**Question was negatively worded and the responses have been reversed for scoring. With this process, it is scored in the same way as the regular questions so that the higher the score, the greater the agreement from students.*

An example from the 3 - 5 grade survey is: 'In our class, it is okay to stop trying'. If a teacher receives a score of 2.0 (after reverse scoring), the results indicate that the students agreed with the question and the class is not challenging. If a teacher receives a 3.5, the results indicate that the students strongly disagreed with the question and the class is challenging.
