Multicultural education is a progressive approach for transforming education that holistically critiques and responds to discriminatory policies and practices in education. It is grounded in the ideals of social justice, education equity, critical pedagogy, and a dedication to providing educational experiences in which all students reach their full potential as learners and as socially aware and active beings, locally, nationally, and globally.

Schools are essential to laying the foundation for the transformation of society and the elimination of injustice. *Paul C. Gorski 2010*
