recruitment/marketing)
 - Doolen – October 22nd
 - Naylor Parent Night – October 24th
 - Mansfeld STEM Night – October 24th
 - Roskruge 8th grade assembly – October 25th
 - Fickett 8th grade assembly – October 30th
- Submission of four magnet teachers (1 – Law, 3 – IB) to Tucson Values Teachers Excellence Award for November
- Scheduled to visit remaining TUSD middle schools in November
- Informational packet created to be sent to private schools, contacts made for possible visits

November/December 2013

- Letters home to Magnet students who may be struggling in academics or attendance encouraging tutoring or CAP enrollment
- Meeting with LSC to begin individual magnet student interventions for student's receiving above letter
- List of magnet students needing possible interventions sent to all student support staff
- Meeting with LSC at University High School (recruitment/marketing)
 - Discussed possibility of joint recruitment due to ALE status for both programs. Information shared regarding possible parent night in January. Contacts exchanged for various middle schools.
- Presentation to Middle Schools (recruitment/marketing)
 - Robins – November 1
 - Valencia – November 4
 - Vail – November 6
 - Safford – November 7
 - Utterback – November 8
 - Lawrence – November 8
 - Secrist – November 12
 - Gridley – November 12
 - Pistor – November 15
 - Dodge High School night – November 21
- Contacted school counselors and LSCs to promote our Cholla After-school Program (CAP) Showcase
- Mailer regarding showcase to go out to students who have applied to programme (1st, 2nd, 3rd choice)
- Mailer regarding showcase to go out to all Safford students
- Magnet Monday tours conducted, informational packet given
- Submission of four magnet teachers (1 – Law, 3 – IB) to November Tucson Values Teachers Excellence Award in an effort to increase public awareness of programs
- Informational packet sent to private and charter schools
- Meeting set up with Noreen at School Community Services regarding the IB Programme and proper placement of students
- Spreadsheet kept with IB Prep applications received, letter contact made with family

January 2014

- Presented to all 10th grade students IB DP information through English classes
- Presented to all 9th grade students Law/IB Prep information through English classes
- Part of elective video discussing law and IB programmes, presented to all 9th, 10th, and 11th grade students

Kentucky Science and Technology Corporation (KSTC)

AP Teacher Letter of Agreement
2012-2013 School Year

DRAFT – Teacher Name - DRAFT

[Subject]/[School Name] High School/[District Name] Public Schools

I. AP Teachers Support the Goals of the AP Program with an Open Enrollment Approach

- Student Access: Increase the number of students enrolled in math, science, English (MSE) AP courses.
- Student Success: Increase the number of students achieving a 3 or greater on MSE AP Exams.
- College Readiness: Serve the best interest of students to learn more for a better chance of success in college.
- High Expectations: Reach ambitious qualifying score goals but in a fair and reasonable manner.

II. Expectations for AP MSE Teachers

- Attend the four (4) scheduled vertical team meetings.
- Attend a two-day AdvanceKentucky Fall Forum teacher training.
- Attend a week-long AP Summer Institute or equivalent, as determined by KSTC.
- Tutor AP students for a minimum of four hours outside of class each month.
- Attend/observe and assist with three (3) Student Study Sessions, and regularly encourage all AP students to attend these Student Study Sessions.
- Teach the AP curriculum as outlined in the College Board guidelines and approved through your College Board Course Audit.
- Respond to AdvanceKentucky Content Director and the local AP Content Coordinator for your subject area as he/she carries out responsibilities to AdvanceKentucky, including keeping your personal data up-to-date in the online Data Reporting System and reporting your attendance as noted under the Stipend section below (payment of stipend is based on these online records).

III. Stipend, Incentives and Threshold Bonus for AP MSE Teachers Paid by KSTC to School/District

- Stipend (up to \$500 Total):
 - \$30 for each post-meeting report entered in to the AdvanceKY Online Data Reporting System after participation in the four (4) vertical team meetings (maximum of \$120).
 - \$80 for attending AdvanceKentucky Two-Day AP Teacher Training (Friday evening, Saturday). Attendance to be entered into the AdvanceKY Online Data Reporting.
 - \$180 for attending the week-long summer institute or equivalent, as determined by KSTC. Attendance to be entered into the AdvanceKY Online Data Reporting System.
 - \$40 for post-session report entered into the AdvanceKY Online Data Reporting System after attending and assisting with each of the three (3) Student Study Sessions. (maximum of \$120)
- AP Qualifying Score Incentives are valued at:
 - \$100 for each student who appears on your roll and receives a score of 3 or greater on the AP [Subject] Exam taken in May 2013.
- A Threshold Bonus amount may be earned as follows:
 - If the total number of 2013 AP qualifying scores in AP [Subject] earned by students enrolled in this course school-wide meets a threshold of at least:
 - **XX** – then you will earn \$1,000.

STUDENT GUIDELINES

6th – 12th grades

FOR ADVANCED ACADEMIC COURSES (AAC) AP, Advanced, Honors, GATE, IB*

Are AACs for me?

What are AACs?

You will...

- Work at a higher level
- Work at a faster pace
- Do projects and have hands-on activities
- Have homework to help you learn the content

Do you want to...

- ...prepare for high school and college success?
- ...be confident in all your classes?
- ...know what is important to study?
- ...have answers to questions in class?
- ...understand what you read?
- ...confidently take on challenges?
- ...work hard and learn?
- ...make valid points and support your thoughts?
- ...contribute to a group?

What did you answer to these questions?

Yes!

Then TUSD has these courses for you. Enroll in AACs at your school, give your best, and unleash your potential! See your school counselor for more information.

Not sure?

Give it a try! If you've never taken an AAC, you can still be successful if you have the work ethic and confidence to keep trying when things are unfamiliar or challenging. Your teachers will be there to help and support you if you take on this challenge. Why not talk to a school counselor about these opportunities if you still aren't sure.

* AP = Advance Placement; IB = International Baccalaureate

Appendix I

TUSD

STUDENT GUIDELINES **for ADVANCED PLACEMENT (AP) COURSES**

Are you thinking about taking an AP course?

Some things all AP courses have in common are:

- Accelerated curriculum
- Problem-solving and critical thinking
- Teachers who have special AP training
- Opportunity to earn college credit

Do you or are you willing to...

- ...enjoy learning?
- ...work hard?
- ...turn in your homework on time?
- ...have excellent attendance?
- ...meet a challenge head on instead of taking the easy way out?
- ...think for yourself?
- ...ask questions?
- ...manage your time well?
- ...follow through with your commitments?
- ...strengthen your analytical, reading, and writing abilities?
- ...contribute to a group?

What did you answer?

Yes! Then TUSD has AP courses just for you. See your school counselor to find out what courses your high school offers.

Not sure? An inexperienced AP student can still be successful if she/he has the work ethic and confidence to keep trying when things are unfamiliar or challenging. Support will be provided at your school to help you successfully complete an AP course. Why not talk to a school counselor about this opportunity?

Appendix J

TUSD

STUDENT GUIDELINES

International Baccalaureate (IB)

Cholla Magnet High School

9th – 12th grades

Are IB courses for me?

What are IB courses like?

You will...

- Develop international mindedness
- Learn a foreign language
- Participate in service learning
- Use critical, reflective thinking
- Develop positive character traits
- Have teachers who are highly trained in their content area
- Have the opportunity to earn college credit

Do you or are you willing to...

- Enjoy learning? Work hard?
- Turn in your homework on time? Have excellent attendance?
- Meet a challenge head on instead of taking the easy way out?
- Think for yourself? Ask questions?
- Manage your time well? Follow through with your commitments?
- Strengthen your analytical, reading and writing abilities?
- Contribute to a group?

What did you answer to these questions?

Yes! Then TUSD has these courses for you. Enroll in the IB program at Cholla High School, give your best, and unleash your potential! See your school counselor for more information.

Not sure? Give it a try! You can be successful if you have the work ethic and confidence to keep trying when things are unfamiliar or challenging. Your IB teachers will be there to help and support you if you take on this challenge. Why not talk to a school counselor about these opportunities if you still aren't sure

TUSD

Delivering Excellence In Education Every Day

Appendix L

SITE SPECIFIC PROGRAMS

TUSD offers three district-wide programs that are each located at a specific TUSD schools.

Students can apply and/or test into these programs, based on the individual program requirements.

Dual Language

Students in this program will develop the ability to speak, read, and write in English and Spanish. Students will be expected to achieve at or above grade level in all academic areas. Instruction is provided by a bilingual education endorsed teacher. All subjects (Language Arts, math, science, social studies) are taught in English and in Spanish. The instruction includes: English Language Development (ELD) instruction for English Language Learners (ELLs); and Spanish as a Second Language (SSL) for English speakers. Several elementary and K-8 schools plus Pueblo High School offer this program.

Questions? Call 520-225-4600.

International Baccalaureate Programme @ Cholla High School:

This program is widely recognized as one of the top college-preparatory curriculums in the world. It works to develop inquiring, knowledgeable and caring young people through intercultural understanding and respect.

Students have the opportunity to earn an IB diploma and college credits. In 9th and 10th grade, students will take IB Prep/Honors courses specifically designed to prepare students for their entrance into the Diploma Programme. In their 11th and 12th grade years (2-year Diploma Programme) students take specific IB courses.

UNIVERSITY HIGH SCHOOL

UHS is a nationally recognized and highly ranked college preparatory high school that offers an advanced and rigorous academic curriculum in a highly supportive environment. UHS offers a full range of academics, fine arts courses, and athletics, while supporting many school clubs and activities that provide students a balanced and well-rounded high school experience. These opportunities prepare UHS students well for success at any college or university.

Tucson Unified School District

TUSD

www.tusd1.org

Proudly serving Tucson families since 1867

Sirviendo orgullosamente a las familias de Tucson desde 1867

AACs are classes offered at TUSD middle and high schools and are designed to offer a more challenging curriculum than a regular class. Available in core subjects (English, Math, Science and Social Studies), these classes cover the same subject material but at an accelerated or "deeper" level, providing a greater challenge for students and preparing them for more advanced coursework in high school. These classes are called Advanced (MS), Honors (HS), Dual-Credit, and IB. Check out the classes available at your school.

Dual-Credit

TUSD high schools offer some courses for which any student can receive both high school and college credit if successfully completed. This opportunity is available through a partnership with Pima Community College. Please check with your school of choice for the courses available with this option.

ADVANCED PLACEMENT

Advanced Placement (AP®) courses are college level classes open to high school students. Following a rigorous curriculum developed by the College Board, students who complete an AP course and perform successfully on the course exam learn not only the content knowledge and the skills needed to succeed at the college level, but can earn course credit towards their college degree. AP classes are offered in various subjects at TUSD high schools, including English, Spanish, Math and Science. Contact your high school for a complete list of the courses offered.

GATE

Gifted and Talented Education provides services designed to meet the academic needs of identified students. Lessons integrate critical and creative thinking, along with problem solving, within the content areas. Emphasis is placed on self-direction, flexibility, and cooperation. TUSD offers four different types of services including self-contained, pull-out, push-in, cluster and resource classes. In addition, TUSD offers Dual-Language self-contained GATE programs in 1st - 12th grades. For more specific information please call 225-1305.

PARENT GUIDELINES

TO SUPPORT A STUDENT WITH ADVANCED ACADEMIC COURSES (AAC) (Advanced, Honors, GATE, IB, AP)*

What helps an AAC student outside the classroom?

Parents or guardians who do or are willing to...

- provide a consistent time and place for their student to complete homework.
- understand that this is a year-long commitment.
- remind student of the benefits of a rigorous course of study.
- encourage and support student; do not let their student quit when (s)he is challenged.
- assist their student in learning time management skills.
- support and understand the homework load as it may affect family trips, work, and/or sibling responsibilities.
- allow and encourage their student to attend tutoring.
- encourage their student to talk to their teachers.
- ask about their school day.
- read communications from the teacher and school and respond when necessary.
- have and utilize a TUSD Stats account in order to stay current with their student's progress.
- attend Open House, Conference Night, and/or special school events
- work with the school to help their student.

Will you offer that support? Will you help your student be college bound?

Yes! Then TUSD has courses and your student needs your encouragement. Have her/him enroll in AACs at school, support her/him, and unleash her/his potential! See your school for more information.

Not sure? Give it a try! Join your student and the AAC teacher to create a learning team that empowers your student. (S)he can be successful if (s)he has the work ethic and confidence to keep trying when things are unfamiliar or challenging. Why not talk to your student and/or a school counselor about these opportunities if you still aren't sure.

TUTORS WANTED

Department of Curriculum, Instruction and Professional Development

What is AVID?

AVID is a college readiness system that includes a regularly scheduled AVID elective class during the school day, based on writing as a tool of learning, the inquiry method, organization and collaborative grouping. The main components of the AVID system are:

- College readiness skill development
- Academic instruction
- Tutorial support in the AVID elective class
- Motivational activities
- Increased enrollment in rigorous course work

Who is an AVID student?

Students selected for the AVID elective class are students in the academic middle, capable of completing a college preparatory path with support. These students often are not realizing their full potential academically. All criterion are considered for acceptance into the class, no single criteria will necessarily eliminate a student from consideration.

For further information go to www.avidonline.org

Why does AVID work?

- AVID places students in rigorous curriculum and gives them the support to achieve
- Provides a team of students for positive peer identification
- Redefines the teacher's role as that of student advocate

Meeting the Challenge

Avid helps students:

- Develop as readers and writers
- Develop deep content knowledge
- Know content specific strategies for reading writing, thinking, and talking

The AVID elective class addresses key Elements in college preparation:

- Academic survival skills
- College entry skills
- Tutorials
- Motivational activities career and college exploration

TUTORS

Tutors are paid an hourly rate of \$10.48 and are needed two to three days weekly for 3-6 hours depending on site. If interested please contact TUSD. We are looking for tutors at the following sites:

AP/AAC Support Committee

(AAC: Honors (HS), Advanced (MS), IB, Dual-Credit)

Student Support Committee (SSC)

It is expected that when a student enrolls in an AAC, s/he will successfully complete the course. The purpose of this committee is to support a student so s/he is able meet this goal. Referral to the SSC may be made at any time by anyone requesting support services for an AP or AAC or student.

Steps :

- 1- Complete form
- 2- Submit form to school counselor
- 3- Committee will meet with student to provide support and assistance.

AP/AAC Student - Request for Support Form

Student: _____

Grade: _____

Course: _____

Appendix P

February 3, 2014

Advanced Placement (AP) Student Support Plan

Goal: To increase African American and Latino enrollment in and successful completion of AP classes. Implementation planned for SY 2014-2015.

Policy: AP classes are completely open to any interested student and these students must be given adequate support to successfully complete these rigorous courses.

1. AP Coordinator

An AP teacher at each HS is given two periods a day for implementation of student support activities including organizing and reviewing: student recruitment, academic performance, peer study groups, teacher mentors, AP info events, parent/community outreach, summer program, test preparation, and AP exam coordination. Special training will be provided on the specific demographics of the students teacher will be recruiting.

2. Student Identification:

- Faculty and staff will be asked to identify students who they believe have the potential to succeed in AP classes.
- Data from some or all of the following will be used for identification: AIMS, EXPLORE, AP Potential, PSAT, GPA, personal characteristics such as motivation, work ethic, ambition, passion, resiliency, etc.
- Parent or student identification – Parents or students may request and be granted placement in an AP course.

3. Personal Outreach → Identified Students

Identified students will be personally contacted by any faculty member or current AP student and asked to consider taking an AP class. They will be supported and encouraged as they talk to an AP teacher or student, visit an AP classroom, and/or attend an AP information event.

4. Teacher/Staff Mentors

Every African American and Latino student will be paired with a teacher mentor on campus from any class or subject area. This will be a year-long commitment to support a student while she or he adapts to this more rigorous class.

5. Peer Study Group

AP Coordinator creates peer study groups to meet 1x/week before/after school to work together on academic coursework.

6. Support Classes

AP Coordinator and administration at each high school will organize a before, during and/or after-school writing lab, math tutoring, and exam prep classes.

February 3, 2014

Advanced Placement (AP) Student Support Plan

7. Summer Program: A summer program for identified students (and others) new to AP will be held to prepare students for new expectations of an AP course.

8. AP Course Offerings

All high schools would offer a minimum of 4 AP class in core subject areas, including identified high-interest classes for African American and Latino students: Year 1-AP Spanish Language and Culture, World History, English Language, and Biology; Year 2: Human Geography, Spanish Literature, Psychology, English Literature, U.S. History, Studio Art

9. AVID

If AVID is offered at a high school, targeted students will be encouraged to participate.

10. Student Support Committee (SSC)

Goal: Retention of students in AP classes.

Committee consists of counselor, LSC, administrator, AP teacher. Each student agrees not to withdraw for semester; if change is requested after that time period, student must talk to SCC. Interventions are put into place after first quarter, if needed. If schedule change is requested at the end of first semester, Committee problem-solves with student, identifies solutions, finds resources, and provides whatever is necessary to assist student in remaining in AP class.

11. African American Student Services, Mexican American Student Services, Language Acquisition Support

These departments, in coordination with the AP Coordinator, LSC and administration at each site, will provide additional support to identified students as needed and support any parent/community outreach initiatives.

12. Parent/Community Outreach

Events/Initiatives will be planned to elicit parent and community support for identified students taking AP classes.

