¹ Some of the classes listed in this chart, such as Algebra I, cover both semesters. Some, such as Spanish, cover Spanish I during the first semester and Spanish II during the second semester (or Spanish III and Spanish IV, etc.). And others, such as Health, can be taken in either semester. The total student counts can change slightly between semesters for various reasons. The student counts in this chart reflect the second semester totals with the exception of classes that were offered only during the first semester. The number of middle school courses offering high school credit is larger in this chart because certain courses were not included in the previous chart.

² Courses offered through AGAVE are offered at the home school through AGAVE teachers.
