¹ Neighborhood: This is the projected racial-ethnic composition of neighborhood students projected to enter the grade shown in SY 2015-16. To demonstrate lottery adjustments needed, the table above shows applications versus neighborhood projections at Miles Early Learning Center and Dodge Magnet Middle school*Seats Offered: These are the seats offered to students after the first lottery, when the lottery, due to the number of applications and seats available, can have the greatest impact. Subsequent lotteries have less impact unless there are a large number of applications and significant additional seats are made available—not a common occurrence.

² Projected Results: These are the expected enrollments based on the neighborhood projections and all placements through May. For schools with large initial placements the results are close to what would be expected from the first lottery.