Appendix Q

**Department of Advanced Learning Experiences (ALE)
Parent Complaint Resolution Process**

In order to best serve our students and families, the ALE Department has established the following procedures to ensure complaints or concerns from our families are resolved in a fair and timely manner. Complaints should always begin at the level in which the concern was held. They should be shared as soon as possible to allow resolution at the lowest possible administrative level, starting with the classroom teacher and then the campus administrator. Thank you for following the steps outlined below.

INFORMAL ATTEMPTS	CAMPUS LEVEL	STEP 1 Contact the appropriate teacher or staff member at your student's school to share your concern.	Please schedule an informal discussion with the appropriate teacher or staff member to share your concern and what resolutions you are seeking. It is important that you begin at the level where the concern originated. This can be done in person, by phone or through email.
		STEP 2 Contact an administrator at your student's school.	If, after meeting with your student's teacher or staff member, your concerns were not addressed satisfactorily, please schedule a discussion with a campus administrator to share your concern and what resolutions you are seeking. This can be done in person, by phone or through email.
FORMAL ATTEMPTS	CAMPUS LEVEL	STEP 3 Contact the principal at your student's school.	If informal attempts do not bring a resolution, the "ALE Formal Parent Complaint: Level Two" form may be filed and given to the campus principal along with a request for a meeting. This form is available through the ALE Department or the ALE Website, or from the school principal.
	CAMPUS LEVEL	STEP 4	The campus principal will hold a conference with the student and/or parent as soon as possible, but no more than five school days of receiving the written complaint. The principal will have five school days after the conference to submit a final response in writing to the student or parent, if one is requested.
	DISTRICT LEVEL	STEP 5	If the conference with the principal did not bring forth a resolution that both the family and principal agree upon, the parent/guardian may request a meeting with the Director of Advanced Learning Experiences. This form is available through the ALE Department or the ALE website, or from the school principal.
	DISTRICT LEVEL	STEP 6	The ALE Director or designee shall hold a conference within five school days after the meeting request was made. At the conference, the ALE Director or designee shall consider only the issues and documents presented at the site level and identified in the "ALE Formal Parent Complaint: Level Two" form. The ALE Director or designee or designee shall have five school days following the conference to provide the student or parent a written response, if one is requested.
	DISTRICT LEVEL	STEP 7	If the conference with the ALE Director did not bring forth a resolution that both the family and Director agree upon, the parent/guardian may request a meeting with the Assistant Superintendent for Curriculum and Instruction or designee. The Assistant Superintendent or designee shall meet with the parent/guardian within five school days after the meeting request was made. At the conference, the Assistant Superintendent or designee shall consider only the issues and documents presented at the site level and identified in the "ALE Formal Parent Complaint: Level Two" form. The Assistant Superintendent or designee shall have five school days following the conference to provide the student or parent a written response, if one is requested.
	BOARD LEVEL	STEP 8	If the parent or student did not receive the relief requested at the meeting with the Assistant Superintendent or designee, the family may appeal the decision to the TUSD School Board. The appeal notice must be filed in writing, on a "Level Three Complaint" form provided by TUSD. The "Level Three Complaint" must be filed within 10 days from the "Level Two" decision was issued. The Superintendent or designee shall inform the student or parent of the date, time and place of the board meeting at which the complaint will be on the agenda for presentation to the TUSD Board.
			The decision of the Board at the Level Three Complaint process is final. If for any reason the Board fails to reach a decision regarding the complaint by the end of the regularly scheduled board meeting, the lack of a response by the Board upholds the administrative decision at Level Two.

Tucson Unified School District

**Department of Advanced Learning Experiences
Formal Parent Complaint: Level Two**

Tucson Unified School District pledges to support the academic success of all students and no discrimination is permitted in the programs or activities that the District operates. If you have an issue regarding any aspect of Advanced Learning Experiences (ALE) related to a student, please complete, sign and submit this form to your school's principal.

Date: _____

On behalf of: _____

Complaint is filed by: ___ Student: _____

___ Student's parent(s): _____

___ Other: _____

Address: _____

MEETING OF: October 22, 2013

TITLE: University High School Admissions Plan in Accordance with the Unitary Status Plan

ITEM #: 13

Information:

Study: X

Action: X

PURPOSE:

To seek Governing Board approval of the final version of the University High School Admissions Process (Version 3.0) required by the Unitary Status Plan.

DESCRIPTION AND JUSTIFICATION:

The Unitary Status Plan states, in relevant part,

"...the District shall review and revise the process and procedures that it uses to select students for admission to UHS to ensure that multiple measures for admission are used and that all students have an equitable opportunity to enroll at University High School. In conducting this review, the District shall consult with an expert regarding the use of multiple measures (e.g., essays; characteristics of the student's school; student's background, including race, ethnicity and socioeconomic status) for admission to similar programs and shall review best practices used by other school districts in admitting students to similar programs."

According to the most recent timeline, this item is due by October 23, 2013. This item is presented here for action, staff is recommending approval of this item.

University High School Admissions Process Revision

I. USP LANGUAGE

The Unitary Status Plan (USP), section V(5)(a) states:

V. QUALITY OF EDUCATION

5. University High School ("UHS") Admissions and Retention

- a. *By ~~April 1, 2013~~ October 1, 2013, the District shall review and revise the process and procedures that it uses to select students for admission to UHS to ensure that multiple measures for admission are used and that all students have an equitable opportunity to enroll at University High School. In conducting this review, the District shall consult with an expert regarding the use of multiple measures (e.g., essays; characteristics of the student's school; student's background, including race, ethnicity and socioeconomic status) for admission to similar programs and shall review best practices used by other school districts in admitting students to similar programs. The District shall consult with the Plaintiffs and the Special Master during the drafting and prior to implementation of the revised admissions procedures. The District shall pilot these admissions procedures for transfer students seeking to enter UHS during the 2013-2014 school year and shall implement the amended procedures for all incoming students in the 2014-2015 school year.*

The original date was changed by agreement of the Parties and Special Master.

II. EXECUTIVE SUMMARY

The USP directs TUSD to improve the academic achievement of African American and Latino students and to ensure that African American and Latino students have equal access to TUSD's Advanced Learning Experiences (ALEs). ALEs include: Gifted and Talented Programs, Advanced Academic Courses (AP, Pre-AP, Dual-Credit), and University High School (UHS). Historically, UHS has had disproportionately low African American and Latino student populations compared to the rest of the TUSD's high schools. The revised admissions process is one of several strategies to attempt to increase the percentages of African American and Latino students, including ELL students, enrolling and succeeding at UHS.

TUSD has worked to review and revise the process and procedures that it uses to select students for admission to UHS to ensure that multiple measures for admission are used and that all students have an equitable opportunity to enroll at UHS. This review and revision has included consultation with experts regarding the use of multiple measures, a review of best practices used by other school districts in admitting students to similar programs or schools, and ongoing consultation with the Plaintiffs and Special Master. .

The new proposed admissions process will be applied in a fair, equitable, and race-neutral manner. Although TUSD endeavors to positively impact the percentages of African American and Hispanic enrollment and success at UHS, the proposed application process is designed to be impartial and to offer equity and fairness to all students who apply.

III. DEFINITIONS

Unitary Status Plan (USP)	The USP is a federal-court mandated plan to guide TUSD in its efforts to achieve “unitary status” by eliminating the vestiges of a “dual-system” that operated until the 1950s.
Parties and Special Master	The USP stems from a federal school desegregation court case called <i>Fisher-Mendoza v. TUSD</i> . The parties to the case include TUSD, two plaintiffs groups representing African American and Latino students respectively, and the United States of America, represented by the Department of Justice. There is a court-appointed “Special Master” who oversees implementation, including monitoring and reporting, on behalf of the federal court.
Advanced Learning Experiences (ALEs)	USP Section V(A) identifies TUSD’s GATE Programs, Advanced Academic Courses (AP, Pre-AP, Dual-Credit), and UHS as ALEs. These are areas where there has been historically low African American and Latino student participation in comparison to the percentages of the TUSD as a whole.

IV. BACKGROUND AND TIMELINE

The admissions process was first created through a UHS Advisory Report in 1987. It was revised in 1988, 1989, and 1991 by the UHS Matrix Review Committee. In 1997, the UHS school council adopted revised admissions guidelines. It was revised again in December 2009, and March 2010. The current policy was approved by UHS School Council in April 2011. The purpose of the admissions policy, including the entrance exam, is to recruit and retain a diverse and qualified student population.

In March 2013, the UHS Principal, Ms. Elizabeth Moll, established a UHS Admissions Internal Working Group that included Mike Schmidt, a UHS mathematics teacher for the past twelve years who represents the faculty and serves as a liaison to the Instructional Council, the Assistant Principal Amy Cislak who serves on the UHS Site Council, and Dr. Juliet King, an A&R Research Project Manager, who has managed the school’s admissions for the past four years. With Principal Moll’s retirement at the end of school year 2013-14, the new Principal, Dean Packard, has taken her place. The other members have remained in the Working Group. Additional constituents have been recruited to give input and feedback on the process including: Carmen Hernandez - UHS Learning Support Coordinator; Treya Allen - UHS Career and Technical Counselor; Loraine Blackmon - UHS Office Manager, site council member and UHS Foundation Board member; Terry Adkins - parent and site council member; Matt Ulrich - UHS mathematics teacher and site council member; and Mickey Cronin - student and site council member.

The ALE Director and new principal of UHS were hired on July 1st 2013 and began working with the current working group and expanding the constituent input into the admissions process. The District presented a draft revised process July 20, 2013 for Board, Special Master and Party Review. TUSD staff and UHS, with the inclusion of stakeholders, are working to refine the draft process in time for the 2014-15 admissions period. TUSD will send a revised draft by September 6, 2013, and will continue to consult with the Parties and the Special Master in the refinement of the final plan – set to go to the Governing Board for approval either on September 24, 2013 or, if necessary, on October 8, 2013 prior to implementation. TUSD will send a notification of the possible changes to the new admissions process inserted into the 8th Grade recruitment letter from the ALE Director that was sent September 6, 2013. Notification of any modifications to the current admissions process will be sent to all applicants by October 18, 2013, at the latest.

V. CURRENT ADMISSIONS CRITERIA

Currently, admission to UHS for 9th and 10th grade is based on the following factors: 1) achieving 50 points or more from a combination of points obtained from valuing a student's GPA and entrance test scores, and 2) space availability. Students must have a minimum cumulative GPA average of 3.0 in four core classes – English, Social Studies, Mathematics, and Science. No weight is given for advanced classes, such as Honors or pre-AP.

The cumulative GPA average is calculated from final grades for the second semester of seventh grade and the first semester of the eighth grade school years. UHS currently administers the Cognitive Abilities Test (CogAT) as an entrance exam. The Cognitive Abilities Test has been used as the primary entrance test for over a decade. It is comprised of three sub-tests – verbal, quantitative and non-verbal. In 2013-14 both UHS and GATE (for grades 3-7) will administer the most recent version – the CogAT Form 7 – to grades 3 through 8.

The CogAT's strength is the fact that it is not an intelligence test, nor a standards-based exam (a common type of assessment for "exam schools") but a well-known and norm-referenced assessment of a student's reasoning abilities skills - skills that are not innate and can be developed over time (Loman, 2002). Students must receive a minimum qualifying composite stanine score of 7 on the test to receive points. The current required minimum test score of a 7 on the Composite Stanine is equivalent to a 77th percentile rank and allows for students that may not score a 7 or higher in each sub test the opportunity to still meet the entrance requirements by obtaining higher scores in one or more sub test categories. Points are awarded for GPA and test scores according to the following tables. A minimum of fifty points and above qualifies a student for admissions to UHS. (See Chart below, page 3)

In the past the Ravens test was used as an additive component to supplement student scores. The Ravens test is now available online which makes it ineffective as a measure. Therefore, it was removed as a component of the admissions process beginning in SY 2012-2013.

GPA	Points	CogAT Stanine Test Score	Points
4.00	36	9	27
3.99-3.86	34	8	24
3.71-3.58	32	7	21
3.71-3.58	30	0-6	0
3.57-3.44	28		
3.43-3.30	26		
3.29-3.15	24		
3.14-3.00	22		

2.99-0

0

VI. REVIEW PROCESS

The UHS Admissions Internal Working Group met several times to discuss the current admissions policy for freshman and to identify areas for review and revision. Early consensus from the working group determined that additional admissions criteria should be objective and well-defined. The initial feeling was that the use of interviews, personal essays and/or staff recommendations could inject subjectivity into the process, and could reduce the transparency and consistency of the admissions.

Since that time, a larger constituent group has had the opportunity to participate in discussions and overview of the admissions process. Multiple experts have been contacted and additional research has been completed as TUSD adjusted to the UHS principal transition and the hiring of an ABE Director. In addition, feedback has been received from the TUSD School Board, the Plaintiffs, and the Special Master. To this end, a more complete outline of a draft admission processes is outlined below.

A. Expert Analysis

Multiple experts were contacted and interviewed regarding best practices, multiple measures, and other related topics.

Experts Contacted:

1. Kenneth Bonamo (Principal, Scarsdale High School, Scarsdale, NY) September 5, 2013
2. Dr. Chester Finn (co-author, Exam Schools) August 22, 2013
3. Jeannie Franklin (Director, Division of Consortia Choice and Application, Montgomery County Public Schools) Pending (September 9, 2013)
4. Dr. Angela Hockett (co-author, Exam Schools) August 21, 2013
5. Dr. Lannie Kanevsky at the Simon Fraser University (expertise in Academic Resiliency/Motivation scales) July 2, 2013
6. Kelly Lofgren (Admissions Coordinator, Illinois Mathematics & Science Academy [IMSA], Aurora, Illinois) August 16, 2013 (email)
7. Dr. Tonya Moon, University of Virginia (expertise in Gifted Education and Academic Diversity) August 22, 2013

See Appendix A and AA for summaries of interviews.

See Appendix K for expert reports

DRAFT

University High School Admissions Process Revision

In discussions with these multiple experts regarding analysis of current "Exam School" best practices, the general consensus is that the use of multiple and varied methods of analyzing students for the basis of admissions yields a more complete picture of the students and is deemed a best practice. When looking at what factors most impact the diversity of the schools, feedback was given that expanding the school, improving recruitment, and improving feeder pattern educational practices have the greatest impact on increasing the diversity of the school.

In these endeavors UHS has been making strides for the past few years. Recruitment efforts have included steadily increasing the amount and accuracy of information being distributed about UHS, and this has resulted in an increase in the number of students entering UHS to over 300 in the current freshman class. During this same time period, there has been a steady increase in the percentage of Hispanic students attending UHS, although the same increase was not seen for African American students. Current size restrictions limit the number of students who are able to attend UHS; given the increase in students qualifying for admission to UHS, this is a concern. Further, UHS has hosted two events with feeder schools to work on vertical articulation of curriculum to help feeder schools prepare students for the rigors of UHS.

See Appendix B for Hispanic and African American student enrollment data.

B. Exam Schools - Current Practice

Various exam school web sites were analyzed, application packets investigated, and personnel contacted, when possible, for an understanding of current practices. In general, these schools used multiple measures and supported a more holistic approach to the admission process.

Exam Schools Reviewed:

1. Illinois Mathematics and Science Academy (IMSA) Aurora, IL
2. Thomas Jefferson High School for Math and Technology Alexandria, VA
3. Liberal Arts and Science Academy High School Austin, TX

See Appendix C for detailed information on each school; Appendix D for Review of Top-Rated AP High Schools; Appendix E for Review of Exam Schools

VII. PROPOSED ADMISSIONS PROCESS REVISION

In discussions with experts and with those involved in the development of a quality admissions policy, it has become clear that it is best practice to work on a process for implementation that includes the use of multiple measures and a continuous evaluation of this implementation. After meeting with experts and working with constituent groups, we would like to propose the following multi-year process for implementation and analysis of UHS admissions, in collaboration with the Plaintiffs and the Court. This process will allow for:

- 1) flexibility in meeting admission timelines while developing multiple criteria and
- 2) using a varied approach to admissions at UHS, both for the 2014-15 SY and in the future.

The development of a process for implementation and evaluation of admissions, instead of a static policy, will allow all parties the opportunity to better understand how the different proposed changes impact admissions. The outline below looks at a two-year process; however, we would also like the process to be that of continual analysis and improvement over time. This would include analysis of other testing in the future, including the use of the Partnership for Assessment of Readiness for College and Careers (PARCC) as an option.

YEAR 1 (for students applying in 2013-14 to enroll in 2014-15) PILOT ADMISSIONS PROCESS

A. Freshman

1. Eighth grade students that apply for admissions for the 2014-15 school year will complete a *pilot admissions process*.
 - a. Students will take the Cognitive Abilities test (CogAT) – Form 7.
 - b. Testing sites will be arranged for all middle schools that have applicants on site.
 - c. UHS will have two alternative testing dates on site for any student unable to test at their home school or students from outside the district.
 - d. A minimum composite score of 7 will qualify students for points towards admission.
2. GPA
 - a. A student's cumulative grade point average (GPA) is calculated from final grades for the second semester of seventh grade and the first semester of the eighth grade school years.
 - b. A minimum cumulative GPA of 3.0 in four core classes – English, Social Studies, Mathematics, and Science will qualify students for points towards admission. No weight is given for advanced classes, such as Honors or pre-AP.

