

Table 1 is a cross-tabulation of neighborhood school versus enrolled school by school level. Table 2 summarizes the school choice applications and placements to the schools, disaggregated by school, program (Open Enrollment or Magnet), and ethnicity.

Appendix II-19 shows a significant percentage of District families sending their children to schools other than their neighborhood schools – indicating that school choice is effective in facilitating voluntary movement.

Please note that in 2013-14, because of the closure of ten schools at the end of the prior year, a number of schools experienced one-time anomalies in their Open Enrollment applications/placements.

For example, with the closure of Wakefield Middle School, nearby Hollinger Elementary was converted into a K-8 school at the start of the 2013-14 school year. Initially, Hollinger Elementary had identified 19 available seats for Open Enrollment placement. However, when the Governing Board closed Wakefield Middle School they also re-apportioned the former Wakefield Middle School neighborhood to the Utterback Middle School attendance area, and offered families the option of attending a K-8 school at Hollinger. Families who preferred Hollinger K-8 over Utterback Middle simply filed an Open Enrollment application and their children were placed (depending on space available) at Hollinger K-8 for the 2013-14 school year. That is why the table reports 178 of the 218 Open Enrollment applications received for Hollinger were placed despite the fact that only 19 seats available.
