The above information covers the period from October 2019 to July 2020 for student placements in the 2020-2021 school year.

Target seats are those for the lottery only; they do not include placements such as GATE, pipeline etc. These are subtracted from the overall targets so the lottery placements will help to achieve the overall targets. Target seats may be higher than placements because other placements were made, such as siblings or exceptional education students, after the targets were prepared.

The lottery placements matched targets to the greatest extent possible given the applicant pools. The applicant pools for McCorkle and Roskruge were composed primarily of Hispanic students so that it was not possible to achieve integration at these schools.