3. Academic Motivation Test (CAIMI OR OTHER RELEVANT MEASURES)*
 - a. All current 8th grade students will pilot a motivation test (CAIMI OR OTHER RELEVANT MEASURES) during the Fall of 2013.
 - b. All non-district students that have applied and taken the CogAT will pilot a motivation test.

4. Point Structure: Remains. For the first-year pilot, the motivation test will be used as additive (see below). After the first year, we will look at the motivation test scores and reevaluate the weight/point distribution at that time.

Given the results using the current point structure and awarding bonus points from the use of an additional assessment appear to increase the percentage of African American and Hispanic students that could be admitted to the school. *See Appendix J*

**Dr. Lannie Kanevsky recommended the Children's Academic Intrinsic Motivation Inventory (CAIMI OR OTHER RELEVANT MEASURES).*

B. Sophomores

1. Freshman students that apply for admissions for the 2014-15 school year will complete a pilot admissions process.

2. Students will take the Cognitive Abilities test (CogAT).
 - a. UHS will have testing on site.
 - b. A minimum composite score of 7 will qualify students for points towards admission.

3. Transcript analysis/GPA
 - a. A rubric will be developed to weight GPA and transcript analysis that yields higher values for higher GPA and honors/advanced coursework. For example, a student could be given an additional point for taking an advanced level class, regardless of the grade earned.
 - b. A minimum cumulative GPA of 3.0 on a 4.0 un-weighted scale in four core classes – English, Social Studies, Mathematics, and Science will qualify students for points towards admission.

- c. Students must be on track to graduate with a UHS diploma. (Appendix E)
4. Academic Motivation Test (CAIMI OR OTHER RELEVANT MEASURES): All applicants will pilot the CAIMI OR OTHER RELEVANT MEASURES.
 5. Non-Cognitive Admissions Component (Sedlacek and Brooks): Questions would be developed for short answer responses that would be given at the same time as the Motivation assessment. These questions would be related to the seven non-cognitive variables from Sedlacek and Brooks. *See Appendices F and G for information and examples*
 6. Teacher Evaluation: Students will submit teacher recommendations similar to the exemplar used by IMSA. *See Appendix H for examples of teacher evaluation form.*
 7. Rubrics will be developed for the non-cognitive admission component and teacher recommendations. The development of the rubrics will be done in consultation with outside experts. *See Appendix I for example of rubric.* An extensive evaluation of each admission component will be conducted to analyze the effectiveness, efficiency, and impact on actual admissions.

C. Juniors and Seniors

A UHS diploma carries with it a level of expectation and signifies success in an extremely rigorous and challenging academic setting. The criteria for prospective Junior and Senior Admissions reflect the preparation of current UHS students at this level. Any admissions of Juniors and Seniors is subject to space availability. There may be times when no Junior or Senior students will be admitted. If there are openings and applications are accepted, the following criteria will be piloted:

Students must:

1. be on track to graduate with a UHS diploma. (Appendix E)
2. demonstrate successful performance on the State's standardized test requirements for graduation.
3. have earned an Exceeds on the AIMS or the equivalent ratings on future testing on two of the subject tests, reading, writing and mathematics.
4. GPA of 3.0 or higher in all previous coursework.
5. score of 167 or higher on the PSAT or a score of 1670 or higher on the SAT.

YEAR 2 (for students applying in 2014-15 to enroll in 2015-16)

The Year Two process is an extension of the pilot process that was used for sophomore students in Year One. Based on an extensive evaluation of the Year One process, including analysis of each component and their effectiveness and efficiency, the functioning components of the list below will be used.

A. Freshman and Sophomores

1. All eighth and ninth grade applicants will be given the CogAT to determine eligibility for UHS admissions for the 2015-16 school year. A minimum composite score of 7 will qualify students for points towards admission.
2. Transcript analysis/GPA
 - a. A rubric will be developed to weight GPA and transcript analysis that yields higher values for higher GPA and honors/advanced coursework. For example, a student could be given an additional point for taking an advanced level class, regardless of the grade earned.
 - b. A minimum cumulative GPA of 3.0 on a 4.0 un-weighted scale in four core classes – English, Social Studies, Mathematics, and Science will qualify students for points towards admission.
3. Academic Motivation Test (CAIMI OR OTHER RELEVANT MESURES): All eighth and ninth grade applicants will take the CAIMI OR OTHER RELEVANT MESURES.
4. Non-Cognitive Admissions Component (Sedlacek and Brooks): Questions would be developed for short answer responses and would be given at the same time as the Motivation assessment. These questions would be related to the seven non-cognitive variables from Sedlacek and Brooks. *See Appendix F.*
5. Teacher Evaluation: Students will submit teacher evaluations similar to the exemplar used by IMSA. *See Appendix H.*

B. Juniors and Seniors

See Year 1

VIII. REVIEW

UHS will create a committee that will review the process and results of admissions yearly. Changes will be considered for the next admissions cycle.

IX. RECRUITMENT AND RETENTION

While recruitment and retention are not part of this Admissions Plan, they are a significant component in UHS's work in increasing and maintaining the diversity of the campus. On-going efforts are in place to improve recruitment of eligible students, as are the development and improvement of student support systems, many of which are already in place. Data will be used to analyze recruitment efforts, retention of students, and their successful completion of the UHS curriculum.

I	Admissions Rubric	48-49
J	Three-Year Testing Data	50-51
K	Expert Reports	52-56

APPENDIX A

University High School: Admissions Revision for SY 2013-14
Appendix A: Expert Interview

1. Dr. Kay Hockett interview (August 21, 2013)
2. Dr. Chester Finn interview (August 22, 2013)
 Martha G. Taylor – notes

1. In your review of “exam schools”, what would you consider are some of the ‘best practices’ that exam schools are using in terms of admissions criteria? and what would you consider are some of the least successful? obviously this is weighed against what a schools objective’s might be and there are several that we have identified: e.g. A student’s preparedness for the advanced coursework, success in completing a 4 year rigorous AP curriculum, and ability to attract a diverse demographic population including underrepresented students
 - Best practices are holistic, much like colleges use. A multi-faceted approach is best as you need to move beyond on factor. *Single criteria process is antiquated; should not be “do or die.” Good examples of holistic approach are IMSA and TJHSSM.*
 - *Multiple factors need to be examined. It is not diverse vs. qualified; it is “what does qualified mean?” Not appropriate that it only means good test takers – one moment in time. Should not be just one measure to determine qualified.*
 - *Many exam schools believe that test is effective because it is “clean”; this is an engrained belief – that it is not about race. However, everything is subjective to a degree and has philosophical implications.*
 - This holistic type of process is defensible for both political and best practice perspectives. Goal should be to have student population that mirrors community.
 - Recruitment should be in community (churches, neighborhood centers, etc.)
 - Should have multiple people looking at applications. Rubrics are good to use.
 - *Admission process should have internal consistency with school & district’s mission and vision.*

 - Not one way; test score and cut-off can be subjective not just objective; prefer holistic method like a small private college (grades are frequently not used, recommendation, personal statement, test scores, interviews, problem-solving questions)
 - Good when admissions is divorced from school TJ & NYC); removes onus from school and insulates principal from political process.
 - If there is a large demand from community for this type of program, district should increase number of schools instead of making process more selective.
 - Admissions processes that are problematic? Pure exam schools that use a single test score are not recommended. This is not a good way to make any important decisions in life. One point in a score should not make a difference. It is efficient and safe but not much else is going for it.
 - Some quantitative approach based on market-basket factors (GPA, Test, etc.) Some admit all over cut-off score so no further selection (New Orleans)
2. Academic tests: Schools use a variety of different tests to assess academic achievement (e.g. standards based, achievement tests, cognitive assessments). Were there any differences you noticed between the type of these assessments that led you to believe that the implementation of 1 was more successful than another.
 - Not necessarily. Some used professionally developed and others used tests developed at school level. All are similar. Some use IQ-type tests; this is what the CoGAT is most aligned with.
 - a) Just recently we have begun to see an increase in “institutional” test prepping from schools in our community – was this a common problem for the schools and how were they addressing this issue? Was this a motivational factor in creating their “own” assessments?
 - It has come up. Test prep is a cottage industry in parts of the country – CA & NY.
 - Chicago Public Schools (CPS) – measures achievement on test AND achievement relative to peers. Now have a minimum score all applicants have to achieve.

 - Some schools do own test; some hire Pearson or another company to do one for their specific school. One kind of test is not better than another.
 - I am wary of one test score/number being the determiner.
 - Test Prep programs rampant in high SES; Proliferation argues for the holistic approach. Produces own SES discrimination.
 - Some schools (TJ) make everything known. Even public info does not solve this problem.

University High School: Admissions Revision for SY 2013-14
Appendix A: Expert Interview

-
- HS are captive of feeder schools preparation of students. The drawbacks and limitations students bring with *then are out of a HS's control.*
3. Non-academic assessments: As a result of the review we are conducting, UHS is looking at other types of measures to assess students' preparedness – and specifically proposed the use of an “academic resiliency scale” or a “motivation” scale that measures student persistence or motivation around learning. In your research, did you come across other schools that had adopted such instruments as part of their admissions policy and what was their experience using this type of instrument?
- No. It is not used, although some schools are interested.
 - Can tap into motivation using personal essays, etc. This helped TJHSST
 - Most schools use GPA – many said at least a 3.; some looked at courses taken (higher level).
 - Some considered what the student's options were if not admitted (*rural area, math/science interest, etc.*); this results in a more practical and realistic look at S
-
- *I don't know. Our research did not get into types of tests used.*
 - I am skeptical that a test can measure motivation but *maybe I don't know of a good one.*
 - Any opportunity for student expression (interview, personal essay) and/or a teacher recommendation could reveal motivation. Could ask: Why do you want to come to this school? Can you give evidence from your personal experiences that will show that you will do well in this school?
4. “Subjective measures”: One area of controversy has been the use of more “subjective” measures. What did you find was the most successful way schools used “personal statements” and student essays? Teacher recommendations?
- Success should be based on mission and vision of district/school.
 - TJHSST and IMSA use multi-faceted approach. Big-Committee model for first round; Committee does not see anything quantifiable and makes recommendation using rubric. There is close examination of S as an individual and not just as a number. No great success yet but working towards a worthwhile goal.
 - Teacher Recommendations: frequently used with GPAs
 - The traditional T. Rec. is not taken very seriously. Seen as opportunity for teacher to explain low achievement or other problems. Used with student who have low numbers in as process that traditionally looks at only the numbers.
 - More holistic type (IMSA & TJHSST) – taken as good evidence; several options for qualities of character. Particularly like the one used by IMSA that has personal qualities and then a rubric for each quality.
 - Personal Statement – trained members used rubric
 - Concern about subjectivity? Even the choice to use a test is a subjective decision. You cannot take the human element out of it. Most important is follow-up.
 - *Many schools use matrix; this is the old way and the reasoning is, “This is the way we've always done it.” Not recommended.*
-
- This is the challenge of holistic system – validity and reliability not possible in the traditional sense. No fancy measure because you are dealing with the human element.
 - Quantitative is easy to explain to the public vs. human judgment that is an evaluation of others
 - Not easy
5. The use of race: Obviously one of the issues surrounding admissions policy is the question of diversity and the use of considering “race/ethnicity” a factor in admissions. What did you find had been the schools' experience with using race/ethnicity as part of the criteria? Geography often seems to be a common proxy for that? Others – e.g. income?
- Usually a proxy for race is used. SES or Free & Reduced are most common proxies. Sometimes geographical location can be used (CPS).
-
- *Schools frequently don't want to talk about this sensitive subject. Pleasantly surprised by diversity of school studies as a group vs. individual schools that have predominantly one race.*
 - Exam schools frequently best integrated by % but almost never reflect the community as a whole

University High School: Admissions Revision for SY 2013-14
Appendix A: Expert Interview

-
- *Tough to balance in admission process; can't use race itself but can be a factor. Geography & SES are frequently proxies.*
 - *I don't believe in admitting only on race; need other qualities but can do proxies. Broader reach than just TUSD would be good. (explained to him that there are no % limits in place currently although the priority is to TUSD students).*
 - *Heroic efforts seen – reaching out to MS, summer programs, school visits, etc. BUT feeder system needs to do a better job of education and preparing these students.*
 - *Some schools take students on a trial basis (Austin, TX); don't quite meet but have a fighting chance. Risk for all parties; don't know how successful this model is.*
6. You conclude in your final summary that schools' admissions processes typically fall into 1 of 2 categories – heavy reliance on “numbers” vs. a “more holistic student by student approach. Did you draw any conclusions about the pros and cons of each approach? Do you have an exemplar?
- *Our book was about identification only so we didn't evaluation pros and cons.*
 - *My opinion – should work to closely mirror community; many schools are now trying creative approaches although none are yet completely successful.*
-
- *Should contact Scarsdale HS principal in NY (was in Queens); proud of not relying on test scores alone, proud that his school is not like exam schools; argues that test score reveals good test takers but not other qualities like motivation; direct and thoughtful comments from him.*
 - *IMSA – J. Hockett believes this is optimal admissions process – multi-dimensional and they consistently reevaluate; I did not visit and defer to her expert opinion.*
7. Factors that make most difference and have the most impact?
- *Feeder Schools – not much emphasis on this approach; acknowledge there are differences that must be dealt with.*
 - *Going into community (like IMSA and Jefferson County in Kentucky) is crucial. Leads to broader outreach and more success in recruiting. Do not rely on them coming to you (at schools).*
 - *Money and resources affects what any school can do; different depending on if school or district is responsible.*
 - *Advocate for broader more inclusive holistic system in general that aligns with mission/vision of district/school.*
-
- *Need to widen applicant pool with qualified students & build large and diverse pool of applicants; again comes back to feeder system and problems endemic with that. Building feeder system is surest way to increase diversity.*
 - *High-achieving students of color don't apply to selective colleges because they don't know about those opportunities; no one in their life has encouraged or told them about those options. Community college is usually their only known option.*
 - *Outreach needs to include local influential Af Am and Hisp individuals; organization outside of school system (Civil rights, political, religious), mentors that aren't scholastic (Sunday school teacher, YMCA coach)*
 - *Largest waste of human capital in USA is smart poor kids*
 - *Conclusion of our book – open more selective schools; there is a strong place for stand-alone schools – need them + AP, IB, etc. in regular schools; whole-school approach has a lot going for it – peers, curriculum, environment, critical mass → all are needed by some students*
 - *Whole-school approach could be completely open – have to pass certain courses or you must leave; this is harsher than than being selective at the beginning.*
3. **Dr. Lannie Kanevsky (on Academic Resilency/Motivation scales)**
 July 2, 2013 (conducted by Juliet King)
- **What are we trying to measure?**
*Resilience definition: a) “persistence” - “adapt” to challenging situation; “stick to it ness”; “support”
 b) “resourcefulness”*
 - *Explained that split in the literature between “positive” vs. “clinical” - identifying positive strengths within teachers vs. using it to identify at-risk students for interventions. Such measures have been used to analyze medical school applicants in Canada*

University High School: Admissions Revision for SY 2013-14
Appendix A: Expert Interview

- Resources: Ordinary Magic: Resiliency practices in development – Marsten; Mind Set; *Currently studies “character”*; mentioned Andrew work
- Measures: Measure of Academic Intrinsic Motivation – *Godfried/ Godfried; Children’s Academic Intrinsic Motivation Inventory* – Mind Set

4. Dr. Tonya Moon, University of Virginia, College of Education

August 22, 2013 (conducted by Juliet King)

- Has consulted with Thomas Jefferson High School in Fairfax County and Richard Maggie Walker in Richmond in planning, implementing, and evaluating admission policies.
- Spoke mostly about TJ because that was the school she was most familiar with:
- Key findings:
- 5-6 year process in revising and implementing admissions process
 - TJ is primarily a math-science school and therefore math/science emphasized in testing
 - Admissions process is 8 months long
 - Every year there is a ½ day training for using the Rubric scoring scheme in February – week long scoring
 - Every year there is a ½ day training for how-to review the teacher packets in March – week long scoring
 - Final decisions go out in April
- Create “student score profiles”
- Use multiple measures that include:
 - December: Standards based assessment that measures student’s knowledge in core content areas (math/science emphasized). Assessment is created every year and taken in December. 3000 applicants go down to 1500-1600.
 - January: Students write 2 essays (drawn from essay bank) for 1 hour. 1 essay is a self-reflection. The other is responding to a question about a problem in a real world context. Essays are evaluated as to how well responses align with the TJ mission. Up to 30 raters
- 480 students selected.
- Admissions does not result in increased diversity.
- Maggie Walker is currently in planning stage to address admissions.

5. Kenneth Bonano, Principal @ Scarsdale High School

September 4, 2013 (conducted by Martha Taylor)

(recommended by Dr. Chester Finn as expert on holistic approach to high school admissions)

- Personal beneficiary of same type of school with holistic method– Staten Island Technical High School (SITHS) – returned to teach in 1998 for ten years
- 2005 school switched to specialized test; taken in fall of 8th grade – optional on Sat or Sun; admission to seven schools based SOLELY on results of this test
- SITHS opened as gifted high school and used data of MS record and picked indicators of student who could succeed in academic challenging school: Grades core subjects, state test reading and math, attendance (90%) – many applications so could not use subjective measures (85-2005)
- Townsend Harris in Queens – also uses more holistic approach; 5000 applicants for class of 280. Principal. Did the same as above – see web site. 1) 90% av. in each class, 90% on state test, 90% attendance. 2) rank students based on average of seven numbers
- Could use geography (as proxy for race) with straight rank all seats will fill from top schools SES. To mitigate you could group students by zones high schools. Then take top % from each middle school.
- Professional using personal experience: When you use only one test end up with highly intelligents but not all good students = unmotivated; when you use holistic approach almost always end up with good students, most of whom are intelligent = hard working, eager to please, even if not the highest IQ; succeeded in easier environments and now

University High School: Admissions Revision for SY 2013-14
Appendix A: Expert Interview

in a more challenging environment; provided support and very few existed out. Found a way to help them succeed. Tended to work out bc they were good students.

- At SITHS when we went to sole test – had students who were smart and capable but were sociopathic; no T would ever have given them more than 85% on a grade = test does not allow T subjectivity. With holistic approach the T subjectivity is factored in (through grades = academic behavior [resiliency, cooperation] → helped set tone in school
- With holistic approach – no cutting class, homework always done; With just test – S don't do homework, have bad attitude
- 75-80% percent are the same students. Remaining 10-20% can change the school environment completely; within a year so much admin time was directed to recalcitrant students and troubled students; with test there is no way to filter out these students. Which fringe do you want?
- Magic Wand – Verbal/Math aptitude test and holistic evaluation; grades and state test more content/achievement based and are better measures than aptitude (can do it but not if they actually do it)
- Could use Buckets metaphor – by geography / middle schools; top 10% from each MS – TX does this for college; argument for geography as proxy – GPA differs from school to school by at each school they rise to the top among their own classmates;
- Attendance – always allowed for extenuating circumstances. Guidance Counselors flags. Waive attendance requirement.
- Familiar with principals at both high schools – happy to make introduction

6. Jeannie Franklin – 9/9/13

Director, Division of Consortia Choice and Application,
 Montgomery County Public Schools; Rockville, MD
 September 9, 2013 (conducted by Martha Taylor)

- Talked to Maree Sneed – selection process
- In charge of - Selection of magnet program; I do not do curriculum
- Team approach to selection process: seven elementary magnets – competitive; 3 MS and 3 HS sites – all competitive. Have geographic boundaries (regional/county-wide); press releases and memo to principals – limited seats
- At HS and MS – have admin position attached to selection process – managing files and criteria; implemented at school-level; each manage own selection process – but with central management overview of plan; meet with central regularly; test together (MS and HS separately); use HS – Pearson test; MS – SCAT (Johns Hopkins test), essay portion (for Humanities Magnet) – during testing/handwrite and Raven
- HS/MS - create own outreach plans; target outreach and it does increase number of applicants; when target underrepresented S – apply but don't perform as well = typical outcome when using standardized assessment; each school comes up with bank of outreach – meet with counselors, go into classrooms – before → might do crucial thinking activity, sell the programs, work with other S with same interests (based on magnet program); Common Core – differentiation within class as opposed to moving S to higher level; could previously target US into higher math – don't know if we can do that now; could talk to higher-level math S during the school year – that was quite effective; with Common Core – go to high minority/high achieving S
- Had great success in attracting US – rate of selection has stayed the same =- saying “no” to more S;
- ES – send out app to all highly gifted in 3rd to all families based on region – leads into specific HS; program is for grades 4 and 5; couple of informational meetings; advocacy process in schools – memo sent to schools, with underrepresented S; school teams are responsible – GT school recommendation team; position for each ES (.2 – to coordinate); key contact person – help school team look at S lists, S talks, look for S that may have depressed scores but T can advocate for them; please send me the Memo
- Biggest gains at ES – found that S who generally (AA Hisp) participate in Highly Gifted in 4th/5th – tend to have higher rate of selection in middle school gifted programs.

University High School: Admissions Revision for SY 2013-14
Appendix A: Expert Interview

- MS/HS – working with grade 8 students – magnet HS for computer and/or math – greatest lack of AA and Hisp; highly competitive; these are most competitive for diversity – coordinators build relationships with principals – target high math classes in 8th grade at high poverty schools (access issues – confidence, security, etc); aware and present – work with NAACP
- Memo to MS principals about process; encourage principals to advocate for S at school before they apply; nurture them and encourage to apply – let them know not all get invited but try; learn to take risks for future
- IB – one is competitive and others are self-selected; 100 seats and 900 applicants; for this program, more girls; math science more boys; humanities programs tend to more diverse than math-science; one of our goals is that if 15% are AA then 15% invitations are AA = spirit of equity; need equity everywhere; usually half of what is wanted/goal
- Some targeted outreach – try to target schools that are preparing S at high level = critical mass; apply together, accept together and created culture of applying and attending; some US are invited and decline; invitation rate is still disproportionate
- MS/HS Criteria = at 8th grade → 1) Assessment (Pearson – done for Montgomery County), 2) essay during test GPA (open-ended Q, get 60 minutes, one-page front and back; score by two scorers hired by system (former Ts with engl background use rubric – read about 900 essays total 3) School recommendation piece (only at ES) – Qs answered by school team (counselor puts together team 2-3 people – most important info from core content Ts), 4) school advocacy to surface S who are non-traditional applicants, needs can't be met at home school = principal final signature but anyone in school can advocate for a particular S 5) GPA 6) admission essay – typed at home 7) T recommendations; *in general; small changes for different magnet schools (only at HS)
 - Over ten years has increased AA/Hisp S in high schools; multiple criteria has improved it over time; still have work to do bc still at half of what we want; before we were at 10% AA and invited 2%, now we invite 5%; improvements slow
 - Model that is successful = preparation program (Young Scholars Program – grades 2nd – 5th); impacted areas only – have Saturday school (\$50 for whole year and work with T); not working with S who need enrichment but w/ student who are above grade level and support them. 4-5 years and is working = 24% invited vs. 19% in reg pop)
 - Bc of test prep not level playing field; problem – change test but...; YSP not test prep but higher-level thinking skills and activities
- Results – in ES School Advocacy – despite depression of scores would still be a good match; not always invited but do have a higher rate of invitation – get strong look; individual decision per file – no rubric used – looking at whole profile of S;
- MS → struggle to get MS principals to advocate – time consuming; this year adopt a few principals and encourage them to have staff to advocate – committed, persistent, work hard, problem-solving, etc. Narrative about non-traditional S;
- Entrance Committee - ??
- Assessment - ES – looking to use the COGat; new test; deal with test prep
- Parent concerns – test prep booklet (few pages of examples, testing format, not actual Qs, time limits, 504/IEP info, etc.) vs. \$800 weekends test prep program

APPENDIX AA

Taylor, Martha

From: Kelly Lofgren [klofgren@imsa.edu]

To: Taylor, Martha
Subject: Re: Copy of Application
Attachments: Review Committee Training Draft for '13.ppt

Hi Martha,

When our counselors read the admission files we simply take notes to present the file to the Selection Committee. Prior to that we have a group of internal and external evaluators (a process we call Review Committee) assign a value from 40 - 80 to the qualitative aspects of the file. The values are used in the decision-making process and are assigned based on the guidelines in the attached training.

The application itself hasn't really had any impact on recruiting and enrolling underrepresented students, though in the decision-making process we certainly look for academic achievement and passion for math and science based upon an applicants unique circumstances.

For recruitment purposes we've created many pipeline programs, which you can learn more about here: <https://www.imsa.edu/admissions/multicultural/multiculturalPrograms>, and here: <https://www.imsa.edu/admissions/multicultural/multiculturalPrograms>. These programs have been very effective, but they are quite time-consuming and expensive.

Kelly – Thank you SO much. I have two additional questions:

1. Would it be possible to send me the rubric you use to evaluate the student essays?
2. Has your application process/requirements been effective in increasing the number of underrepresented students admitted to IMSA?

Again, thank you so much for responding to me.

Hi Martha,

Attached is our admissions application from last year, and our new one will be posted on September 1st. We are planning to change several of our essay questions this year, but have yet made final decisions. Please feel free to reach out during your review process. We are always looking for ways to improve our processes and recruitment as well.

Best,

Kelly

Dear Kelly and/or Phyllis:

I am currently investigating admission policies of "exam schools" as our district is under a court order to revise the admission process of our exam high school. I am very interested in the process IMSA uses and have found quite a bit of information on-line. However, I cannot find a copy of your application since it is now closed nor any sample essay questions, which I would like to see. Would it be possible to send me an old application from 12-13 and some examples of essay questions used in the past?

Thank you so much for your help.

APPENDIX C

University High School: Admissions Revision for SY 2013-14
Appendix C: Exam School - High School Information

1. Illinois Mathematics and Science Academy (IMSA) Aurora, IL

Admission to IMSA is determined by a competitive process in which all applicants are required to submit a specific set up materials. The competitive nature of the selection process does not permit the establishment of a pre-specified set of cut off scores but rather students who present the strongest combination of credentials are invited to attend. IMSA utilizes an accomplishment-based selection process that incorporates performance on projects and participation or leadership in extracurricular activities with more traditional indicators of talent such as test scores and grades. For this reason, students with the highest test scores may not emerge as the strongest applicants in the pool for the purpose of selection. Along with these criteria, geographic and demographic variables are considered to ensure a diverse student population.

Application evaluated on the following questions:

- To what extent did student take advantage of local resources?
- To what extent student clearly demonstrate talent, interest, and motivation beyond the bounds of the classroom when available?
- Is this student enrolled in the most challenging curriculum available to them?

Reviewers will look for:

- Reasoning and curiosity demonstrated by specific achievement or activities
- Communication skills demonstrated by written responses to questions
- Interpersonal skills demonstrated by evidence of understanding viewpoints other than your own
- Skill application demonstrated by activities such as computer programming, musical performance, construction of models, etc.
- Leadership based on reports from teachers of observed behavior and/or specific accomplishments

Application

- Biographical Information
- Activities, Involvements, Achievements
 - Optional Statement (We attempt to identify those applicants whose previous school grades or admission test scores may under predict academic success. Among the factors we consider in making admission decisions are whether the applicant 1) is from an economically disadvantaged environment, 3) had a health problem which is significantly affected for a period of time, an otherwise exceptionally good academic record; 3) has a permanent physical disability, learning or attentional difference; 4) has completed an exceptionally rigorous academic program; 5) does not speak English at home, or 6) has other exceptional circumstances. This information is considered with your academic credentials. It is particularly relevant if your qualifications place you slightly below the competitive applicants. **Describe any factors like those listed above that you believe the selections committee should consider as they review your credentials.**
- Student Essay Questions → Examples: Describe a time when you experienced success and its impact on you. Please describe yourself to your classmates and teachers. What interesting information would you want others to remember about you? (500 words or less).
- Parent Statement
- Teacher Evaluations
- Principal/Counselor Evaluation
- GPA/Transcript
- SAT exam score

Multicultural Recruitment Programs:

EXCEL: During the process of admission to IMSA, students are sometimes identified as having exceptional potential but as not having had access to key academic opportunities. The Excel program serves students who are conditionally admitted to IMSA, pending their successful completion of the Excel program. Successful completion of Excel allows full admission status to IMSA. The three-week, residential program takes place during the summer immediately prior to the planned admission. Excel program activities include the three-week summer program and ongoing support programs throughout the school year including: study groups, academic advising, connections with faculty and staff, tutoring opportunities, cultural enrichment and appreciation activities, and an overall support network designed to help students be successful at IMSA. During the summer program students engage in mathematics, science, and English classes designed to expose students to concepts they may be unfamiliar with, which will be critical to later success at the Academy. In addition, the co-curricular component of Excel allows for interpersonal skills development, and a chance to become familiar with the IMSA environment and culture. The summer portion of the 2013 Excel program will take place in July on IMSA's campus. Two to three weeks after placement testing students will be notified if they have been selected to participate in Excel.

PROMISE: Serving underrepresented and economically disadvantaged students who have talent and interest in mathematics and science is a high priority of the Illinois Mathematics and Science Academy. We believe that we must actively recruit from all regions of the state of Illinois. In addition, we believe we must address the challenges of underrepresented and economically disadvantaged students through contact and intervention in the form of academic enrichment programming early in students' educational experience. After enrolling at IMSA, it is important that students experience the Academy as a place that is welcoming to them as individuals and

University High School: Admissions Revision for SY 2013-14
Appendix C: Exam School - High School Information

supportive of the unique cultural components that each student brings with him or her. The Academy continues to create and develop a culturally rich and inclusive environment that affirms and celebrates individual differences.\

- o Each application is reviewed by a committee that has a rubric and training before this commences. I have been sent the power point that is used at this training.

2. Thomas Jefferson High School for Math and Technology **Alexandria, VA**

Students are selected for TJHSST through a competitive admissions process. We are looking for highly motivated students with diverse backgrounds, talents, and skills, who demonstrate:

- High ability, aptitude, and interest in math, science, and technology.
- Intellectual curiosity and self-motivation to pursue scientific research.
- A desire to be challenged with an extensive curriculum focused in math, science, and technology.
- The highest academic and personal integrity.
- An aspiration to become a member of a community of learners, explorers, mentors, and leaders.
- The capability to become citizens and leaders of the 21st century.

Round 1: Screening (using sliding scale): GPA + Test Score

Round 2: Semi-Finalists: Essays – 25% + Student Information Sheets – 20% (Example questions: What are you best at doing?

Explain your choice. If you could spend one entire day learning about one topic, what would it be? Why? What is your best subject in school? Why?) + 2 Teacher Recommendations – 20% + Math Score from Admissions Test = Math & Science GPA

3. Liberal Arts and Science Academy High School **Austin, TX**

- From the Principal's Letter: We have a very diverse student population. We are lucky to have students from every zip code in Austin. This diversity encourages even richer discussions and debates in class. In addition it allows us to have clubs and organizations that match any and all student interests.
- Application Process:
 1. Application
 2. Activities Chart (includes information on: awards, extracurricular, leadership, outside-of-school activities, volunteering, community service)
 3. Short Answer Responses → Examples: What three words would others use to describe you and why? How do you spend your free time?
 4. Essay
 5. Math/Science Reference Form
 6. English/Social Studies Reference Form (academic achievement, academic potential, intellectual curiosity, effort and determination, ability to work independently, organization, creativity, willingness to take intellectual risk, concern for others, honesty and integrity, self-esteem, maturity (relative to age), responsibility, respect accorded by faculty, emotional stability, personal character)
 7. Grades
 8. Testing Results (EOC/STAAR & LASA)
- Admissions rubric used to evaluate applications, which I have.

The following is not an exam school, but we will be interviewing personnel regarding its admission policies.

4. Montgomery County Public School (Sam Brown) – Interview with Jeannie Franklin Pending

- UHS admissions committee made up of a diverse group of CENTRAL people and maybe one or two site people
- Criteria
 1. Test scores
 2. Grades
 3. MS they come from
 4. ALEs they took
 5. Personal Statement to describe their situation (must be done on sight in a controlled setting, so we know they actually wrote it)
 6. References from MS Principals – each principal could advocate for 3-5 kids who are not “high flyers”
- Every table gets some applications, they look holistically (like an admission committee for a university) and then you
 - o Select the clear high flyers

University High School: Admissions Revision for SY 2013-14
Appendix C: Exam School - High School Information

- Select the students up for discussion with the whole group
- This would be a one day process
- Montgomery County
 - Written statements from candidates, previous grades, coursework, and test scores
 - Biomedical Magnet Program
 - Communication Arts Program (CAP)
 - Engineering Magnet Program
 - Leadership Training Institute (LTI)
 - Science, Mathematics, Computer Science

APPENDIX F

Black Students on White Campuses: 20 Years of Research

William E. Sedlacek

Literature is discussed in terms of eight non-cognitive variables affecting Black student life. The author recommends actions for student affairs professionals.

From the 1960s to 1980s people in the United States have witnessed a broad sweep of social change in the country. With issues pertaining to Blacks, people have seen a complex mixture of overt repression, social consciousness, legal changes, backlash, assassinations, political interest, disinterest, and neglect. Higher education has gone about its business during this turbulence.

There are many ways in which student affairs professionals might try to understand what Black students have experienced during the last 20 years. The purpose of this article is to examine this period through student affairs research on Black undergraduate students at White institutions. Such an article accomplishes several purposes. First, it allows for a focus on an area in which Black students have had to deal directly with a system largely run by Whites for Whites (Sedlacek & Brooks, 1976). Second, it allows one to step back and get a perspective on where student affairs has been and where it to be going. Third, it puts an emphasis on empirical research rather than commentary, wishful thinking, or frustration.

An index of the maturity of the student personnel profession may be found in its success in providing systematic knowledge on which to base its development. The May 1986 issue of the *Journal of College Student Personnel*, with articles by Brown, Cheatham, and Taylor, provided a lively discussion of how student affairs professionals can learn about Black students on White campuses. Should student affairs professionals go to the literature and see what the research says (Brown, 1986; Cheatham,

1986) or offer broad generalizations about Blacks based on a nonempirical synthesis (C.A. Taylor, 1986)? This article is in support of the former position.

The literature was organized using a model based on noncognitive variables that have been shown to be related to Black student success in higher education (Sedlacek & Brooks 1976; Tracey & Sedlacek, 1984, 1985, 1987; White & Sedlacek, 1986). Arbona, Sedlacek, and Carstens (1987) found that the noncognitive variables were related to whether Blacks sought services from a university counseling center.

There are limitations to using the non-cognitive model. These include limiting the articles included, not using conventional categories (e.g., admissions, student activities) that may be easier to understand than the non-cognitive model, and forcing a structure in areas where it does not belong. The two major questions addressed in this article are: (a) What have we in student affairs learned in 20 years of research? and (b) How can we use what we have learned?

DESCRIPTION OF THE MODEL

Sedlacek and Brooks (1976) hypothesized that there were seven noncognitive variables that were critical in the lives of minority students. How students adjusted to these dimensions and how faculty and staff encouraged this adjustment would determine the success or failure of the minority student. Tracey and Sedlacek (1984, 1985, 1987) demonstrated the validity of the seven variables plus an eighth, nontraditional knowledge acquired, by showing the usefulness of a brief questionnaire (the Noncognitive Questionnaire [NCQ]) in predicting grades, retention, and graduation for Black students for up to 6 years after initial matriculation. White

Originally published November 1987. William E. Sedlacek, Counseling Center, University of Maryland.

Black Student Life

and Sedlacek (1986) demonstrated the validity of the NCQ for Blacks in special programs. The noncognitive variables of the NCQ are:

1. *Positive self-concept or confidence.* Possesses strong self-feeling, strength of character, determination, independence.
2. *Realistic self-appraisal.* Recognizes and accepts any deficiencies and works hard at self-development. Recognizes need to broaden his or her individuality; especially important in academic areas.
3. *Understands and deals with racism.* Is realistic based on personal experience of racism. Not submissive to existing wrongs, nor hostile to society, nor a "cop-out." Able to handle racist system. Asserts school role to fight racism.
4. *Demonstrated community service.* Is involved in his or her cultural community.
5. *Prefers long-range goals to short-term or immediate needs.* Able to respond to deferred gratification.
6. *Availability of strong support person.* Individual has someone to whom to turn in crises.
7. *Successful leadership experience.* Has experience in any area pertinent to his or her background (e.g., gang leader, sports, noneducational groups).
8. *Knowledge acquired in a field.* Has unusual or culturally related ways of obtaining information and demonstrating knowledge. The field itself may be nontraditional.

SELF-CONCEPT

Many studies demonstrate that the way Black students feel about themselves is related to their adjustment and success at White institutions (Bayer, 1972; Bohn, 1973; Desionde, 1971; Dixon-Altener & Altener, 1977; Gruber, 1980; Kester, 1970; Stikes, 1975). An early study by Bradley (1967) of "Negro" undergraduate students in predominantly White colleges in Tennessee showed that they had not achieved a feeling of belonging. This aspect of self-concept,

that of seeing oneself as part of a school, or identified with it, is a common thread running through the literature on Black students' self-concept for several decades. For instance, Sedlacek and Brooks (1976), Astin (1975, 1982), and Tracey and Sedlacek (1984, 1985, 1987) provided evidence that identification with an institution is a more important correlate of retention for Blacks than for other students.

In addition to the usual school pressures, a Black student must typically handle cultural biases and learn how to bridge his or her Black culture with the prevailing one at the White university. DiCesare, Sedlacek, and Brooks (1972) found that Blacks who made this transition were more likely to stay in school than were Blacks who did not. Burbach and Thompson (1971) and Gibbs (1974) found that cultural adaptation had an influence on the self-concept of Black students; Sedlacek and Brooks (1972a) and White and Sedlacek (1986) found that this was also true for Blacks in special programs.

Pfeifer and Sedlacek (1974) noted that successful Black students may receive considerably different profiles on standardized personality measures than their White counterparts. The successful Black student is likely not only to seem "atypical" but is also inclined toward and experienced in taking less common paths to goals than the successful White student. Thus, there is evidence that important cultural differences between Blacks and Whites affect the manner in which self-concept is put into practice.

An important area of literature that has been developing concerns racial identity. Cross (1971) presented the model and Hall, Freedle, and Cross (1972) studied four stages of Black identity: (a) *pre-encounter*, when a person thinks of the world as the opposite of Black; (b) *encounter*, when experience disturbs this view; (c) *immersion*, when everything of value must be Black; and (d) *internalization*, when it is possible to focus on things other than one's racial group. Hall et al. (1972) demonstrated that it is possible for lay observers to identify these stages.

Parham and Helms (1985a) found that Black self-esteem is low in the pre-encounter stage, becomes more positive as one reaches the encounter stage but drops as one enters immer-

Sedlacek (1987)

sion, and is unchanged during internalization. Parham and Helms (1985b) found that Black male students were more likely to endorse the pre-encounter stage and less likely to endorse internalization than were Black female students. Ponterotto, Anderson, and Greiger (1985) found that Black female students in the internalization stage had more positive attitudes toward counseling than did Black men in the same stage. Carter and Helms (1987) found that these stages were related to value orientations of Black students. Using other instruments, Kapel (1971); Olsen (1972); Polite, Cochrane, and Silverman (1974); Smith (1980); and Semmes (1985) provided further evidence that cultural and racial identity are related to self-concept.

REALISTIC SELF-APPRAISAL

An important variable that exists in combination with self-concept is how well Black students at White schools are able to assess how they are doing. This self-assessment pertains to both academic issues and student life. Success for any student involves the ability to "take readings" and make adjustments before the grades are in or before fully developing a lifestyle that is not conducive to success. Because faculty members, students, and staff often view Black students differently than they do White students, it is harder for Blacks to get straightforward information on which to base their evaluations of how they are faring.

White faculty members may give less consistent reinforcement to Black students than they give to White students (Sedlacek & Brooks, 1976). For Blacks who are trying to make realistic self-appraisals, faculty reinforcements that are too negative cause as many problems as those that are solicitous. For example, Christensen and Sedlacek (1974) demonstrated that faculty stereotypes of Blacks can be overly positive.

Some researchers have identified poor communication with faculty, particularly White faculty members, as a problem for Black students (Allen, Bobo, & Fleuranges, 1984; Jones, Harris, & Hauck, 1973; Van Arsdale, Sedlacek, & Brooks, 1971; Willie, 1971; Willie & McCord,

1972). Thompson and Michel (1972) found that what they called *grade deflecting*, or the difference between the grade expected and the grade received, by Black students correlated positively with students' perceived prejudice of the instructor. Switkin and Gynther (1974) and Terrell and Barrett (1979) found that Black students were generally less trusting than were White students.

Blacks may find it especially difficult to get close enough to faculty, staff, and other students to become a central part of the informal communication system that is critical in making self-assessments. Nettles, Thoeny, and Gosman (1986) found faculty contact outside the classroom to be a significant predictor of grade point average (GPA) for Black students. Braddock (1981) found such faculty contact more important to Black student retention at predominantly White schools than at predominantly Black schools. Fleming (1984) found that Blacks in predominantly Black colleges were better able to make self-assessments than were Blacks at predominantly White schools, presumably in part because Blacks were more involved in the communication and feedback system in Black schools.

UNDERSTANDING AND DEALING WITH RACISM

There are two components in this variable. First, does the Black student understand how racism works? Can the student recognize it when it is occurring? Does the student have an effective way of handling racism, a way that allows Black students to pursue their goals with minimum interference? It is a curvilinear variable in that a Black student can have difficulty with racism because of naiveté about it or preoccupation with it. An optimal strategy is one in which Black students have differential response patterns to racism. They take action when it is in their best interests and do not take action when it might cause them more trouble than it is worth to them. Each student must make those decisions individually. A Black who "chooses" to confront all examples of racism may be effective in many ways, but he or she is unlikely to remain in school

Black Student Life

or get high grades.

Handling racism is further complicated by the distinction made between individual and institutional racism (Barbarin, 1981; Racism/Sexism Resources Center for Educators, 1983; Sedlacek & Brooks, 1976). Institutional racism involves policies and procedures, either formal or informal, that result in negative outcomes for Blacks. Institutional racism is often more of a problem for Blacks than is individual racism. Tracey and Sedlacek (1987) pointed out the uniqueness of this problem for Black students. How well White students are able to negotiate the campus system predicts their success in school. The same is true for Blacks, except that their treatment by the system will, in many ways, be because they are Black (Deslonde, 1971; Garcia & Levenson, 1975; Webster, Sedlacek, & Miyares, 1979). The following are some of the more common forms of racism faced by Black students at predominantly White institutions.

Admissions

There is considerable evidence that traditional measures such as standardized tests and high school grades are not as valid for Blacks as they are for Whites (Baggaley, 1974; Borgen, 1972; Pfeifer & Sedlacek, 1971, 1974; Sedlacek, 1977, 1986; Tracey & Sedlacek, 1984, 1985, 1987). Most institutions, however, have continued to employ traditional measures for Black students from the 1960s to the 1980s (Breland, 1985; Sedlacek & Brooks, 1970a; Sedlacek, Brooks, & Horowitz, 1972; Sedlacek, Brooks, & Mindus, 1973; Sedlacek, Lewis, & Brooks, 1974; Sedlacek, Merritt, & Brooks, 1975; Sedlacek & Pelham, 1976; Sedlacek & Webster, 1978).

The negative outcomes in admissions for Blacks include being rejected for admission because of invalid measures or being accepted on the basis of "lower standards" that may result in reduced self-esteem of Black students and the increased probability that White students and faculty will stereotype Blacks as less able than Whites. This stereotype, in turn, leads to more negative treatment of Black students.

There are also many forms of institutional racism in the methods employed to study

admissions of Black students, including predicting 1st-year performance before Black students have fully adjusted to the White campus (Farver, Sedlacek, & Brooks, 1975; Kallingal, 1971; Tracey & Sedlacek, 1984, 1985, 1987) and using statistical and research procedures that are biased against Blacks (Sedlacek, 1986). These procedures result in invalid bases for admission decisions made about Blacks. Sedlacek and Brooks (1973) presented an example of using research information to work against racism in admissions.

Relationships with Faculty

The difficulties Black students have with White faculty are discussed above under "Realistic Self-Appraisal." Black students have consistently reported believing that White faculty are prejudiced toward them (e.g., Allen et al., 1984; Babbit, Burbach, & Thompson, 1975; Boyd, 1973; Butler, 1977; Dinka, Mazzella, & Pilant, 1980; Egerton, 1969; Jones et al., 1973; Semmes, 1985; Smith, 1980; Thompson & Michel, 1972; Westbrook, Miyares, & Roberts, 1977). This prejudice can take such forms as lower expectations of Black students than are warranted, overly positive reactions to work quality, reducing the quality of communications, and reducing the probability that faculty know students well enough to write reference letters.

Black students have expressed concerns about the lack of Black faculty and staff in a number of studies (Boyd, 1979; Matthews & Ross, 1975; Southern Regional Education Board, 1971; Willie, 1971). Absence of powerful Black figures as role models has strong effects on the feelings of loneliness and isolation of Blacks. The lack of a variety of viewpoints or cultural perspectives relevant to Black students can also affect their learning, development, and identification with the institution. Sedlacek and Brooks (1973) discussed an example of racism in academic coursework and how to reduce it.

Campus Life

Problems for Black students have been documented in residence halls (Piedmont, 1967) and fraternities (Tillar, 1974), with campus police (Eliot, 1969; Heussenstamm, 1971; Leitner &

Sedlacek, 1976), and in interracial dating (Day, 1972; Korolewicz & Korolewicz, 1985; Merritt, Sedlacek, & Brooks, 1977; Patterson, Sedlacek, & Perry, 1984; Petroni, 1973; Schulman, 1974; Tillar, 1974; Willie & McCord, 1972), athletics (Green, McMillan, & Gunnings, 1972; McGehee & Paul, 1984), and campus life in general (Babbitt et al., 1975; Dinka et al., 1980; Fenton & Gleason, 1969; Fleming, 1984; Heyward, 1985; Lunneborg & Lunneborg, 1985; Minatoya & Sedlacek, 1980; Reichard & Hengstler, 1981; Trow, 1977; Westbrook et al., 1977; Willie & McCord, 1972).

Burbach and Thompson (1971) reported that contradictory norms on campus cause problems for Black students. Martinez and Sedlacek (1982) found that when Whites entered a predominantly White university in the early 1980s they expected the social norms to be conservative on social and political issues (e.g., government policies, abortion rights) but liberal on personal freedoms (e.g., drug use, sexual behavior). Black students tended to expect the norms to be exactly the opposite. Martinez and Sedlacek (1983) also found that students in general were more tolerant of people with racist or bigoted attitudes in 1981 than in 1970 on a predominantly White campus. That the campus environment could be seen as confusing and hostile to Black students should not be hard to understand.

Attitudes of White Students

The discomfort of White students around Blacks and the negative stereotypes of Blacks held by White students have been well documented during the period studied (Peterson et al., 1978). These underlying attitudes do not seem to have changed throughout the years. For example, a series of studies at the University of Maryland employing the same instrument, the Situational Attitude Scale (Sedlacek & Brooks, 1972b), and the same methodology, has shown consistently negative attitudes of White students toward Blacks in a wide variety of situations (e.g., Carter, White, & Sedlacek, 1985; Minatoya & Sedlacek, 1984; Miyares & Sedlacek, 1976; Sedlacek & Brooks, 1970b; White & Sedlacek, 1987). Studies at other institutions have supported this finding (e.g., Gaertner & McLaughlin,

1983; Greenberg & Rosenfield, 1979). Sedlacek, Troy, and Chapman (1976) have demonstrated, however, that it is possible to alter racial attitudes in an orientation program using an experimental-control group approach.

COMMUNITY SERVICE

As part of a viable support system, Blacks need to have identification with and be active in a community. The community may be on or off campus, large or small, but it will commonly be based on race or culture. Because of racism, Blacks have been excluded historically from being full participants in many of the White-oriented communities that have developed in the United States and in the educational system. Thus, Blacks need a supportive group that can give them the advice, counsel, and orientation to sustain them as they confront the larger, often hostile systems they must negotiate. Many researchers have documented that Blacks seem to be more community oriented than are Whites (Bayer, 1972; Centra, 1970; Davis, 1970; Greene & Winter, 1972; Lyons, 1973; Reichard & Hengstler, 1981; Southern Regional Education Board, 1972). Additionally, Bohn (1973) and Pfeifer and Sedlacek (1974) found that a high score on the California Psychological Inventory (CPI) (Megargee, 1972) Communitarity scale, which measures a community orientation, was associated with Black student success (i.e., retention and grades).

Other researchers have shown that Blacks often believe that they do not belong on predominantly White campuses (Bradley, 1967; Kleinbaum & Kleinbaum, 1976; Lunneborg & Lunneborg, 1985; Madrazo-Peterson & Rodriguez, 1978). The idea that there needs to be a "critical mass" or sufficient number of Blacks on a campus to develop a community or communities has been discussed by Astin and Bayer (1971), Willie and McCord (1972), and Fleming (1981, 1984). Thus, a relevant community is probably harder for Blacks to develop on a White campus than on a Black campus.

Bennett (1974) reported that Blacks preferred a separate residence hall floor. Davis (1970), in an experimental study, found that

Black Student Life

Blacks who lived on an all-Black floor in a residence hall were more positive toward their institution than were those who lived on a mixed-race floor.

Athletics may be an important way for Blacks to develop a community on campus (Mallinckrodt & Sedlacek, 1987; Reichard & Hengstler, 1981). Mallinckrodt and Sedlacek found that Blacks who made use of campus gymnasiums were more likely to stay in school than were those who did not.

Mallinckrodt and Sedlacek (1987) also found that Blacks who were interested in activities sponsored by the student union had better retention than did those who were not interested. Webster and Sedlacek (1982) found the student union to be a central part of Black students' community development.

LONG-RANGE GOALS

The extent to which Black students are able to defer gratification is correlated with their retention and grades in school (Tracey & Sedlacek, 1984, 1985, 1987). The reason this is an issue is yet another form of racism. Blacks have had a more capricious experience in setting goals and receiving reinforcement for their accomplishments than have Whites. Sometimes things work out for Blacks; sometimes they do not. Whites are more likely to understand that if they accomplish A they can go to B. For Blacks, this is less clear. A key assumption in the higher education system is that students work currently for rewards received later.

Astin (1975) found that those Blacks with lower aspirations and vaguer goals than other Blacks were more likely to leave school. Nolle (1973) supported Astin's conclusion by noting that Black high school students with specific plans for college were much more likely to attend college than were those with less clear goals. Bohn (1973) found that Black college students who made plans were more successful than were those who did not. Greene and Winter (1971) found that Black leaders in campus organizations were more apt to have long-range goals than were other Black students. Other studies that provide general support for the importance of this

variable include Baer (1972) and Stikes (1975). Berman and Haug (1975) and Wechsler, Rohman, and Solomon (1981) provided evidence that developing long-range goals may be a bigger problem for Black women than for Black men.

STRONG SUPPORT PERSON

Because Black students are dealing with racism and face difficult adjustments to a White university, they are particularly in need of a person they can turn to for advice and guidance. As discussed above, however, Black students often find difficulty forming relationships with White faculty and staff (e.g., Boyd, 1973; Dinka et al., 1980; Simon, McCall, & Rosenthal, 1967). Additionally, Black faculty and staff are often not available, and Black students have expressed a need for more Black faculty and staff in general (Burrell, 1980; Willie, 1971; Willie & McCord, 1972) and more Black counselors in particular (Abbott, Tollefson, & McDermott, 1982; Wolkon, Moriwaki, & Williams, 1972). Genshaft (1982) found that therapists believed that Blacks were less attractive clients and had a poorer prognosis than did other clients. Parham and Helms (1981) presented evidence that client race was not a predictor of counselor race preference, but racial identity was. Blacks in the encounter and immersion stages wanted Black counselors, whereas those in the internalization stage had no preference (see previous discussion). Brooks, Sedlacek, and Mindus (1973), R. L. Taylor (1977), and Webster and Fretz (1977) have found that Blacks often turn to friends and family for support, which is further evidence of the importance of the variable.

LEADERSHIP

Successful Black students have had successful leadership experiences. They have shown the ability to organize and influence others, often within their cultural-racial context. As with acquiring knowledge or in doing community work, Blacks often do not show leadership in traditional ways. Black students are more likely to exhibit leadership off campus, in the community, or in their church than are White

students. When Blacks show leadership on campus it is often through informal or Black-oriented channels, which are less likely to be validated by White faculty, students, or personnel workers.

Bayer (1972) found that Black students were oriented toward being community leaders. Greene and Winter (1971) showed evidence that leadership was important to Black students. Beasley and Sease (1974) demonstrated that scores of Blacks on the leadership portion of the American College Testing Program's student profile section correlated positively with GPAs.

Heyward (1985) concluded that Blacks do not look to White faculty and staff as role models for their leadership. They look to other Blacks or develop their own styles and forms of leadership.

NONTRADITIONAL KNOWLEDGE

Because Blacks have not always been welcomed in the formal educational system, they have developed ways of learning outside the system. These ways are often creative and culturally relevant. Astin (1975) found that Blacks who were able to demonstrate knowledge they gained in nontraditional ways through credit by examination were more likely to stay in school than those who could not. The increase in student retention associated with demonstrating knowledge in this way was more than twice as great for Blacks as for Whites.

Hayes and Franks (1975) reported that Blacks saw more opportunities than did Whites for public discussions and debates, which could translate into learning opportunities. Black (1971), in a study at historically Black colleges, found that Blacks who developed an independent learning year fared better than did a group of Blacks in a control group who pursued the regular curriculum.

DISCUSSION

There has been considerable research on Black students in the last 20 years. What has been learned from this research? Although it is difficult to determine whether the problems of

Blacks on White campuses have changed during this period, it is clear that it is possible to better measure, define, and articulate those problems than at any time previously. Blacks seem to have continued to have difficulties with self-concept, racism, developing a community, and the other noncognitive variables discussed. There is a model available, however, to organize thinking about Black student problems and ways to measure those problems, to work with Black students or others on campus, and to improve student life for Blacks. Perhaps most important, the variables identified correlate with Black student academic success. There is less need to guess or hope that what is being done is helpful. Appendix A contains some recommendations for improving Black student life on White campuses in terms of each noncognitive variable.

Some of the noncognitive variables discussed and conclusions reached may seem applicable to all students. Although this may be true to some degree, the evidence presented is intended to show that the points raised are unique to Blacks, in intensity if not in form. For instance, many White students may have self-concept problems, but these do not include the alienating effects of racism. Whites may lack a support person, but the process of developing such a relationship is not the same as for Blacks because of racial and cultural variables. The researchers have demonstrated the many unique aspects of being Black on a White campus.

Another area of research that seems illuminating but did not exist until recently is the work on racial identity of Blacks, discussed under self-concept. One can measure change and development in an area that has been shown to be important to Blacks. There are many other specific results of the studies discussed above that should be interesting and useful to practitioners.

Why cannot one be more sure that life has changed for Blacks on White campuses? First, there has been very little evaluation research. Most of it has been descriptive. Descriptive research is helpful, but it does not focus on change. For instance, Black students have reported being concerned with racism from the 1960s through the 1980s. But is it the same

Black Student Life

racism? Do past and present Black students mean the same thing when they refer to racism? Longitudinal studies over time or even cross-sectional studies done the same way in the same place are not common. Perhaps the way the literature was organized does not lend itself to the analysis of trends. The noncognitive variables are assumed to be underlying dimensions, which could take different forms at different times. For instance, institutional racism may be more likely to take the form of dropping a Black studies program or providing inadequate funding for a Black fraternity in the 1980s than involving police brutality or allowing Blacks into White fraternities in the 1960s. Some forms of racism (e.g., admissions, attitudes of White students), however, seem to have changed little over the years. In any case, it is still racism and it seems that Blacks are obligated to deal with it if they are to succeed in school.

As the research on Black students was examined one thought seemed to stand out. How ironic that educators so often think of Black students as less capable than other students. Black students need to have the same abilities and skills as any other student to succeed in school, and they are dealing with the same problems as any other student. They also, however, are confronting all the other issues discussed in this article. One could make the case that the best students in U.S. colleges and universities are Black students. The typical Black graduate from a predominantly White school may possess a wider range of skills and be able to handle more complex problems (e.g., racism) than most other students.

How can student affairs professionals use what has been presented here? Generally, one should be able to be much more sophisticated in student services work for Blacks using the information in this article. There exists much information demonstrating that Blacks are not a monolithic group and indicating how one might approach them individually or collectively. There is also more information about the many ways

the educational system works against the best interests of Blacks. One can use this information to work with non-Black students, faculty, and staff to improve Black student life. Below are a number of specific things that can be done based on a review of this literature.

1. Organize programs and services for Black students around some specific variables that have been shown to be important. Whether it is one of the noncognitive variables presented here or some other scheme, use it. There is little excuse for vague, general programs or "seat-of-the pants" needs analyses given the state of knowledge available.
2. Evaluate all programs. This should be done with an experimental-control group model if possible. If one has specific goals, and can measure concepts better, it should be possible to dramatically increase this type of research, and report it in student affairs journals.
3. Work at refining the variables and concepts presented here, either through programs or further research. The student services profession is on the brink of being able to work with more useful, higher order concepts than those currently employed on behalf of Black students; help the process along.
4. Share the information from this review and the results of individual work in Black student services with others outside student affairs. Much of what has been done in the profession would be of use to such people as faculty and academic administrators.
5. The last bit of advice is more personal. Be confident. Many researchers over many years have developed a literature that can be used. Whatever a person's role, he or she should be able to fulfill it better with this information.

APPENDIX A.

Recommendations for Improving Black Student Life on White Campuses
by Noncognitive Variable

Self-concept: Measure self-concept (see Hall et al., 1972; Tracey & Sedlacek, 1984). Develop counseling programs or workshops employing racial identity (Helms, 1984) or noncognitive variables (Westbrook & Sedlacek, in press).

Realistic self-appraisal: Work with faculty and academic administrators on communication with Black students. Faculty should initiate contact more than they usually do and employ feedback in varied and frequent ways. Help Black students interpret feedback from system. Examine Kochman (1981) for differences in Black and White communication styles.

Understanding and dealing with racism: Become familiar with racism and what can be done about it (Racism/Sexism Resources Center for Educators, 1983; Sedlacek, in press; Sedlacek & Brooks, 1976). Specific forms of racism can be addressed by (a) employing nontraditional admission predictors that are more valid for Blacks than those currently employed (Sedlacek, 1986; Tracey & Sedlacek, 1987), (b) increasing the numbers of Black faculty and staff (Peterson et al., 1978), and (c) working to change attitudes of White students, faculty, and staff (Sedlacek, Troy, & Chapman, 1976).

Demonstrated community service: Help Whites understand the need for Black communities on and off campus. Use student union programming (Webster & Sedlacek, 1982) and facilities management (Mallinckrodt & Sedlacek, 1987) as methods of developing Black communities on campus. *Long-range goals:* Financial aid dispersed as a lump sum may hurt Black student development in this area. Consider a program that gives Black students funds for accomplishing individually set goals. Goals can be set at longer and longer intervals. A midwestern university employs this system successfully. In the short run, use the concept that Black students may be motivated to use available student services by promoting a more immediate reward system than commonly employed (Arbona & Sedlacek, 1987).

Strong support person: Develop relationships with Black students early, ideally before matriculation through recruiting and orientation programs. Develop a pool of faculty, staff, peers, or off-campus mentors and link Black students with others individually or in groups.

Leadership: Foster and identify nontraditional and racially based forms of student leadership on and off campus. Formally encourage schools and specific departments to offer leadership awards for such achievements as eliminating racism, Black journalism, and race-related community projects. Make faculty aware of nontraditional student leaders in their departments. Help students to recognize their nontraditional leadership and include such leadership roles in résumés and applications for jobs and further education.

Nontraditional knowledge acquired: Encourage Blacks to demonstrate knowledge gained outside the classroom through credit by examination or listings on résumés and applications. Encourage faculty to identify extramural learners and work with them.

SECTION II. To be completed by the STUDENT.
ACTIVITIES, INVOLVEMENT AND ACHIEVEMENTS

1. Please attach a list (*in bulleted form*) of any IMSA sponsored activities/programs (Informational Meeting, On-Campus Visitation Event, PROMISE SEAMS, EIP, LS2S or Project School Visit, Summer Sleuths, Fusion, Kids Institute Program, IMSA CyberQuiz, etc.) in which you have participated. List full name of activity, date(s), and location, if known.
2. Please attach a list **and describe** (*in bulleted form*) your most meaningful extracurricular activities, organized or individual, during the past three years. Also indicate any leadership positions, as well as time involved per week, in these activities. *IMSA reserves the right to verify participation in activities listed.* (Do not use acronyms - please use full name for all activities.)
 - a. Mathematics, Science and Technology related activities:
(*ex. Activity* *Your Age at time of Involvement* *Office/Position* *Hours per week*)
 - b. Prioritize and describe your top three other areas of involvement: (ex. sports, clubs or organizations)
(*ex. Activity* *Your Age at time of Involvement* *Office/Position* *Hours per week*)
3. Please attach a list **and describe** (*in bulleted form*) the most meaningful awards you have received *in or out of school* during the past three years. Include full name of award(s), year the award was received, and whether won at the local, state, national or international level. *IMSA reserves the right to verify awards received* (Do not use acronyms - please use full name for all awards). **PLEASE DO NOT SEND ORIGINALS OR COPIES OF AWARDS/CERTIFICATES.**
 - a. Mathematics, Science and Technology related activities:
(*ex. Activity* *Your Age at time of Involvement* *Office/Position* *Hours per week*)
 - b. Prioritize and describe your top three other areas of involvement: (ex. sports, clubs or organizations)
(*ex. Activity* *Your Age at time of Involvement* *Office/Position* *Hours per week*)

OPTIONAL STATEMENT

We attempt to identify those applicants whose previous school grades or admission test scores may under predict academic success. Among the factors we consider in making admission decisions are whether the applicant (1) is from an economically disadvantaged environment; (2) had a health problem which significantly affected, for a period of time, an otherwise exceptionally good academic record; (3) has a permanent physical disability, learning or attentional difference; (4) has completed an exceptionally rigorous academic program; (5) does not speak English at home; or (6) has other exceptional circumstances. This information is considered with your academic credentials. It is particularly relevant if your qualifications place you slightly below the competitive applicants. **Describe any factors like those listed above that you believe the selection committee should consider as they review your credentials.**

SECTION III. To be completed by the STUDENT.

Please respond on separate pages to the following questions.

STUDENT ESSAY QUESTIONS

1. If you are invited to attend the Academy you will be expected to adapt to new learning, living and social environments. You will be asked to live, study, and work with many people from different backgrounds from throughout Illinois. Please describe yourself to your classmates, teachers and others at the Academy. What interesting information **would you want others to remember about you?** **Secondly, what are some changes you perceive you would need to make to thrive academically and residentially at IMSA?** *(Word Guideline - In 500 words or less)*

2. Success is achieved in many ways and by using numerous variable factors. It is your task to do all below:
 - Develop a working equation/formula portraying the variables of being successful for advanced study in mathematics, science and technology.
 - Discuss your personal understanding of how this equation/formula creates a path for success.
 - Describe a time when you experienced success and its impact on you. *(Word Guideline - In 500 words or less)*

3. The mission of IMSA, the world's leading teaching and learning laboratory for imagination and inquiry, is to ignite and nurture creative, ethical scientific minds that advance the human condition, through a system distinguished by profound questions, collaborative relationships, personalized experiential learning, global networking, generative use of technology and pioneering outreach. Using your own words, describe how you will embrace, engage and advance the mission of IMSA if you are chosen to be a member of the class of 2016. *(Word Guideline - In 500 words or less)*

4. You have been awarded the resources required to initiate, design, and implement an innovative endeavor that will have an impact on the world through mathematics, science, engineering and/or technology. Describe your innovative endeavor, how you would go about starting it? What is its potential effect today and for future generations? *(Word Guideline - In 250 words or less)*

SECTION IV. To be completed by the PARENT/LEGAL GUARDIAN.**PARENT STATEMENT**

Please describe your child's passion/interests/motivation in mathematics, science and technology. Also, please provide any additional information that the Student Selection Committee should consider when evaluating your child's application to IMSA. *(Word Guideline - In 200 words or less)*

APPENDIX H

TO BE COMPLETED BY THE EVALUATOR

For 8th grade applicants: Considering (1) Level of texts, (2) Complexity of labs (if applicable), (3) District curriculum, (4) ISBE State Standards, is this student's mathematics and/or science course taught at a high school level? Yes No

CLASSROOM BEHAVIOR: Please include behaviors that indicate potential for the areas listed below.

(Attach additional page if more space needed)

Please describe an example in which this candidate demonstrated exceptional intellectual talent, curiosity, creativity and/or leadership.

Please provide a specific example in which this candidate demonstrated a true passion for mathematics, science and/or technology.

Please provide an example in which this student thought and acted outside of the "mainstream" in relation to his/her performance.

If a lab based course, please describe this candidate's performance in a laboratory.

Please describe this candidate's willingness and ability to work both in a group and independently.

Please describe this candidate's oral and written communication skills.

Please describe this candidate's preparation and study skills development.

Please describe this candidate's mathematical, science and/or technology reasoning ability and ability to communicate articulately about the subject matter.

Student Last Name _____ First _____ MI _____

IN YOUR OPINION:

- Does this student have a **serious interest** in studying mathematics, science and/or technology? Yes No
- Does this student have an **aptitude** for studying mathematics, science and/or technology? Yes No
- Do you think that this student's grades are a valid reflection of his/her academic abilities? Yes No
- If no, please explain:*

COMMENTS:

Please use this space to provide any additional information that the Student Review Committee should consider when evaluating this student's application to IMSA, including your involvement with him/her outside the traditional classroom, his/her ability to meet personal responsibilities such as taking care of self, meeting deadlines, personal initiative, etc. Please also include any obstacles this student has had to overcome in pursuing his/her educational goals, if appropriate. (Attach additional page if more space is needed)

APPENDIX K

TUCSON UNIFIED SCHOOL DISTRICT

September 13, 2013

To: Samuel E. Brown, Director of Desegregation
Tucson Unified School District

From: Kenneth Bonamo, Principal of Scarsdale High School

Re: University High School Admissions Process Revision

The purpose of this memorandum is to provide a final report regarding my advice, input, and final opinion of the University High School Admissions Process Revision.

Scope of Review

I have reviewed the document entitled "V. Proposed Admissions Process Revision" that is five pages in length during the past week. I reviewed the document in its entirety, with special attention to the Freshman and Sophomore procedures for years 1 and 2.

The process for both classes in both years seems to be a sound method of ranking applicants to the school. Having the same process for both freshmen and sophomores in year two (and likely beyond) provides for streamlining and equity for the overall process and clarity in communicating to parents and students. I would note that sections 2a and 2b on page 4 seem to be contradictory, in that 2a indicates that honors classes will be weighted while 2b indicates that they will not be weighted.

To achieve the goal of greater diversity, I would urge you to consider ranking students in different "buckets," if you will, or middle schools, so that a certain number or percentage of population comes from each "bucket" or middle school. This would also be supported by the presumption that grades within a school are more suitable for ranking applicants from that school rather than against applicants from other schools. Of course, given your note on page 2 that the new point structure and bonus points appear to provide for greater diversity, this "bucket" method may not be necessary to achieve the goal.

I would emphasize your indication that the process will be reviewed and revised as necessary to ensure quality of applicants, equity of evaluation, and desired diversity. The "continual analysis and improvement over time" is essential to ensuring that the process remains the best one possible.

Review of Final Draft

Based on my experience at selective-admissions high schools in New York City, I support this final version. I would urge you to analyze the correlation of the different elements of the admissions process (the CogAT, GPA, CAIMI, and non-cognitive assessments) with student performance in the high school every year to determine their appropriate point values and inclusion in the process overall. I must include the caveat that I do not have experience using teacher evaluations or teacher recommendations and would caution against using them because of their subjectivity and the pressure they might put on teachers to be generous in reviewing students, though I would defer to the recommendations of school officials who have experience using them.

TUCSON UNIFIED SCHOOL DISTRICT

September 16, 2013

To: Samuel E. Brown, Director of Desegregation
Tucson Unified School District

From: Kelly Lofgren, Admissions Coordinator, Illinois Math and Science Academy (IMSA)

Re: University High School Admissions Process Revision

The purpose of this memorandum is to provide a final report regarding my advice, input, and final opinion of the University High School Admissions Process Revision.

Scope of Review

This memo refers to the review of University High School's Proposed Admissions Process Revision (section V) on September 16, 2013. I previously provided consultation regarding IMSA's application process via email to Martha Taylor, as well as provided sample documents for review (IMSA's application and teacher recommendations).

Review of Final Draft

I believe the proposal is an improvement upon the school's prior policy for admission. While research has shown that test scores typically are the best indicator of future academic success, they do not reflect an applicant's background or learning environment and admission solely on the basis of test scores may penalize under-resourced populations. The inclusion of the CAIMI test is an interesting addition and has the potential to add a lot of value to the admissions process, though I am not familiar with the test. The teacher evaluations, also required of applicants to IMSA, I believe are one of the best indicators of quality applicants and a strong addition to your policy. I also agree with continual review and revision to the admissions process. Finally, I would also recommend that you consider requiring student essays, as I have found them to be a great indicator of student commitment, creativity and maturity.

TUCSON UNIFIED SCHOOL DISTRICT

10/3/2013

To: Samuel E. Brown, Director of Desegregation
Tucson Unified School District

From: Jeannie Franklin
Director, Consortia Choice and Application Program Services
Montgomery County Public Schools
Rockville, MD

Re: University High School Admissions Process Revision

The purpose of this memorandum is to provide a final report regarding my advice, input, and final opinion of the University High School Admissions Process Revision.

Tucson Unified School District's proposed selection process has similar criteria and processes that Montgomery County Public School (MCPS) implements for its 13 centers for the highly gifted. Thank you for permitting us to share some feedback.

One area we found intriguing is your use of the CAIMI instrument- a motivational based assessment that surfaces African American and Hispanic students. MCPS would be interested in exploring how your system introduces the results of this criterion into the review process and what successes you find.

Regarding our initial thoughts about your selection process, we would like to comment on three areas.

Outreach: Awareness and access are huge efforts for our system to communicate this process to the parent and school community. MCPS distributes memorandums to the principals, submits press releases to the public, sends targeted mailings to students/parents, and conducts open houses. MCPS also targets school staff who have demonstrated over time, low access/low participation in these application processes. In addition, partnering and presenting at key community meetings (NAACP Parent Council meetings, community fairs, and school fairs). Examining your targeted outreach plan and the stakeholders involved, along with how to measure its effectiveness, may be areas of additional exploration.

Freshman Section: In the "Freshman section for YEAR 1," it indicates that *the student must have a composite score of 7*. This baseline score, we predict, may present challenges to creating diversity in your applicant pool. African American and Hispanic students generally underperform on standardized assessments compared to their White and Asian counterparts for various reasons. MCPS has experienced that even some of our most talented African American and Hispanic students perform in the lower groupings on standardized assessments. This may create a barrier for these students to be surfaced in the review process who are generally strong candidates for the program. Two efforts to surface strong students who may perform at a lower level than their counterparts on the standardized assessments are to institute a pre-selection committee and the school advocacy tool.

Pre-selection Committee: There are two phases in the review process. The first is a pre-selection committee which is made up of school and central services members. The second review is the selection committee review. This groups recommends students to the program.

The pre-selection group reviews student applicant folders for those who did not meet the initial data or advocacy groupings. Our groupings are somewhat similar to your composite score; however, our system uses multiple criteria to assemble the groupings. This group surfaces students, who might not otherwise be surfaced for review, to the applicant pool for another review at the selection committee. The goal is that all student applicants will have at least one committee review and, where appropriate, be surfaced for another review. This group only recommends student applicants to the next level of review; not into the program.

School Advocacy Tool: The second strategy is the school advocacy tool. This tool requests that schools advocate for two nontraditional applicants to participate in the application process. An overview of the process is distributed in advance to all elementary and middle school principals; key staff support the advocacy of two students. The school advocacy tool is a one page questionnaire completed by school staff who advocate for a nontraditional student and her/his need for the center program.

MCPS has experienced marginal improvements using these models and continues to explore other successful strategies.

Sophomore Section: In this section, it is indicated in "3a" that a rubric will be developed to weight GPA and the higher level courses, and "3b" indicates that no weight will be given. It appears counterintuitive to use a rubric for weight in "3a" and then claim no weight is given in "3b". This explanation was confusing to our team.

Thank you for the opportunity to learn from your work and to comment on your new efforts.

Appendix T

**STATEMENT OF FACTS REGARDING TUSD’S COLLABORATIVE
DEVELOPMENT OF THE UHS ADMISSIONS PLAN**

A. The Unitary Status Plan

The Fisher Plaintiffs, the Mendoza Plaintiffs, the United States and the District spent several months negotiating and developing a consent order for the purpose of resolving the longstanding desegregation lawsuit filed in 1974 by Plaintiffs. ECF No. 1450 at 5. While the negotiations took much longer than expected, the parties eventually entered into, and the Court adopted, the Unitary Status Plan (“USP”) on February 22, 2013 in furtherance of removing of all vestiges of discrimination within TUSD. *Id.*

Section V(A)(5)(a) of the USP directs TUSD to review and revise the admissions process for UHS to ensure that multiple measures for admission are used and that all applicants have an equitable opportunity to gain admission to UHS. USP § V(A)(5)(a). The original deadline for TUSD to comply with the USP was April 1, 2013. However, given that the April deadline had been contemplated when the parties expected the USP to be entered months earlier, the parties agreed the deadline should be extended to October 23, 2013.

B. TUSD Gets an Early Start on the UHS Admissions Plan

The USP provisions regarding admissions to UHS evolved significantly during the course of the USP negotiations. *See* Affidavit of Samuel Brown (“Brown Affid.”) ¶ 4. However, TUSD did not wait for the passage of the USP to begin its work on the revised UHS admission policy. *See* Brown Affid. ¶ 4; Affidavit of Juliet King, Ph.D. (“King Affid.”) ¶¶ 5-7. As soon as it became clear in January 2013 what the final provisions under the USP would require in connection with UHS admissions, TUSD began its work investigating a new and revised admission procedure. *Id.*

During January and February of 2013, UHS Principal Moll¹, Dr. Juliet King, Ph.D (research project manager for TUSD) and UHS faculty member Michael Schmidt (also representative of the Instructional Council) conducted preliminary exploratory meetings on how to achieve the goals identified by the parties in the USP. *See King Affid.* ¶¶ 6-7. To this end, in February 2013 Dr. King conducted an analysis on behalf of TUSD, reviewing and surveying the best practices in admissions policies of exam high schools across the country. *See King Affid.* ¶ 7. Dr. King also created a chart summarizing the best practices review. *See King Affid.* ¶ 7, Att. B.

In March 2013, TUSD formalized the University High School Internal Working Group (“UHS Working Group”) exclusively dedicated towards the revision of the UHS admissions policy. *See Brown Affid.* ¶ 5; *King Affid.* ¶ 10. The UHS Working Group was made up of the following: UHS faculty (Math Teacher Mike Schmidt), the Instructional Council (Schmidt as representative), the UHS Principal and Assistant Principal, the UHS Site Council (Assistant Principal, UHS Office Manager and parent representatives), the Manager of School Admissions, UHS Learning Support Coordinator, UHS Career and Technical Counselor, UHS Office Manager, Foundation Board (UHS Office Manager as representative), UHS parents (Terry Adkins as representative) and UHS students (Mickey Cronin as representative). Dr. King, Samuel Brown (director of de-segregation for TUSD) and Martha Taylor (director of Advanced Learning Experiences) were also part of the UHS Working Group. *See Brown Affid.* ¶ 5, Att. A; *King Affid.* ¶ 8; Affidavit of Martha Taylor (“Taylor Affid.”) ¶¶ 2-4.

C. TUSD Reviewed Both Internal and External Research of Best Admissions Practices

In addition to the internal best practices review conducted by Dr. King in February 2013, the UHS Working Group reviewed best practices in findings from the nation-wide

¹ Principal Packard is the current UHS principal, taking the position for the 2013-2014 school year.

study of 169 schools completed by Drs. Finn and Hockett, and published in 2012 in *Exam Schools: Inside America's Most Selective Public High Schools*. The UHS Working Group discussed some of the challenges facing exam schools—specifically that no school surveyed, nor the 11 schools presented as case studies, had developed admissions criteria that resulted in a more diverse student body. *See* Affid. King ¶ 11; Taylor Affid. ¶ 6-8. The use of multiple measures in and of themselves did not result in increased representation of underrepresented racial/ethnic groups. *Id.* The UHS Working Group determined there was no clear educational model to follow and would have to apply best efforts to identify an approach that would work for UHS. *Id.*

D. TUSD Consulted With Experts

The UHS Working Group consulted with experts Chester Finn and Jessica Hockett, co-authors of *Exam Schools*. *See* Affid. King ¶ 12; Taylor Affid. ¶ 7. These experts were chosen because they already had completed the only existing broad, comprehensive, national review of exam schools in the field and were in a position to help TUSD quickly narrow its research to those schools that most closely fit UHS' profile as a large public school with 1,000 applicants a year. *Id.*

The UHS Working Group further consulted with Dr. Lanny Kanevsky, professor at Simon Fraser University in Vancouver, Canada as an academic who has studied concepts such as student resiliency and motivation measures in gifted education (K-12) for the past 20 years. *See* King Affid. ¶ 13-14. Dr. Kanevsky cited the work of Dwerk, Gottfried and Gottfried, and Marsten (also experts in the field) and presented for consideration potential resiliency/motivation measures to the UHS Working Group including Dwerk's Mind-Set scale and Gottfried's Children's Academic Intrinsic Motivation Inventory ("CAIMI") and Pearson Resiliency Scales for Children and Adolescents. *See* King Affid. ¶ 14.

The UHS Working Group also interviewed Kelly Lofgren (Admissions Coordinator, Illinois Mathematics & Science Academy), Jeannie Franklin (Director of Division of Consortia Choice and Application, Montgomery County Public Schools), Dr. Tonya

Moon (University of Virginia, expert in Gifted Education and Academic Diversity), and Kenneth Bonano (principal of Scarsdale High School) regarding admissions measures. *See* Taylor Affid. ¶ 5.

E. TUSD Sought Public Comment

In addition to incorporating the research of best practices from schools across the county as well as experts, principals and school administrators nationwide, TUSD sought, perhaps most importantly, the input of the Tucson community. *See* Affidavit of R. Dean Packard (“Packard Affid.”) ¶ 5. Throughout the development of the Admissions Plan, TUSD sought to assure clear and open communications with the public about TUSD’s efforts, and with parent, student and faculty stakeholders concerning USP implementation at UHS. *Id.*

In particular, TUSD solicited feedback from the site council organized under A.R.S. § 15-351 (requiring each school to form a representative committee of parents, teachers, staff, community members, students, and administrators for consultation on school decision-making). *See* Packard Affid. ¶ 6. Additionally, TUSD solicited feedback from a very active University High School Parent Association (UHSPA). *Id.* Finally, TUSD solicited feedback from the families of potential future UHS students, UHS graduates, active UHS Alumni and Foundation, the public at large, TUSD administration, and the Governing Board. *Id.*

Public input was overwhelmingly in favor of maintaining the current admissions criteria (CoGAT/grades) as well as supplementing those with additional measures. Packard Affid. ¶ 9. One example is whether to include a personal essay in the admissions process. Many UHS stakeholders believe that a take-home essay would risk that the essay would reflect the work of persons other than the applicant. *Id.* TUSD then examined the possibility of short-answer essay questions, which had the advantage of being monitored during test administration. *Id.*

The evolving versions of the Admissions Plan (which were modified particularly in response to comments from the Plaintiffs and Special Master as described below) also were made public in Governing Board meetings. Those Board meetings occurred on July 30, 2013, September 10, 2013, and finally on October 22, 2013. On each occasion, the Governing Board heard about the interactive process taking place between the UHS Working Group, various stakeholders, the public, and the Plaintiffs and Special Master.² *See* Packard Affid. ¶ 11.

F. The TUSD Consulted Extensively With Plaintiffs & the Special Master

Based upon the best practices research and expert consultations, the UHS Working Group presented a preliminary draft Admissions Plan to the Plaintiffs and Special Master in July, 2013 for comment. *See* Brown Affid. ¶ 6; King Affid. ¶ 16. Over the next five weeks, TUSD, Plaintiffs and Special Master worked collaboratively towards a revised Admissions Plan. TUSD received comments, input and suggestions arising from ongoing discussions and email communications. *See* Brown Affid. ¶ 7. In particular, TUSD has been in regular contact with the Special Master on the Admissions Plan as well as other USP issues, including multiple telephone conversations a month and consistent email communications – including up to 20 emails per day on some days. *See* Brown Affid. ¶ 8.

In order to address comments and incorporate input from Plaintiffs and the Special Master, TUSD revised the Admissions Plan significantly and produced a revised plan on September 5, 2013. *See* Brown Affid. ¶ 9. The revised September Admissions Plan was re-circulated to Plaintiffs and the Special Master. *Id.* Following additional comments from Plaintiffs and the Special Master on the September

² Based on the public comments received at the Governing Board meetings, and the exhaustive interactive process described above, overwhelming support for the Admissions Plan was clear by the time the Governing Board approved the Admissions Plan on October 23, 2013. *See* Packard Affid. ¶ 10.

Admissions Plan, TUSD initiated a conference call among the parties. *Id.* Following this lengthy conference call, TUSD summarized the remaining objections of the Plaintiffs and Special Master and provided them with a copy of this summary. *Id.* No party objected that this summary did not accurately reflect all remaining objections. *Id.*

Addressing the remaining objections and comments of the Plaintiffs and Special Master, TUSD revised the Admissions Plan yet again and produced a revised plan in October, 2013. *See* Brown Affid. ¶ 11. Specifically, TUSD expanded the admissions criteria to include not only the proposed motivation/resiliency test, but a non-cognitive assessment (short-answer essays), and a teacher evaluation component. *See* King Affid. ¶ 18. These elements were proposed to be piloted for sophomore admissions – providing TUSD time to select, administer, and evaluate appropriate instruments (including additional motivation/resiliency assessments). *Id.* During the entire comment process, the UHS Working Group was never provided any research, expert opinion, or data by Plaintiffs or the Special Master that contraindicated using the CAIMI, nor were any alternative measures such as student essays proposed. *Id.*

G. Special Master and Plaintiffs Refuse to Participate in Mandatory 30-Day Voluntary Resolution Period Following Their Objections

On October 31, 2013 the Mendoza Plaintiffs submitted written objections to the October Admissions Plan. On November 4, 2013, the Fisher Plaintiffs did the same. On November 5, 2013, the Special Master likewise submitted written objections. *See* Brown Affid. ¶ 11. The Special Master also submitted a proposed admissions plan (which was completely different from the proposed admissions plan he submitted to the Court on November 22). *See* Brown Affid. ¶ 11. The Plaintiffs' objections triggered the 30-day voluntary resolution period under the USP which provides that following receipt of objections from the Plaintiffs, the parties shall have thirty days

from the date Plaintiffs provide their comments to TUSD to resolve any disagreements prior to Court intervention. *See* USP 1.D(1).

TUSD believed that the objections could be resolved successfully during the 30-day voluntary resolution period mandated by the USP. *See* Brown Affid. ¶ 12. Accordingly, on November 13, 2013, TUSD sent Plaintiffs and the Special Master preliminary responses to the October/November objections. Affidavit of Lisa Anne Smith (“Smith Affid”) ¶ 6.

Later on the 13th Plaintiffs and the Special Master unilaterally and prematurely terminated the 30-day resolution period provided the parties to resolve remaining issues voluntarily and without Court intervention. *See* Smith Affid ¶ 7. In an email from the Special Master, he indicated that the Plaintiffs and the Special Master (apparently during conferences/communications from which TUSD had been excluded) had agreed to an “alternative plan” proposed by the Special Master. *Id.* Then, wholly disregarding the 30-day voluntary resolution period, the Special Master advised that he already had decided to submit a Report and Recommendations to the Court “as soon as [h]e can” – notwithstanding 21 days of the 30-day mandated voluntary resolution period remained. *Id.*

Despite the Special Master’s improper termination of the voluntary resolution period, TUSD nonetheless attempted to continue the process. TUSD, even later on the 14th, reached out to the Plaintiffs to request a conference call to discuss what, if any, remaining objections to the October Admissions Plan actually existed. *See* Smith Affid ¶ 8. The Mendoza Plaintiffs’ counsel was “puzzled” given TUSD’s complete responses to objections provided earlier that day which was then confusingly followed by the Special Master’s email terminating discussions and claiming that the Plaintiffs and Special Master were in agreement on his alternative proposal. *Id.* Accordingly, the following morning, November 14, 2013, TUSD requested clarification regarding Plaintiffs’ remaining objections. TUSD received no response to that request. *Id.*

Despite Plaintiffs' silence as to whether they had any remaining objections, TUSD made further attempts to address their possible concerns. To that end, on November 15, 2013, TUSD revised the October Admissions Plan again by including Appendix L which addressed nearly all of the comments. *See* Smith Affid ¶ 9. This November revision was provided to Plaintiffs and the Special Master on November 15, 2013. *Id.* Also, any comments that did not result in revisions were addressed specifically in further detail in a companion memorandum to the Plaintiffs and Special Master (most of the unresolved comments pertained to support and retention of minority students, a subject never intended to be included in the admission plan - retention will be the subject of a separate plan). *See* Brown Affid. ¶ 13; Smith Affid. ¶ 9.

Following Plaintiffs and the Special Master's receipt on November 15, 2013 of the revised October Admissions Plan which included the new Appendix L, TUSD again was met with total silence. *See* Brown Affid. ¶¶ 14-15; Smith Affid. ¶ 10. Neither the Plaintiffs nor the Special Master ever commented or responded to these revisions. *Id.*

Surprisingly, on November 22, 2013, the Special Master emailed his "Report and Recommendations" to the Court without ever having commented on the most recent version of the plan, and with nearly two weeks left in the mandated voluntary resolution period. *See* Brown Affid. ¶ 15. Moreover, the eleventh hour proposal in the Special Master's Report and Recommendations was completely different from anything he previously had shared with the District. *Compare* Brown Affid. ¶ 15, Att. I (11/8/13 proposal of Special Master) with Ex. A (11/22/13 Report & Recommendations) From these actions, it became apparent the Special Master was not seeking to assist in voluntary resolution of issues with TUSD's Plan – but rather was seeking only to promote his own admissions plan with no compromise.

AFFIDAVIT OF SAMUEL E. BROWN

STATE OF ARIZONA)
) ss.
County of Pima)

Samuel E. Brown, being duly sworn upon his oath, deposes and states as follows:

1. I am above the age of 18 and am competent to make this affidavit.
2. I am employed as the Desegregation Director for Tucson Unified School District and have worked in that capacity since February 2012. In that capacity I am tasked with coordinating the District’s implementation of and compliance with the Unitary Status Plan signed by the Court in February, 2013.
3. Section V(A)(5) of the Unitary Status Plan (“USP”) directs the District to review and revise the admission process for University High School (“UHS”) to ensure that multiple measures for admission are used and that all applicants have an equitable opportunity to gain admission to UHS. The Plan also requires us to consult with experts on various issues and consult with the parties and special master during the drafting of the revised admissions procedures.
4. The USP provisions regarding the admissions at University High School evolved significantly during the course of negotiations and drafting on the Unitary Status Plan. During that time, most of the work of District personnel with appropriate expertise was devoted to analysis and revision of the USP provisions. Preliminary work on possible admissions plans began promptly in January 2013 after the holiday break.
5. Our more formal work on the UHS admissions plan, including the formalization of a UHS Internal Working Group, began promptly following the Court’s issuance of the USP. The Working Group included appropriately qualified personnel from central offices as well as the principal, assistant principal, and a faculty member from University High School. Over the course of the development of the admissions plan, Working Group participants included: UHS Principal Elizabeth Moll and her successor, Dean Packard, UHS Assistant Principal Amy Cislak, Advanced Learning Director Martha Taylor, Desegregation Program Coordinator Richard Haan, Research Project Manager Juliet King, UHS teacher Mike Schmidt, and me. Over time we also reviewed relevant professional literature, consulted with experts, circulated ideas to the public, UHS parents, and of course the parties and special master.
6. By late July, 2013, we were able to circulate an early draft of the UHS admissions plan to the Plaintiffs and Special Master. That draft is attached hereto as **Attachment A**. Over the following 5 weeks, we received comments, input, and suggestions from the parties

and Special Master. Discussions were generally had in an ongoing swirl of electronic mail communications.

7. We aggregated the comments received into a chart so that we could track whether the suggestions were incorporated in whole or in part or, if not incorporated, list the basis for rejecting them. The chart reflecting this process for the UHS plan is attached as **Attachment B** hereto. We created such summaries of the Special Master's and Plaintiffs' comments because the email communications are so voluminous.
8. Since the USP was ordered in February 2013, I have been in regular contact with the Special Master whether it be on the UHS admissions issue or other USP issues (we also were in regular contact during the drafting of the USP). We speak multiple times per month and correspond by email consistently; occasionally we exchange more than 20 emails a day.
9. On September 5, 2013, following the exchange of comments and revisions noted above, we produced the next draft of the UHS admissions plan. It is attached as **Attachment C**. That draft was circulated to the parties and Special Master as well as being posted to the District's website as an agenda item for the Governing Board. We received additional comments from the parties and Special Master via email and, on September 15, 2013, I participated in a lengthy conference call with the parties and Special Master. That call was arranged by my office with an advance email asking everyone to identify their top remaining concerns or objections. I reduced everyone's concerns to writing in a memo that I then circulated to all by e-mail thereafter. **Attachment D**.
10. The fourth formal version of the plan was in October, 2013. On October 22, 2013, it was formally approved by the District's Governing Board. **Attachment E**.
11. On October 31, 2013, the Mendoza Plaintiffs submitted written objections and concerns to the Special Master and the District. **Attachment F**. On November 4, 2013, we received written objections that the Fisher Plaintiffs tendered to the Special Master regarding the UHS Plan. **Attachment G**. On November 5, 2013, we received comments from the Special Master. **Attachment H**. On November 8, 2013, the Special Master sent me a specific proposal based, he said, on the parties' objections. **Attachment I**.
12. Upon review and analysis, we believed that the concerns the plaintiffs had raised could be reconciled with the plan but necessitated some amendments and clarifications. During the second week in November, we worked to revise the UHS Plan, including adding a new "Appendix L." **Attachment J**. With the exceptions of the highlighted revisions and the new *Appendix L*, the Plan and attachments remained unchanged from the October 22, 2013 version.
13. On November 15, 2013, with my input and approval, our attorney forwarded the revised Plan, including supplemental *Appendix L*, to the Special Master and Plaintiffs.

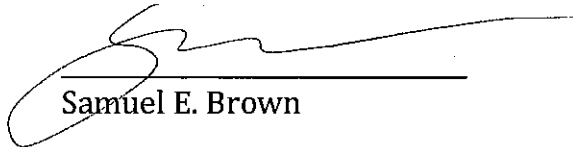

With those documents, she tendered a 9-page Memorandum specifically identifying how the revisions addressed the parties' objections. **Attachment K.**

14. We heard nothing further from the Plaintiffs or the Special Master regarding the UHS Plan after tendering our follow-up documents (**Attachments J and K**) on November 15, 2013. Nor did I receive thereafter any correspondence from or between the Plaintiffs and Special Master suggesting that any of them had further objections, concerns, or requests for modifications to the UHS Plan or requesting that the Special Master file a Report & Recommendation concerning it.

15. On November 22, 2013, I was surprised to receive the Special Master's Report & Recommendation (R&R) via email, contemporaneously with his communication submitting it to the Court clerk. I had received no further feedback whatsoever from the parties whether objections remained unresolved. During the week between submission of our materials and receipt of the R&R, I had exchanged approximately 15 e-mails with Dr. Hawley, none of which mentioned any lingering objections or a coming report rejecting our very substantial efforts.

FURTHER AFFIANT SAYETH NOT.

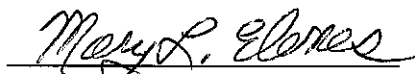

Dated this 13th day of December, 2013

Samuel E. Brown

State of Arizona)

ATTACHMENT A

TUSD

University High School (UHS) Admissions Revision for SY 2013-14 (Effective for SY 2014-15 Applicants)

Executive Summary

Pursuant to the Unitary Status Plan (USP), by October 1, 2013 TUSD will review and revise the process and procedures that it uses to select students for admission to UHS to ensure that multiple measures for admission are used and that all students have an equitable opportunity to enroll at University High School. TUSD will consult with the Plaintiffs and the Special Master during the drafting and prior to implementation of the revised admissions procedures.”

Timeline

UHS has established a working group to review and revise the admissions process, including consulting with relevant experts and considering multiple measures. The ALE Director is collaborating with UHS to finalize this review and any admissions process revisions in conjunction with UHS and the parties. The District will present a draft revised process no later than July 20, 2013 for Board, Special Master and Party Review. Staff will work with all stakeholders to refine the draft process to finalize a process in time for the 2014-15 admissions period. TUSD will send a draft process by July 23, 2013, and will consult with the Plaintiffs and the Special Master between July 23 and Aug 2 prior to the recruitment and implementation phases. On or around Monday, August 5 – after receiving feedback from the governing board, parties, and special master – TUSD will send a revised version to all parties. Barring no major objections to the revised version, TUSD will send a notification of the changes to the new admissions process inserted into the 8th Grade recruitment letter from the ALE Director (currently scheduled to be mailed out to all 8th Grade parents/guardians on Monday, August 12. If major objections or conflicts remain prior to finalization of the letter and/or this process, the UHS Admissions insertion will not be included in the 8th Grade letter. See proposed timeline below.

May 1 to July 23	July 23 – Aug 3	Aug 3 – 5	Aug 12 – Oct 4	Oct 5 – Jan 31

Background

A UHS Admissions Internal Working Group was established in March under the leadership of the UHS Principal, Ms. Moll. In addition, to Ms. Moll, the working group is comprised of Mike Schmidt, a UHS mathematics teacher for the past 12 years, who represents the faculty and serves as a liaison to the Instructional Council, the Assistant Principal Amy Cislak who serves on the UHS Site Council and would provide continuity after Ms. Moll retirement, and Dr. Juliet King, an A&R Research Project Manager, who has managed the school's admissions for the past 4 years. With Principal Moll's retirement, the new Principal, Dean Packard, has taken her place.

Current Admissions Criteria

The admissions process was first created through a UHS Advisory Report in 1987. It was revised in 1988, 1989, and 1991 by the UHS Matrix Review Committee. In 1997, the UHS school council adopted revised admissions guidelines. It was revised again in December 2009, and March 2010. The current policy was approved by UHS School Council in April 2011. The purpose of the admissions policy, including the entrance exam, is to recruit and retain a diverse and qualified student population.

Admission to UHS for 9th and 10th grade is based on the following factors: 1) achieving 50 points or more from a combination of points obtained from valuing a student's GPA and entrance test scores, and 2) space availability. Students must have a minimum cumulative GPA average of 3.0 in four core classes – English, Social Studies, Mathematics, and Science. No weight is given for advanced classes, such as Honors or pre-AP.

The cumulative GPA average is calculated from final grades for the second semester of seventh grade and the first semester of the eighth grade school years. UHS currently administers the Cognitive Abilities Test (CogAT) as an entrance exam. The Cognitive Abilities Test has been used as the primary entrance test for over a decade. It is comprised of three sub-tests – a verbal, quantitative and non-verbal. In 2013-14 both UHS and GATE (for grades 3-7) will administer the most recent version – the CogAT Form 7 – to grades 3 through 8.

The CogAT's strength is the fact that it is not an intelligence test, nor a standards based exam (a common type of assessment for "exam schools") but a well-known and norm referenced assessment of a student's reasoning abilities skills - skills that are not innate and can be developed over time (Loman, 2002). Students must receive a minimum qualifying composite stanine score of 7 on the test to receive points. The current required minimum test score of a 7 on the Composite Stanine is equivalent to a 77th percentile rank and allows for students that may not score a 7 or higher in each sub test the opportunity to still meet the entrance requirements by obtaining higher scores in one or more sub test categories. Points are awarded for GPA and test scores according to the following tables. A minimum of fifty points and above qualifies a student for admissions to UHS. (See Chart below, page 3)

In the past the Ravens test was used as well as an additive component to supplement student scores. The Ravens test was released online which made it ineffective as a measure. Therefore it was removed as a component of the admissions process.

GPA	Points
4.00	36
3.99-3.86	34
3.71-3.58	32
3.71-3.58	30
3.57-3.44	28

9	27
8	24
7	21
0-6	0

Review and Revisions

A UHS Admissions Internal Working Group was established in March of 2013 under the leadership of the University High School Principal, Elizabeth Moll. In addition, to Ms. Moll, the working group was comprised of Mike Schmidt, a UHS mathematics teacher for the past 12 years, who represents the faculty and serves as a liaison to the Instructional Council, the Assistant Principal Amy Cislak who served on the UHS Site Council and would provide continuity after Ms. Moll retirement, and Dr. Juliet King, an A&R Research Project Manager, who has managed the school's admissions for the past 4 years. With Principal Moll's retirement, the new Principal, Dean Packard, has recently taken her place. The Working Group met several times to discuss the current admissions policy for freshman and identified areas for review and revision. Early consensus from the working group determined that additional admissions criteria should be objective and well-defined. The initial feeling was that the use of interviews, personal essays and/or staff recommendations could inject subjectivity into a process, and could reduce the transparency, and consistency of the admissions.

In reviewing the use of the CogAT it was felt that the test still meets the evaluative needs for determining if students meet the intellectually gifted criteria set forth by the school board. An area of concern however is that as a "publically" available test, test-prepping can be an issue. To address this issue, the Working Group asked if Riverside Publishing, the publishers of the CogAT, would be willing to create a version of the test for the school. This was not feasible for them but the school will continue to explore the option of developing a UHS assessment that measures critical thinking skills. To address the inequity of some students having opportunities

to practice the test UHS is working on ways to make practice tests available for students and is working with Riverside to see about opportunities to make online sample or practice versions available.

The more rigorous Common Core Standards and the implementation of the national PARCC assessment that is predicted to be an improved measure of student preparedness for post secondary success may allow for a transition away from the CogAT in the future.

When looking at the use of GPA the Working Group felt that the use of course grades was an area for revision. The calculated GPA is used to measure academic performance, but is also considered a proxy indicator for student motivation for learning. Grades however may reflect other factors such as attendance or behavior. Also, applicants come from schools all over the area, and grading policies can differ by school and district. The districts transition to a more data centered analysis of student learning and the transition to the Common Core Standards should improve the effectiveness of grades or GPA as a predictor of success in the future, however the working group felt that it was important to look at alternative methods to determine if a student is academically focused.

The working group determined that using some measure of resiliency or motivation may address the concerns that were raised related to GPA. Dean Packard and Dr. Juliet King consulted with Dr. Lannie Kanevsky at the Simon Fraser University in British Columbia. Dr. Kanevsky is an expert in the field and has been conducting research in this area of resiliency and motivation for the past 20 years. (vitae available).

Academic resiliency is a complex concept with multiple elements and has been described in various ways in the academic literature. The notion of resiliency as described in the academic literature is related to "resourcefulness", "persistence", and "confidence" and "motivation" (Martin et al, Sandoval-Hernandez and Cortes,). It has been defined as the "ability to effectively deal with setback, stress or pressure in the academic setting" (Martin et al) where resilient students are those who are "academically successful despite challenging backgrounds" (Sandoval-Hernandez & Cortes)

Academic resiliency has been adopted in several ways – to identify vulnerable or at-risk students for interventions, or more "positively" - to identify the strengths of students that are related to adaptability and motivation.

Dr. Kanevsky identified multiple instruments that may meet the needs described above. These included the Measure of Academic Intrinsic Motivation (MAIM) developed by Godfried and Godfried, the Children's Academic Intrinsic Motivation Inventory (CAIMI) and 'Mind-set'.

Although the specific instrument has not yet been determined, the working group is proposing the use of an academic resiliency scale as an additive measure for student admissions – students will receive additional admissions points based on their resiliency towards the required number of 50. Students will still need to meet the minimum of a 7 composite stanine on the CogAT and have a minimum GPA of 3.0 to receive admission points but adding the resiliency scale will assist students whose GPA may not have been high enough to meet the required admission points. This will impact students similarly to the previous use of the Ravens test.

Moving forward the work done by the internal working group will be shared with larger constituent groups. Committees that include members of the parent groups, instructional council, site council, staff and administration will continue the process of defining which assessment to use and how the points will be awarded.

DRAFT

TUSD

University High School (UHS) Admissions Revision for SY 2013-14 (Effective for SY 2014-15 Applicants)

Executive Summary

Pursuant to the Unitary Status Plan (USP), by October 1, 2013 TUSD will review and revise the process and procedures that it uses to select students for admission to UHS to ensure that multiple measures for admission are used and that all students have an equitable opportunity to enroll at University High School. Academic resiliency is a complex concept with multiple elements and has been described in various ways in the academic literature. The notion of resiliency as described in the academic literature is related to "resourcefulness", "persistence", and "confidence" and "motivation" (Martin et al, Sandoval-Hernandez and Cortes,). It has been defined as the "ability to effectively deal with setback, stress or pressure in the academic setting" (Martin et al) where resilient students are those who are "academically successful despite challenging backgrounds" (Sandoval-Hernandez & Cortes)

Academic resiliency has been adopted in several ways – to identify vulnerable or at-risk students for interventions, or more "positively" - to identify the strengths of students that are related to adaptability and motivation.

Dr. Kanevsky identified multiple instruments that may meet the needs described above. These included the Measure of Academic Intrinsic Motivation (MAIM) developed by Godfried and Godfried, the Children's Academic Intrinsic Motivation Inventory (CAIMI) and 'Mind-set'.

Although the specific instrument has not yet been determined, the working group is proposing the use of an academic resiliency scale as an additive measure for student admissions – students will receive additional admissions points based on their resiliency towards the required number of 50. Students will still need to meet the minimum of a 7 composite stanine on the CogAT and have a minimum GPA of 3.0 to receive admission points but adding the resiliency scale will assist students whose GPA may not have been high enough to meet the required admission points. This will impact students similarly to the previous use of the Ravens test.

Moving forward the work done by the internal working group will be shared with larger constituent groups. Committees that include members of the parent groups, instructional council, site council, staff and administration will continue the process of defining which assessment to use and how the points will be awarded.
